FOR THURSDAY EVENING, APRIL 26, 1928

- Prohibition Beneficial

We must consider the prohibition faw not in its effect upon certain groups or communities, who wilruny thouse to dely and violate it, but in its effect The reports of the Babson Institute are looke upon the life of our country as a whole and, so upon by big business men as authorative. The folconsidered, there is, in my judgment, no room for lowing extract from the Babson report for the serious doubt as to its beneficial results. By a great second quarter of 1928 will give some idea of the part of our people in the United States, we see this view this organization takes of Canada: "The steadily law respected and obeyed. We see its observance maintained improvement in general business over a in the country as a whole increasing and not decreas- year ago, gives every indication of continuing ing. We see the lives and homes of our wage earners throughout the spring and into the summer months. and our plain people immeasurably benefitted by it. Apprehensions of even a slight setback during the We see in many places jails closed because they are next few months are groundless, the major barno longer needed. There is not the slightest likeli- ometers indicating a distinctly encouraging outlook hood that the country will ever repeal the prohibi- for all parts of the Dominion. General industrial tion laws, and we all know this. I wish that we activity in practically every major industry is ahead might lift this subject from the level of mere law of a year ago, and March shows a more active record enforcement to the higher level of free, voluntary, than the preceding month. Sales campaigns may be Mr. Joseph I. C. Clarke in Japan at willing support of the law for the sake of the common planned on the basis that, barring unforeseen developgood."-The Right Reverend William T. Manning.

"Vote Ourselves"

than the money side of the question. He must look generally satisfactory state of affairs in both manu- Most Men Past 40 past his own personal enjoyment. He or she must facturing industry and trade." look to the investment being put in the young people of the community. Very often the cry is raised about our young people leaving the smaller towns for the city. And one of the reasons for the lure cityward is that for many years the cities have provided no end of lure while the smaller municipalities have been backward in supplying recreation centres for the young folk. Many parents who have the good of their families at heart are anxious for this recreation centre. Maybe you who read this are one of the ones whose family has grown up. Maybe your family is away from home in the city. On election day let your mind run back to the time when they were home. How would you have voted then? Read the details over again if you are not yet convinced that the rink is a necessity. Try to figure out just how much it can possibly add to your taxes and if you are not extra good in fractions it will be beyond you to solve the problem. Forget myself and vote ourselves on May 7.

Save the Forests-This Week and Every Week

and hay. "The forest was the enemy to be routed. of Mr. and Mrs. Joseph Holmes, Acton. To-day, the people of Canada are awaking to the fact that the forest they once regarded as an enemy stands in British Columbia! Eastern Canada, once a forest, is now buying lumber from the Pacific slope. torics will be closed up. Because her forests will ing for the British West Indies. be gone. Canadian Forest Week, which has been must be prevented.

Drink and Crime Run Together

"A nineteen-year-old lad was arrested in Quebec last week, charged with murdering his companion. In confessing to the crime he stated that he and his companion had been drinking previous to the murder. The lad killed his companion by hitting him over the head with a monkey wrench and then took this money and his watch. Such is a brief synopsis at Mr. J. McDermit'd. of many a crime report that appears with growing frequency in the press despatches." And yet some people have the audacity to say that drink never did anyone any harm.

Teach Farming to Boys and Girls

In addition to the teaching of elementary agriculture in the Public Schools of Alberta, the Provincial Government maintains four agricultural schools, the guilty parties will be prosecuted,-These selfools are designed chiefly to give instruction Herald. without cost to the boys and girls of the farms over 16 years of age. The course offered is of two years duration. There is no entrance examination requirements, and no charge is made for the course, save for board, and lodging. Since these schools were opened, more than 4,500 pupils have passed through them. They are the centres for the distribution of agricultural knowledge through their respective districts, and have been an important factor in the upbuilding of agriculture.

Are Police Magistrates Underpaid?

If, as has been contended in some quarters, high court judges and county judges ought to receive ed at Mr. Peter Binelair's, last week. more than the present emoluments of their office, so ought Police Magistrates. In Ontario these do about Mr. D. B. Leitch. The new building will 75 per cent, of the criminal work in the administration of justice. In most cases they get very little the Globe Hotel. -Advocate. for the service they render. It would be good public policy to establish a minimum rate of remuneration and require that none but persons well qualified for the office shall be eligible for appointment to it That there are Police Magistrates who have neither the legal knowledge nor the trustworthy judgment necessary for the proper discharge of the duties of the office is not to be denied. If the salaries paid were more liberal there would be fewer cases of unfit men sitting on the police court bonch.

