WHAT A LAUGH IS

- A faugh is just like symphine. It freshens all the day; It tips the peak of life with light And drives the clouds away.
- The soul grows glad that hears It And feels its courage strong-A laugh is just like sunshine
- For cheering folk along! A laugh is just like music, it laugers in the heart.
- And where its melody is heard The Illa of life depart; And happy thoughts come crowding Its joyiul notes to greet-
- A laugh is just like miste Por making living sweet!

Now that the great success of Certified Beed potato industry in 1927 is history, the country is settling down to consider aeriously the problem of producing a crop in 1928 which will maintain the high standard for which Certified seed is famous. Those whose hopes centre on the stability of this industry, especially the growers upon whom the burden of responsibility rests, are cager to correct any practices known to be unprofitable in the past. Pailure of our seed to meet the demands of an exceedingly critical market will ruin the industry. Seed treatment is one of the requirements which must be met. Quaranteed that seed has been treated is one of the best assurances of a ready market There's no place holds that treasure for the crop. Certain diseases, while relatively insignificant to us, thrive in other districts, and do so much to ramove the popularity enjoyed by our seed. There exists a mistaken idea that the

bi-chloride method of treating seed po- And with troubles fast retreating totacs fails to achieve its purpose. In- I receive the sunny greeting vestigations carried on for a period of Of the boyhood pals I'm meeting three years at the Pield Laboratory of Plant Pathology, Charlottetown, do not support this statement. However the findings show how entirely usoless the treatment is when prescribed instructions are not followed carefully. Other chemi- For, no matter when I wander, found to compare favorably with bi- And my heart grows ever fonder chlorides, but on account of tariff they

The bi-chloride treatment consists in Free from pride and vain resentment soaking seed jointoes for 11/4 hours in a solution composed of 4 ounces of bichloride of mercury in 25 gallons of water. After each lot of four bushels has been soaked, 14 ounce of bi-chloride is dissolved in 1 puart of hot water, I'll retain a fond relation and added to the original solution and And return with glad elation water added to replace any loss. This is necessary to maintain the strength of the colution. In the past it has been customary to treat as many as eight ols multiple du extra ... obuce at al

killing effect on the resting form of Rhizoctonia (the Scierotia) on the seed tuber if used eight times, and, even where the necessary precautions have been observed, it is advisable to discard the solution when three lots of potatoes have a good old town to come to. Every year been treated. Certain precautions will finds it easier for outsiders to get here. prevent deterioration and render seed In the earlier days it was necessary to

1.--Dissolve the bi-chloride in not less we have quite an option on routes for than one gallon of boiling hot water. 2.—Wash the potatoes before treatment like them. Pirst and foremost, of course, and disclosed a bowl of chicken salad, a to remove dirt. (This is very important). there is the Canadian National Railway, freezer of ice cream, angel sake and 3.—Have two clean casks with drain with its numerous accommodating trains, plugs at the bottom. When one soak then we have the Canadian National she said meekly. second cask and clean the sediment out of the first. Use these casks alternately special occasions. And then there are the Arrow buses, which run a pretty

HOW UNCLE SAM GOT SUPPER

"Nowadays a cook is provided for each (roadway. We considered ourselves lucky of anything, and not having had a civilizcamp," says an old lumberman, who has when Hon. Mr. Biggs' cross-country ed meal, I didn't have much stomach worked on the Saint Croix, the Penobscot, graded gravel road, from Main Street, for fighting. At first I was looking and the Saint John, "but in my days of Acton, to Crewsons Corners, and beyond, round for a imy-stack to scoot for and lumbering we took turns, a week at a was built a few years ago, because it cut hide in; but after a time I began to get time, or one man would make all the out two dangerous level railway crossings, interested in the left-hand overcoat pocbread, another the tea and coffee, and and that vexatious succession of short ket of the man in front of me, a chap so on through the bill of fare. Once in a little hills on the second line and the named Piper. while, generally before they'd got licked town-line crossroad. And now, thanks "It looked to me as if there was someinto their regular winter mold, some to the present Highway Department of thing very much alive in that pocket.

"I remember one little-rebellion that being pushed forward with dispatch, the critter would get out, and I could hear began hot and roaring, and died down first coating of three and a half inches stifled noises from the depths of the into a laugh all round, thanks to an being already laid to near Crewsons pocket that made me suspicious. The ingenious old soul, all quiet good nature Corners. The beauty of this new road- lieutenant heard them, too, for twice he and fat. We called him 'Uncle Bam.' way is not alone its superior type of conturned round and looked flerce enough find the fire nearly out, and nothing traffic by annoying detours. Fifteen ready for supper. We were all hungry and grouchy, as sometimes happens in motorists are permitted to drive over it enough to screech, 'Cut' cu-!' Piper he the best-regulated crews. Each in turn and proceed on their way. When the squelched the second 'cut'-cut it in two, declared he wouldn't be cook, and it first conting is completed to Rockwood, you might say; but the lieutenant heard looked like a supperless night, till Uncle the builders will return to Acton and something, and he looked round, and put on the finishing coating. "'What a fuss about cooking! Why. it's the easiest thing in nature to get

supper. Now, boys, if you'll all wait on They all agreed. This being settled, Uncle Sam sat down on a spruce chair, and let his assistants have it.

"'Now, Dick,' said he, 'the first thing for you to do is to fetch a little wood, and start up the fire. "'Ike, just step down to the brook, and bring a pail of water. " You, Mac, while the fire is getting under way, wash a few potatoes and get 'em ready to put on when the pot bolls.

trance pillars, nor your wings onto the when he saw what had happened, he "Now, Jake, you cut a few slices of curling rink, over near the old Drill Hall. pork, and put them on over the fire to gether, 'you were to get supper!' "'Yes,' says he, culm and casy as ever,

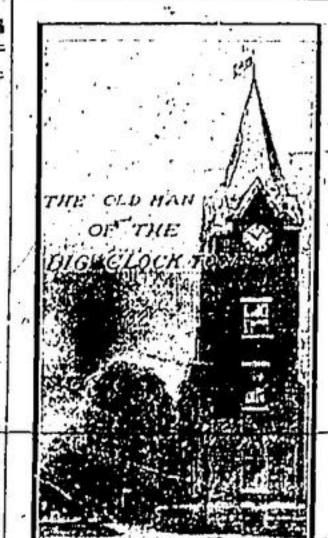

'I was to get supper, but you were to wait upon me. 'Tom,' said he, 'you'd "We kicked some, but it was no use; good idea. It starts to from Main Street. we'd agreed to wait on Sam if he'd be about fifty yards below the rallway crossing which you used to make the objective point for your evening parade with per, there the old man sat, still in his

spruce chair. He hadn't stirred an moh! Your best girl, in the good old summer " Gracious me, he said, here I have corner of James Cameron's front field supper tendy, and it was one of the and the orchard where those luscious casiest things in the world." harvest apples, which you and I tested "We were caught," smiled the old so often, grew so abundantly. Say, do himberman, "and we sat down to supper in good temper. Ever afterward we had you remember how popular the Cameron gists where when the apples and pears Uncle Sam's proposition for a by-word; were in good condition in the fall? It we'd agreed to do any living tiring, provided we could be waited upon. - Edwin was no trouble for them to have boys to see, them home those nights. A visit to
