Professor Winslow, of Yale University atules that 20% of all deaths in the United States Registration Area could be postponed. An analysis of Ontario

statistics shows that in this province 34% of all deaths could be postponed. And analysis is that of competent health officials. meet has death leaning affectionately salads appear upon your table more over his shoulder. Such waste would not often, and cut down a bit on those heavy

If one person in every three was killed ahead of his time in a railway crossing ! of expense. But our one-out-of-three loss is not so dramatic as that. It is brought about by the stealthy ravages of diseases, and therefore it-ian't noticed. For people have not yet learned that many of the diseases that kill their chil-

dren, their husbands and wives, and friends, could be prevented. An inconceivable amount of alckness and premature death could be eliminated If people could be induced to get theroughly examined, regularly, by their physicians. There is an enermous amount of incipient diseases of many types which, being neglected in early stages, result in serious disability demanding haspital care and often resulting in death.

One of our leading public health authorities nayn: "Bickness costs Canada over \$311,000,000 annually. The loss of future earnings through premature death is conservatively estimated at one billion dollars a year." Dinhtheria kills 1,200 Canadians every year, while 12,300 other Canadians suffer from this discuse but recover.

Yet aclence offers you a toxold treatment to make you and your children immune to dinhtheria. This disease is a stricken 12,300 during the next twolve months-or possibly among the doomer Typhold Pover killed 1,100 people in

Canada in 1027. Yet typhold fever is absolutely preventable, by means within the reach of overyone. Tuberculosis -- 8,000 people died of can absolutely eliminate it with adequate Cancer-Early treatment (which is assured to anyone taking the trouble to

physical examination) guarantees success curing cancer, in many cases. Veneral Diseases The organized and successful attack that this country is making upon venereal diseases is an utterly convincing proof of the progress that can be made in disease-control when all forces of the state combine in a necomary undertaking.

A PROPILET OF PROGRESS

Dishon Clark, lecturing in Cambridge, England, prophesied strange things to huppen "fifty years hence." Now after moventy-five years It is interesting to read his words and consider how fur they have been fulfilled:

A strange fact about the medical men of England is that they don't care to se called by their professional litles. Except on official occasions, says the Argonaut, an English medical man had rather you called him "mister" than "doctor." A Harley specialist of great renown was golfing one morning when an anqualitance shouted to him cheerily across the links: 'Klood morning, doc-

The specialist shoulded back in a gruff voice: "Good morning, wholesale dealer In twots and shocal"

PLOWING SUMMER-VALLOW

How deep should summer-fallow by plowed? . # THE BOY BEHIND THE BISCUIT

Ever see a boy behind a Shredded Wheat Biscuit? You will have to look quick before the biscuit disappearsbut wait and you will see him take another biscuit-and more milk. The more he chews the crisp shreds of baked whole wheat, the more he likes it—and that's the reason he is a real boy, full of bounding energy and radiant health. Just as good for grown-ups. Delicious with prunes, baked apples, sliced bananas or any fruit.
