

THE SUNDAY SCHOOL LESSON.

FOR SUNDAY, JANUARY 20.

THE TRAINING OF A GREAT LEADER—Exod. 2: 1-15; 3: 7-12.

Golden Text—By faith Moses, when he was grown up, refused to be called the son of Pharaoh's daughter; choosing rather to share ill treatment with the people of God than to enjoy the pleasures of sin for a season.—Heb. 11: 24, 25.

The Test Explained—Exod. 2: 1-15; 3: 7-12. The act of Moses in taking the part of his oppressed fellow countrymen is a noble testimony to his deep heart sympathy with his own oppressed people. It is a testimony to his courage and his faith in God.

Lesson Theme—Discipline Necessary—It is a truth that discipline is necessary to leadership. In general, it may be said that while all specific knowledge and skill in execution must come from training, training cannot give any natural ability and power if they are wanting. It can only organize and direct to advantage the natural ability which the individual possesses.

THE YOUNG PEOPLE OF KNOX CHURCH have purchased the bartering business of Mr. W. J. Keo, and will move his family to Acton in a few days.

Mr. J. M. Gordon, of Georgetown, has purchased the bartering business of Mr. W. J. Keo, and will move his family to Acton in a few days.

Mr. J. M. Gordon, of Georgetown, has purchased the bartering business of Mr. W. J. Keo, and will move his family to Acton in a few days.

GEMS OF THOUGHT

A weak mind is like a microscope, which magnifies trifling things, but cannot observe great ones.—Chesterfield.

He who forgets his own friends, merely follows after those of a higher degree in a snob.—Thackeray.

Politics is like an art-craft; there may be nothing in it but it seems, nor, for that matter, is it.

Nothing is so hard for those who are abroad in riches as to conceive how others can be in want.—Swift.

To love to preach is one thing; to love those to whom we preach, quite another.—Coel.

The ruling passion, be it what it will, the ruling passion conquers reason still.—Pope.

Vexed nations curse the rain for which their shepherds pray, in vain.—Water.

Men, like bullets, go farthest when they are smoothest.

Humanity is never so beautiful as when praying for the forgiveness of one's forgiving another.—Richter.

Nobody ever outgrows scripture; the book widens out, deepens with our years.—Hartmann.

Purchase no friends by gift; when thou ceasest to give, such will leave to thee.—Puffler.

True friendship is like sound health; the value of it is seldom known until it is lost.

The way of the world is to praise the great and persecute living ones.—N. Rowe.

Violent excitement exhausts the mind, and leaves it withered and sterile.—Fosberg.

Oh what a tangled web we weave, when first we practice to deceive.—Scott.

It is excellent to have a giant's strength, but tactics like a giant is tyrannous.

Conscience is an inner voice that warns us somebody may be looking.

Of two evils the less is always to be chosen.—Thomas A. Kempis.

A black eye speaks for itself, but it doesn't always tell the truth.

THE BOTTLED BUTTERNUTS.

A friend of mine in the country has three large butternut trees on his farm which bear every year. In a good season they get about two bushels from each tree.

Two years ago, after he had gathered them and placed them in the butternut bins, he had about six bushels. As was his custom, he put them in the attic for to dry, for, as you know, butternuts are good to eat until the outer skin has dried up.

He did not get near the attic until late in the winter when he wanted some to eat. Imagine his surprise when he found that nearly half of them were gone. He questioned his wife about it, but she had not used any of them. The squirrel had been to the little store fall.

About a week later, however, his friend went back to the house, and happened to glance up, he saw a large red squirrel on the roof. It was eating the butternuts and had entered a small hole in the finish under the eaves. In a few moments the squirrel came out with a butternut in its mouth.

My friend now believed that he knew who was taking his butternuts, so he decided to follow the squirrel and learn where they were hidden. This was not very difficult to do because the squirrel came to the ground, about two hundred yards from the house, and entered a hollow log. He appeared in a short time and scampered off, doubtless for another nut.

While he was gone, my friend examined the log, and saw a hole in the end of it, discovered that it was nearly full of butternuts. Doubtless the squirrel, and perhaps the rest of his family, had been storing them up nearly all winter. They must have had other stowaways also, because all the butternuts are used and he had not in that one log.

My friend felt the butternuts were his, but he found them because he had a hole to go through. However, he did not enter the hole so that they could not steal the rest of them.—Leslie J. Wood.

NO SUBSTITUTES.

During the war, we heard a great deal of talk about substitutes. We found that certain vegetable fats could be used in place of butter and lard, and that bread could be made with other meals substituted for wheat flour. When at the store you asked for a loaf of bread, you were told that you could have a loaf of bread made with other meals substituted for wheat flour.

When at the store you asked for a loaf of bread, you were told that you could have a loaf of bread made with other meals substituted for wheat flour.

THE VALUE OF MANURE PER TON

Manure is worth exactly what it will fetch in the market. This amount varies widely depending upon the quality of the soil, the season, the crop and other factors, but it is interesting to learn in a general way its money value per ton.

On the Central Experimental Farm, Ottawa, where a four-year rotation of manure, oats, clover, and timothy was measured each year, the value of the manure was found to be \$12.00 per ton. This is the average gross value of each ton of manure by crediting the interest on the manure, the manure with the extra value of the increased crop produced over unmanured land during the thirteen years of the experiment. This figure is not, of course, the real net value of the manure; the net value can be secured only when account is taken of the cost of handling the increased crop, the cost of applying the manure to the land, the interest on the manure, and the share of the machinery charges per acre.

When these factors are considered the average value of the manure is \$10.00 per ton. It should be remembered, however, that the larger cost of handling the manure is the more the value of applying the manure are largely labor costs which, in many cases, may be done by the manure producer at additional labor, but without additional cash outlay. The larger yields per acre, the larger the value of the manure. The value of the manure is \$10.00 per ton.

At school you learn to love and use the manure. The manure is the best of all fertilizers. It is the best of all fertilizers. It is the best of all fertilizers. It is the best of all fertilizers.

THE DAYS I WOULD LIKE TO LIVE OVER

There is no thing in my life I would rather live over than my school days. I may regret boys and girls to know how I fifty years and over, having all other factors of excitement, but going to school if I were young again, I surely would go to school because I would get into the habit of going to school.

Now that I am telling a few select friends she is sorry she didn't throw him back.

TIT FOR TAT

She was a very gently dressed lady, and she rendered the bus conductor half a crown for her penny fare with the air of a grand duchess. "I'm sorry," she drawled, "but I have no pence."

"Don't you worry, lady," replied the conductor, "I'll give you a penny for your pence."

SHE LANDED HIM

According to tradition, Maro Anthony, while on a fishing party with Cleopatra, had a great fight with a large fish on his hook. The original version was that he had one of her divers seize a salt fish on his hook and the episode caused a big laugh at the Egyptian country club.

Now she is telling a few select friends she is sorry she didn't throw him back.
