Colorado, and a road built not so Mrs. Procw, who lived across the road, long ago from Denver toward Salt Lake a hoy of 14 and a girl 12, has for some thirty years ago, engineers said no road-

This road crosses the main range at suggested that Koval resented her coming an altitude of 11,600 feet. This imto the house and tempting his wife to pressive climb is effected only by the most tortuous windings and numerous It would appear that Koval had made tunnels. At one point, Bow Knot, the engrossed us all these years. And what up his mind to do away with himself, train plunges through a tunnel, makes

At another point the train "loops the thing which was not quite usual, and lake." It swings round a tiny body of so doing, it describes a complete circle ally before he had accomplished his It then climbs up and up and makes another curve, and climbs again, enabling one to stand at the lake and count three tiers of tracks above him.

When the Denver and Rio Grande road company prepared to build through the Rockies, engineers contended that the canon of the Arkansas could never be penetrated in its entire length. There was one spot in this awe-inspiring chasm where there was not room for a roadbed on either side of the stream. The walls of the canon came down to the swift current of the Arkansas without foottold for a man on either side. An engineer suggested a hunging bridge auspended between the walls of the canon. The bridge was bullt with supports embedded in the solld rock, and across it the heavy transcontinental trains now This letter does not explain the double tit daily, with nothing but the slender D. ROCKERS tragedy. It gives the primary motive iron work between the river and the top
