### The Purpose of an Education

Our young folks in the schools and colleges are now in the midst of their year's work, preparing for the midsummer examinations, which mean so much in the technical side of their educational course A distinguished educator said the other day that one purpose of education is to enable students to hear the skylark's song as well as the factory whistle. one works in a factory it is important that he hea the whistle and be on time; but there is no reason why, as he goes to work, he should not enjoy the morning song of the birds, and take pleasure in the sunrise. It is a very narrow view of education which is limited to preparing one to make a living. An education should also prepare one to enjoy life.

### Western Ideas Being Adopted in the East

It is highly creditable to the people of Japan that they now take very advanced views of modern in impure water have been virtually unknown in break of the war opened up possibiliconception of sanitary and economic principles in Orangeville for the last twenty-five years. Financial- tensive travel, and he joine I the navy their building up of city areas. The plans for re- ly the system has also justified the hopes of the as being less likely to remain confined building Tokyo are admirable. More than 4,000 men who were instrumental in pushing through the language all of the time. houses were burned as the result of last year's scheme. Deficits were experienced in the early years, he became stationed at Mudros, in the carthquake. Such wide areas were laid waste that but for several years back the system has been self- Grecian Archipelago, near the entrance it is possible to reconstruct the city on a systematic sustaining and has sometimes shown quite a tidy modern plan. The proposal is that the city shall surplus for the year. In 1926 the last of the deben- store and was looking round for more buy all the land in the devastated area, and that tures will be paid and thereafter the system will himself of the bethought after laying it out so as to include wider and more show a handsome surplus each year after meeting all oners coming in to the depot, and after convenient streets, better parks and open spaces, maintenance and extension charges.-Banner. enlarged and deepened canals and wider avenues to limit the spread of fire, it shall sell back the, remaining land to the people.

A New Feature of Railway, Courtesy The Canadian National Railway management has adopted a new act of courtesy toward sleeping car passengers between Toronto and Montreal. In the morning this class of travellers is presented with a cup of hot coffee by the car porter. On a card accompanying the cup are the words: "Good morning! Compliments Canadian National Railway." Now, that is a very nice down-to-date courtesy to the people able to purchase sleeping berths and accompanying comforts of travel. But what about travellers do not; or, if they do, their coach value of the immense undertaking. is contiguous to the dining car, and they can be promptly supplied therefrom at a small outlay.

# The Wardenship of 1924

When we wrote last week's article on the Wardenship of 1924 we were led to believe that George Hillmer, M. P. P., of Oakville, would not again seek the office of Reeve of that town. It was so stated in the Oakville press. On nomination day, however, the two gentlemen nominated for the position, could not agree as to who should stand, and compromised by asking Mr. Hillmer to again accept a nomination The latter was persuaded to do so, and that is why he will again represent Oakville at the County Council board. But whether he will be a candidate for the Wardenship again we are not in a position to state. He may be magnanimous enough to want some other member of the Council to be honored with the position, seeing that he has been honored with the representation of the County in the Ontario Legislature We believe there will be, in any event two or three candidates for the Wardenship. Besides Mr. Barber, of Acton, we understand it is possible if not probable, that W. J. L. Hampshire, Reeve of Esquesing, will be nominated for the position. And there's no doubt that Mr. Hampshire would make a in some-respects. good occupant of the chair, having had considerable experience as a municipal councillor, coupled with ..... John T. Smith, who insists that he is entitled the fact that the whole of last year's Council were to import liquor into Ontario, and appealed against that no other names were submitted for the different failed in his action against the Attorney-General we understand that Mr. Hillmer will be a candidate similar results. for the Wardenship, and thus, if elected, realize his long-cherished ambition to round off his municipal nonular with the people generally. Milton Reformer.

Falsifying Destination Manifest of Liquor Shipments

Dispatches from Niagara Falls last week gave this item: "Liquor exporters are busy at Chippawa, and cargoes are continually leaving the up-river port for Cuba. The shipments have been coming from Port Colborne, and are loaded on boats which make the long journey to Cuba. The vessels are very fast, for one was able to make two trips to "Cuba" on Friday." Surely there is some way of stopping this barefaced evasion of the law. The Dominion Government has a plain duty, and the people of this province at least expect, and have a moral right to expect, that action will be taken to put a stop to such unrighteous subterfuges. It would not be permitted with other goods; why with liquor?

# A British Opinion of Class Legislation

Commenting on the state of the political parties in Canada, the London Times says: "Government by farmers as such, is no more to be tolerated than government by doctors, butchers or plumbers. One of the contributory causes to the Conservative vic- great rallway which prides itself on tories in the Eastern -provinces undoubtedly has equable manner, received a rude joit been the nervousness of the great industrial centres one day when two bloturesquely garbat the prospect of a possible surrender by the govern- Depot of the Canadlan Pacific Railway ment to the somewhat importunate demands of the at Montrea', and, despite, the most men from the West. In this putting East against contortions, falled in a most deplar-West, of class again class, lies a very real danger, able manner to make anyone under not only to Premier King and his government, but to Canada itself. It is a danger that can be sur- east ventured the opinion that the mounted only by bridging the geographical map, bardment which had been in progress which divides two communities by a living bridge of ceased in hopeless despute, for the population.
