Acton Wins and Loses This Week

(Continued from Page One)

to first, and the hits just seemed to be out of his reach. He decided he had had enough in the eighth and White went in to replace him. However, it was just an off day, and everybody has them. Even though the fans seemed a little peeved, they will soon get over it. So let's see you out there again, Huffie, doing your best. Elliott was the umpire again, but it is the last we will see of him. We understand that at a meeting of the League Executive on Monday it was decided to let him go. Robinson from Toronto is to take his place. The game Oakville was to play in Georgetown last Thursday night was forfeited to Georgetown, as Oakville did not show up. The Big Town (?) must figure they are far enough ahead to throw a game. "Mebbe so! Mebbe so!" Only time will tell. Acton plays at Oakville on Saturday, and if they lose it will be just about curtains for them. This game means a lot, so let's go and give them some support. In one of the fastest games played around here for some time, Acton beat Milton last night, by the score of 2-0. It was a wonderful game to watch, and lasted just a little over an hour. N. Morton and Marsh were the pitchers, and Morton proved a little better than "Barney". He kept the Milton hits well scattered and, in only one inning allowed them more than one. Acton managed to bunch their hits off Marsh, and had three safeties and one run in each of the third and sixth innings. Acton proved very strong in the pinches and brilliant fielding stopped any chance that Milton had of scoring. Milton had men as far as third base in four out of the seven innings, but they were all left stranded. They looked as if they were going to score in the fourth, when they got two hits in a row, with none out, but the next three men were retired in order. Morton did not have as many strike-outs as Marsh, but the best Milton could do in the pinches was to pop out or hit to the Acton infield, who were stopping everything. Bill Waterhouse saved the day in the last inning when he made a sensational catch of Little's drive that was labelled a home run from the time it left the bat. There was a man on base at the time, and it would have tied the score. He also made another beautiful running catch behind second base in the fourth. Acton's hits were confined to three innings. They got one in the first, and managed to bunch three in the third, for one run, although there should have been two. Bill Waterhouse smacked one clean over the fence, but it hit the building alongside, and bounced back on the race track, and only went for a double. Then, in the sixth, Acton got three more clean singles, to score one more run. Milton threatened in the seventh, and had the tying runs on base, but Ken Clements, who was put in to pinch hit, popped a foul fly to Holloway to finish the game. MILTON AB R H PO A E W. Clements, Marsh, Brush; struck out by Marsh 6, by Morton 2; walked, by Morton 1; double play, Toletzka to A. Clements; left on bases, Milton 6, Acton 2. Score by innings: P H E Milton 000 000 0-0 6 0 Acton 001 001 -2 7 2 Umpire—Robinson, Toronto. NOTES Well, three more games to play. Acton has to take them all to get a play-off berth. Can they do it? If they play like they did last night, there is nothing in the League will stop them. The fielding was a treat to watch, with everyone being right on their toes. Milton also played heads up ball all the way, but Acton managed to bunch their hits, with men on bases. Bill Waterhouse put the game in the bag for Acton. He pulled off a wonderful catch in the fourth, behind second base, and robbed Little of a home run in the seventh, with the tying runs on

PARIS AS AN OCEAN PORT

Paris has become the leading port of France and one of the world's chief seaports—so far as shipping tonnage handled is concerned. The greatest proportion of this shipping is of course, that of the barges which come down the Seine or through the inland canal system of France, but many of the small ocean-going steamers now have their terminal docks in Paris. Statistics just issued showed that for 1932 shipping to the port of Paris totalled over 16,000,000 tons, while that of Rouen was 11,000,000, Marseilles 9,000,000, LeHavre 5,000,000, Dunkirk 5,000,000, Bordeaux 4,500,000 and Strasbourg 4,500,000. The Paris shipping, therefore, it is claimed, equals that of Shanghai, and for Europe comes only after London, Rotterdam, Hamburg and Antwerp. Since the war the port of Paris has developed by the construction of several canals and basins for shipping, and by important dredging operations which, according to plans in progress, will provide a depth of four and a half metres along the entire length of the Seine from Rouen to Paris.

