acts are grown And as noture has ordained it, we will reap as we have sown. Bow a smile and reap a smile and in the end you'll find That nothing g...ns more victories than the art of being kind.

Chronicles of Ginger Farm

Written Specially for The Free Press by JUDY O'GRADY

Pamily gatherings, holiday celebrations, re-unions, haying, hoeing, actiffling and whoopingcough seem to be the order of the day just now and we have been sampling each in turn. The three first mentioned are very enjoyable at the time but it almost seems one day holiday means two days to get over it. Is there town celebrations? They are very brave and praise-worthy in their endeavor to make the most of everything-sometimes one hears jeering comments from outsidcra but we who have left the little hometown take infinite pleasure in returning for some special occasion, knowing very well that many of our old friends and schoolmates will be doing precisely the same thing and we shall have the opportunity of renewing old friendships and acquaintances. Thus it is that these occasions are never really failures-it may rain from beginning to end, old 801 by his absence may do his best to quench our arder but we dely the elements on every occasion-home and friendships ties are indestructible. The children are a study, "I'll sit by him; and the minute I in themselves. Eager, excited little faces see he's out of bread, I'll pass the plate," of delight as they mount their horses on ! the merry-go-round, sighs of regret as they stop and then trip back to Dad to make another appeal to his generosity. n.used Mary, who was thinking of the

gone the way that those things niways had saved to help keep him in his old do and weary little toddlers fall fair asleep on Mother's lab as Daddy crives what a dear girl Jim married. The Who lived with a married diagnostic what a dear girl Jim married. The Folling away, summer and winter, all children may be a little cantankerous, those years, he had never let his mother Mother a little tired and Dad has a those years, he had never let his mother feel herself a burden. everyone feels it was all worth while "if he doesn't find out we're going to and after another night's rest they slip have chicken." back into the ordinary routine of life enriched by sympathetic association with the practical Mary.

Haying is in full swing and as usual, announced Julia. grumblers but still you know when city accept Mrs. Bancroft's invitation. people are sunning themselves happily in "Now, I am going to ring for the a prolonged dry spell farmers are dollars maid to serve tea," she told the Banout of pocket so really you cannot be sur- croft girls. prised if they do not answer amisbly to While the maid was pouring the tea. repeated exclamations upon the beauti- Mary remarked, "We heard that your ful weather. Truly, one man's meat is mother lived in Casper County."

BALL and ROLLER Bearings

Reduces Friction and Makes for Ease of Operation

absorbers

so to so miles per sallon

Shalterproof place windshield

Theft proof ignition lock

Relability and low upkerp

AVISH use of ball and roller bearings in the Ford car greatly reduce friction and contribute to easier operation and longer life of the car. Note the coasting ability of the Ford car as compared to any other automobile in its weight class.

Examination of the chassis will at once show the advantages of these bearings. On the rear axle pinion and differential all the taper roller hearings are held to such close limits that adjustment is unnecessary, pinion and ring gear atways being held in proper

Spiral roller bearings are used in the rear hub because of their large bearing surface and ability to carry heavy loads. One is also used on the drive shaft at the universal joint end, to assure perfect alignment. Taper:roller bearings in the front wheels have a simple adjust-

ment. Roller thrust bearings on the spintile bolts make for easy steering. Two bearings, one above and one below, take up the thrust on the steering worm. The fan shaft operates on a roller bearing. The generator, the transmission, the connection between the spline and drive shafts, the clutch, the flywheel-all these important parts are

made more efficient and enduring through the use of ball and roller bearings. These-bearings form a striking illustration of the engineering

skill and care used in building the Ford car. Arrange for your demonstration ride with (the neavest Ford Dealer
