 At a meeting of the Halton O. F. O. Club held in Milton last Friday, the following resolution was passed: "Whereas it has come to the attention of the Halton O. F. O. that the farmer is compelled to pay \$7.87 per ton f. o. b. wells for No. 1 fine salt in bulk, and the same salt in like quantities is sold to packing houses and manufacturers for \$4.35 per ton f. o. b. wells, and whereas salt being an absolute necessity on every farm for the curing of meats and other products, and for a balanced ration for all live stock, causes the farmer to purchase the major part of this product, and whereas does not himself merchandise salt nor does his industry enter into competition with the manufacturing interests, but rather, provides the raw products for packing houses and other processing plants. Therefore, this Club wishes to put itself on record as being unanimously opposed to this gross discrimination against the farmer, and recommends that a copy of this resolution be forwarded to the proper government officials, with a view to having the condition remedied at once."  
 A wide-spread hopeful disposition is our only true umbrella in this vale of tears.—T. B. Aldrich.

**A TRUE TEST**  
 A true test of friendship; to sit or walk with a friend for an hour in perfect silence without wearing of one another's company.—Mullock.

**STATISTICS AND EXPERIENCE OF THE BEST CANADIAN FARMERS SHOW THAT CROP YIELDS IN CANADA ARE, GENERALLY SPEAKING, VERY MUCH BELOW THE POSSIBLE MAXIMUM.**

**CORN**  
 Corn for ensilage is still of considerable importance on a great many farms in Eastern Canada.

During the season of 1932, the Division of Forage Plants, Central Experimental Farm, Ottawa, conducted a test in which careful comparison was made of a number of corn varieties commonly grown for ensilage in Eastern Canada, in addition to several that are not so commonly grown or so well known. Judged from the standpoint of yield, the varieties ranked in the following order:  
 Dents—Wisconsin No. 7, Golden Glow, Leaming and Bailey.  
 Flints—Comptons Early, Longfellow, and Salzer's North Dakota.  
 All varieties were cut, at the same stage of maturity, the "late dough" stage, and were presumably equal in quality. Wisconsin No. 7 yielded as well as Golden Glow, Leaming and Bailey and since the flints were harvested one week earlier than the dents this variety should be given the preference in districts where the season is somewhat short for using the dent varieties.

The main difference between dent and flint varieties for ensilage purposes (apart from yield) is in the production of suckers, very little, if at all.  
 Corn—for grain is not of very great importance in Eastern Canada, except in southwestern Ontario, where the standard varieties for grain are those already discussed for ensilage purposes.  
 In addition to the ensilage test mentioned above, a test was also conducted at Ottawa to determine the best varieties of corn for grain production in districts in Eastern Canada with conditions similar to those prevailing at Ottawa.  
 The varieties, Quebec No. 28 (a 12-rowed flint) and Twichell's Pride (an 8-rowed flint) gave the best results in this test, both of them being quite outstanding in both yield and maturity.

**FRIENDSHIP AND SACRIFICE**  
 You cannot make a success out of selfish contacts. If two people make an alliance each with the idea of getting out of it everything for himself, the association is doomed from the start, and never deserves the name of friendship. In every true friendship, those most concerned are ready to make sacrifices. To each his friend's welfare is as important as his own.  
 There is, in this day, an undue emphasis on self-interest. It is even regarded as a mark of weakness to think too much about the other fellow. When that theory prevails, real friendship is impossible. You cannot be a friend unless you are willing to sacrifice for those to whom you have given your friendship.

**SAY WHAT YOU THINK**  
 In nine cases out of ten, when you are asked what you think on a subject, your first impulse is to say that which you think your questioner would like to hear. It takes considerable courage if you are asked if a hat is becoming or what you think of a new radio, to say anything that is not reassuring. In such cases, indeed, there is no excuse for brutal frankness; but it is a different matter when your advice is asked. Even if it is clear that the one who asks advice wants his own opinion confirmed, you have no right to be anything but sincere.  
 In the long run it pays to say that which you imagine somebody wants you to say. For the time being it may add to your popularity to conform your answer to fit another's preference, but as time goes on, the people whose opinions are valued are the ones who say that which they mean and mean that which they say.

**Re Acton Welfare Board**

At the meeting of Acton Welfare Board last Thursday evening, it was considered that the need of relief distribution in Acton was practically finished for the season and, in accordance with the instructions of the Committee a summarized statement will be furnished when the April and May accounts are received and paid.

**Prepare for Next Winter!**

At this season of the year every individual is urged to make preparation for the needs of next winter, as relief distribution from all sources will, no doubt, be much reduced. If you cannot secure employment, make work for yourself by securing land. Seeds will be supplied free of charge to all who are not in a position to pay for same. Apply to R. J. McPherson, Chief of Police, for seeds.

The whole-hearted co-operation of all citizens by contributions and moral support of the Committee in their work has been greatly appreciated and has been the deciding factor in the successful administration of relief.