WORLD'S BIGGEST NOSE

The huge cavities in the skull of the sperm whale, which seem like tanks for storing the valuable spermaceti oil of commerce, have only recently been recognized as the creature's nostrils! This huge nose is six times as big as the whale's brain-case, and a whale with a head 17 feet long and 6 feet high will have a nose 10 feet long and 5 feet high; and a big whale may have as much as 500 gallons of oil in its nose! Through the bones, fat, oil, and connective tissue of this vast organ run the nasal passages, the right and larger one capacious enough to admit a man. This can be expanded; and has a much smaller aperture leading into the windpipe funnel than the left passage and it has recently been ascertained that these passages to the throat can be closed by two enormous plugs, which function exactly like the stopper in a bath or washbasin. This unique control of its breathing apparatus enables the whale to "hold its breath" when it dives to a depth of a mile, and also prevents the tremendous pressure at that depth from forcing the air out of the whale's lungs.

INCOME TAX IN CANADA

Canada adopted the Income Tax as a part of its fiscal policy in 1917, and since that time there has been collected out of the profits of the people residing and carrying on business in Canada well over one billion dollars. During the past sixteen years collections have averaged more than \$50,000,000. In the fiscal year just closed over \$61,000,000 has been collected, and during the year prior to that over \$62,000,000. The average shows the remarkably stable conditions of the revenue-producing assets and working capital in Canada. The peak taxation rate was reached in 1919. The average cost of collecting Canada's Income Tax since its inception has been 2.9 per cent of the amount collected, or in other words it costs less than 3 cents to collect one dollar.

BEECHER'S READINESS

Henry Ward Beecher, the famous American minister, would constantly open letters addressed to him at his church during the service. The contents, he would read out to his congregation, often basing his discourse upon them. One day, he opened a letter in front of the worshippers, and found that it only contained the word "Fool." He read it out, as was his custom; remarking afterwards, "I've often known a man to write a letter and forget to sign his name; but this is the only instance I have ever known of a man signing his name and forgetting to write the letter."

HAPPINESS

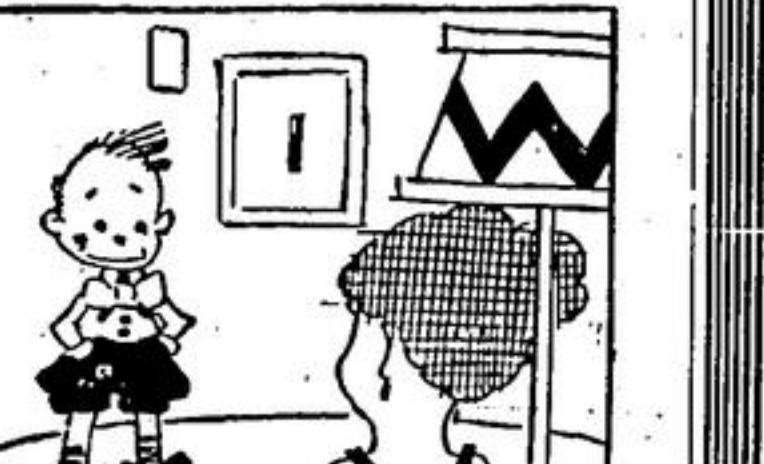

"I think we could be very happy together." "But do you think we could be as happy as we could apart?"

IDEALS

Willie (reading financial page)—I fear we are losing our ideals in the mad rush for wealth. Elsie—Oh, I don't know. Have you noticed the mad rush for the ball park when there is a game on?

LET HIM WAIT

Bobby—Mr. Jones is waiting outside. Big Sister—Well, tell him to keep waiting. He told me last night he would wait a lifetime for me.

WHAT MISSILE?

Mrs. Joax—Here's an account of a mysterious disappearance. A woman misses her husband. Mr. Joax—What did she throw at him?

NO BRAINS

She—Dad said you had more money than brains. He—Good joke, I'm broke, ha, ha. She—Oh, yes, he added that, too.

In the realm of home management and in individual buying in general the advertisements act as a market guide... a guide not only as to where to buy and what price to pay, but often as a guide as to what to buy. Many things that make life more enjoyable and comfortable are first discovered in the ads., and then later repurchased through the ads. Many things that save on the family budget are discovered when the home maker has learned to find the news of what's new by watching the advertisements.
