Use and Abuse

The predicition has been offered that the automo- for it, Finnigan." bile horn will be abolished within five years. The prediction is based on the contention that the hom is no longer used as a warning, but as a demand for the right of way. The idea seems to be that the automobile driver imagines he relieves himself people to get out of his way, and that if he had no horn he would be compelled to pay attention to the traffic. It is hard to conceive that any gentleman would insult his hostess by going to her home with a flask, or to a social function in a public place thus supplied. However, we cannot close our eyes to this. There are law-makers and law-breakers. The law-breakers include, besides the murderers, burglars and thieves, those who violate the O. T.A. If the leaders in our social, business and professional life go deliberately into the lawbreaking class, it is a most unfortunate thing for our
