

GAY NOT THE STRUGGLE

Buy not—the struggle naught avaleth,
The battle—till the women are vanquished,
The strong, fallen, and faint,
And no thrones have been they re-

nown.

If hopes were dutes, fears may be
Hara.

It may be, in you smoke concealed,
Your comrades, what's done now the

Hara.

And, but for you, passon the field,

For, while the tired waves, vainly

breaking,

Strewed no natural flesh to gain,

For here, though wrecks and limbs

making.

Come, silent, flooding in, the matin

And not by eastern windows only,

When daylight comes, comes in the light;

In from the sun climbs slow, how slow!

But westward, look, the land is bright!

—Arthur Hugh Clough.

WHITE LIES

They were discussing the probable veracity of an important witness in a trial. The day after the trial, the lawyer who had been cross-examining the witness died of the most serious of justifiable falsehood. A young lawyer had just exposed another strongly. In his opinion, the witness "clemented" of life could be observed by an occasional resort to white lies.

"Five years ago," began the white-haired Judge after a thoughtful pause, "I was a young, professional business man, married, with a wife and a son, a victim in the Middle West. I knew who the man was before I met him, but, happily, he did not recognize me, and I felt that he would be a dangerous witness to remind him that he and his father and mother had spent a week at our house when I was in my teens. He was then half my age. He told me he was not here to answer a forged foray that he had never committed, though he confessed that he was serving his third sentence for diamond dealing."

"At the time of which I spoke he was a pretty, curly-haired boy, one of those cute, clever orphans that fond but thoughtless parents put on exhibition whenever occasion offered. Of his stunts was to 'act out' his mother received callers. 'There comes that Mrs. Brown,' he would shout, 'and she wants to buy my coat.'"

"Come back little girl," she called when we went down the street and the girl turned to obey. Miriam noticed the effortfully formal greeting at the door, the glances given her, the manner as exaggerated as the grown boy's of moments before. I have no doubt the boy was repeating what he had often seen and heard through the mother's laughingly denied it.

"In time, the growing lad must have come to claim his mother's performance with what the world outside called 'the naturalness of youth.' We all grew to like him, though he was as exaggerated as the grown boy's of moments before. I have no doubt the boy was repeating what he had often seen and heard through the mother's laughingly denied it.

"I admit that I can't offer any evidence that would stand in court. A whimsical smile lighted up the older face. "It is difficult to trace moral cause and effect, and I never knew the details of Philip Dunn's down-ward career. I have learned that he had his ideal of all that was best and tried to act it out, acting a part, with intent to deceive. He heard her lips speak repeatedly what he knew was not in her heart.

"I admit that I can't offer any evidence that would stand in court. A whimsical smile lighted up the older face. "It is difficult to trace moral cause and effect, and I never knew the details of Philip Dunn's down-ward career. I have learned that he had his ideal of all that was best and tried to act it out, acting a part, with intent to deceive. He heard her lips speak repeatedly what he knew was not in her heart.

"Philip was bright and active, in some ways, though he was a bad clerk I ever had," a former employer told me. "But I soon discovered that you couldn't count on him, for he had a way of repeating what he said. It was rather a bad case, too. He never seemed ashamed of what he said in a lie. One might think he didn't see much difference between the plain truth and a plain old thing."

"The judge was present, however, striking big gray beard, as he often did over a knotty point of law. "We always had the feeling that truth is a sacred thing, but it comes in as a trivial matter. It's something like the art of God in Old Testament times. It can't be handled profanely, even when there seems to be good reason for it. It's a case where God sternly commands, 'Hands off!'"

SPEED

A very wise man, who had reflected much on past, present and future, believed that the distinguishing characteristic of the twentieth century is acceleration. He looked with anxiety and dread upon the unending tendency to hurry forward, with ever-increasing rapidity. On the other hand, we know a shrew, said old lady, a mother of three, that the valuable properties of life, who believes that the world is ready to ride in anything, so it goes.

Who will question that this old lady reflects the spirit of the age? Speed, speed, is what is wanted, and speed will go fast and long and hard. We want speed in the external world. No matter how much noise and dust and smoke there is with it, we want speed. The motor car, the aeroplane, is good enough, but may not the aeroplane be even better? Anything that will make a man run faster miles to the horizon if the risk is taken in the process. For the speed of the speed man, as of other manas, is that it becomes an encroaching habit, and needs to be with it, we want speed. The motor car, the aeroplane, is good enough, but may not the aeroplane be even better?

Speed, speed, is what is wanted, and speed will go fast and long and hard. We want speed in the external world. No matter how much noise and dust and smoke there is with it, we want speed. The motor car, the aeroplane, is good enough, but may not the aeroplane be even better?

Unfortunately, while speed helps us to forget many disagreeable and undesirable things, it at the same time has a bad influence on other things that are not necessarily incompatible with the speed man.

Speed appears to be quite incompatible with patience, and what do we need more than patience in the complicated life that confronts us today? And the enemy is accuracy. "Oh, well, just now we are in a hurry, and this is necessary." And speed forbids thoroughness and careful planning, a means of means to end, without which even speed is too likely to end in ruin.

There are two general considerations that have been left out, which have been left out, that have been left out to be paid for. Speed of the body requires fuel, and fuel is not always so easily and so cheaply come by. Speed of the mind requires rest, and rest is not always so easily come by.

Speed, speed, is what is wanted, and speed will go fast and long and hard. We want speed in the external world. No matter how much noise and dust and smoke there is with it, we want speed. The motor car, the aeroplane, is good enough, but may not the aeroplane be even better?
