The following remarkable calcula-

tion on the length of time which it would require to count 1,000,000,000,-000 recently appeared in an issue of What is a billion? The reply is very Exterminator will protect the children simple. In England a billion is a million times a million. This is quickly written and quicker still pronounced. No man is able to count it. You will us suppose you go as high as 200 a you would count 12,00 an hour, 288,-000 a day, or 105,120,000 in a year. Let us suppose now that Adam, at the beginning of his existence, had begun to count, had continued to do so, and

is counting still. Had such a thing been possible, he could not yet have finished counting a billion! To count a billion would require person to count 200 a minute for a period of 9,512 years, 343 days, 5 hours count continuously. But suppose we
