Scientifically Designed **Balloon Tire Tread**

The Firestone tread was not designed with large, massive projections for appearance or to make plausible sales argument. On the contrary, the projections of the cross-and-square tread are small and the rider strips narrow, permitting the tread to yield to irregularities and cling to the road, giving the greatest non-skid surface. By means of the exclusive Firestone Gum-Dipping process every fibre of every cord is saturated and insu-

lated with rubber, to withstand the extra flexing of the Firestone tread.
