Quality and Cleanliness Our Motto PROMPT DELIVERY

PRESENTATION .TO MR. AND MRS. WINTERS AT ST. ALBAN'S

On Monday evening friends of St. Albans gathered at the Parish Hall, where it had been arranged to spend a social evening with Mr. and Mrs. J. Winters, prior to their departure for England. A purse was presented to this. couple by their friends they have made during their residence here. The following address expressed the good wishes and esteem for Mr. and Mrs. Winters and it carried over fifty signatures. Mrs. Harry Smethurst and Mrs. E. Rooker made the presentation on behalf of the gathering.

> Acton, Ontario March 28th, 1938

To Mr. and Mrs. Winters: Dear Friends and Fellow Citizens: It is with regret and pleasure that we meet you now to say "Good Bye." The regret comes through having to lose you from our Church and Town and the pleasure with the knowledge

that the move you are making is for

the benefit of yourselves and family. We are glad that you can see ahead of you better times. So many of us, just now, are wondering how going to change for the better and it brightens us all when we see someone who has prospects of a future

with a little less worry. Please remember that these lines come to you from friends and neighbors in your own station of life, who are glad to be able to testify to your fine traits of character, your integrity and helpful living.

We hope the old boat that carries you to the dear old homeland will not rock or pitch too much and that the sea will be very kind.

We shall always cherish the memory of having had you among us for so many years and hope that your memories of the 23 or 24 years of your life you have spent in Acton will have many pleasant thoughts to bring to you.

With Spring coming on you will

be able to visit some of the fine seaside resorts and splash around in the ocean. Or perhaps you would prefer the country lanes and scented gardens of old Devon or the hop fields of Kent, Whatever you find yourselves able

to do we hope it will prove to be a blessing to you both. We hope you will find something to do-a job that will put some butter on your bread. Now, before we come to the end of this epistle we want to say some-

thing that you will gratify us by accepting this gift. It is presented by your many friends as a slight token of the high esteem in which you are held by the people of this sweet little town of Acton. We are sure that you regret leaving it just as much as we are corry to see you go. There is a verse of a hymn which we sometimes like to sing "With friends on earth we meet in

gladness How sweet the moments fly But often comes the thought of sad-

When we must say "Good-bye." We'll never say Good-bye in Heaven We'll never my Good-bye. In that fair land of joy and love

We'll never any Good-bye. We shall ask you to look some times at the pictures which are on the covers of this little effort of ours and when you look always remember that there are always those here who will be wishing the best for you. And, oh yes, if at any time you find it to your advantage to come back to this Canada of ours, don't be afraid to come and some of us will be left here to give you a right royal "Welcome Home"

May God go with you always

Mr and Mrs Winters expressed preciation for the thoughtfulness of these friends and of the many happy associations that would be remembered of Acton in their home in England.

A very enjoyable social evening concluded this farewell party

Neighbora and friends on Young Street also made a presentation of a purse to Mr. and Mrs. Winters on Tuesday evening, and sent with it best wishes for auccess on the journey to England and in the new home there

EGG-WHITE HELPS CURE

British scientists have found a new means of combatting haemophilis, or excrashe bleeding, the disease from which the Count of Covadonga, the former Prince of the Asturias is a sufferer Even minor operations or tooth extractions are apt to be fatal, they say The new antidote is the result of an accidental discovery by Dr. W. A. Timperley, of Sheffield, England, that a substance derived from egg-white will make blood clot more easily. He underwent injections to prove it harmless, and experiments were performed on rats and human volunteers tefore haemophiliacs were treated Great success has been attained in cases where the slightest knock used to cause hemorrhage. It is emphasized that the remedy is not a
