Advertised Goods Are Lower

ADVERTISING turns over stocks rapidly, and therefore multiplies profits. This means that prices in a shop which adverlises can be short rather than long.

Of this you may be sure: Prices in a shop which advertises are not MORE than in a shop which does not advertise. The chances are that they are oftentimes lower.

This, also is generally true: You will find better goods, better values and better service in those shops which turn over their stocks rapidly. This means, as a general thing, shops which advertise.

A Note to Merchants

Advertising costs you nothing-it is paid for by the profits on increased sales.

Advertising is easy-it is simply saying in writing what you say to the customers in your shop. Turn over stocks quickly, if you would make more money.

Read the Ads--Then Shop