Canada is Sound : ...

ments, 1928 will offer one of the most favorable was not surprised to see her standing years Canada has ever enjoyed. One important with the others to bow us out with smiles result of the growing unemployment situation in the Buddenly, as one who had forgotten United States is the probable deterring effect it will On May 7 the electors of Acton will vote on the have upon the movement of Canadian labor across rink by-law. The by-law says on the issuing of the border to the States. We repeat here again that debentures for \$15,000.00 or less for the purpose regardless of the trend of conditions during 1928 on the train, I asked my learned friend, of erecting a skating and curling rink in Acton. in the United States, Canada is in a fundamentally Uyeda, to translate its ideographs for me. Being a legal document it deals only with the sound position, and can maintain an independent legal aspect. But when a ratepayer goes to the prosperity for many months. Increasing employpolls if he or she be, conscientious, must look farther ment trends throughout the Dominion reflect the

EDITORIAL NOTES

For the conveyance of mail in Canada 37,547 miles of railway are used. Over this network of lines the mail mileage used daily by the Post Office Department of Canada is 128,409. There are few countries scrious allments—that every sufferer in parts of which the settlers are so sparcely located which gives to efficient postal service.

It is altogether probable that there was no sign ficance that could be attached to the incident. But the same mail that brought the morning papers last markable power of URATABS -a special week announcing the retirement of two members of than 40 years in the private practice of the Liquor Control Board also brought a booklet Dr. H. C. Southworth. After only a few days' use, a startling improvement is issued by the Prohibition Union giving press comments on the failure of the law to control.

The Mitchell Advocate, which has just celebrated its sixty-eighth birthday, has a unique record. The late W. R. Davis was the founder of the paper and day. in all the years the paper has been published by diembers of the family. The Advocate is a splendid Clearing land in Canada was once an industrious weekly journal and has had a prosperous career. Mr. habit. Eastern Canada was a forest, and the first Hal B. Davis has, for the past twelve years, had thing to do was to clear land to grow wheat, potages charge of the Advocate. Mr. Davis is a son-in-law

According to an estimate of the Canadian Governis Canada's second best asset, and furthermore, that ment Bureau of Statistics, the population of Canada it is a rapidly-disappearing asset. White pine was as at June 1, 1927, was 9,519,000. This answers very once the most commonly used lumber in this country, effectively the pessimism prevailing in certain quarand a generation ago it was comparatively plentiful ters which persists in the statement that so many and cheap. Not so to-day. The original stands of people are going to the United States that there is white pine are nearly gone. For saw-mill timber no increase in population. As a matter of fact there we now depend largely on spruce and fir. Seventy are at present far more settlers coming to Canada per cent. of the timber in Canada of saw mill quality from the United States than any exodus from Canada.

Canada's bacon hog policy and the clean bill of The accessible forests of Northern Canada to-day are health, insofar as live stock is concerned, has tended chiefly valuable as sources of spruce pulp, for paper- to increase Canadian exports of bacon hogs for making. How long they will last, subjected to the breeding purposes. During the past year shipments present rate of exploitation plus the ravages of forest of bacon type breeding stock were shipped to the fire, has been calculated, and the resulting figure is United States, South Africa, New Zealand, Jamaica not at all reassuring. In twenty-five years, unless and the British West Indies. Recently a shipment Canada wakes up soon, her forest industries, her of Canadian bacon type Berkshires were shipped to lumber mills and paper mills and wood-working fac- Port of Spain, Trinidad, and other orders are pend-

designated as this week, April 22 to 28, calls attention "Some of the weekly newspapers are suggesting to this situation and to the obvious remedy. If we that the Ontario Government should advertise at the can prevent forest fires, the natural growth from end of each session, giving summary of the new legisyear to year, forestry men say, will provide for the lation passed as it affects the general public. There demands of axe and saw. The Canadian people as is some need for more information about many of a whole must realize the great and increasing value the new laws and the quickest way to reach everybody of the forests of Canada which remain, and each is through the weekly newspapers, for although much individual must do his or her best to prevent forest of this information is given in the daily press, it is fires. Carefulness and good management will save overlooked entirely by most people. Of course, Canada's forest industries in perpetuity. Hon. Chas. some of the editors who are now making the sug-Stewart, Minister of the Interior, views forestry gestion are not entirely/disinterested when suggest work as one of his most important tasks, and not ing advertising but if it were distributed in the the least important part of his effort is to make the same manner as much of the government advertising people of Canada realize that forest fires can and was last year, only a portion of the people would ever see it."-Fergus News-Record.
