

Personals

Miss Liane Stone is spending the week at Lansing.

Master James Ellis is holidaying with relatives in Toronto.

Mrs. and Mrs. O. H. Brown spent the week-end in Toronto.

Miss Frances Kierney is visiting this week at Point George.

Mr. H. Barwick spent most of last week with his daughter, in Kitchener.

Miss Audrey Chalmers is visiting at the home of her brother at Wingham.

Mr. Wellington Hall, of Toronto, spent the week-end with Acton friends.

Mr. and Mrs. Gordon Hayward, of Toronto, are visiting Acton relatives and friends.

Miss Audrey MacArthur has returned from attending the C.O.L.T. Camp at Lewville.

Mr. Joe Kaley, of Hamilton, is visiting with his sister, Mrs. E. Phillips and Mrs. F. McMillan.

Mr. and Mrs. O. H. Harrison, of Toronto, called on Acton relatives and friends yesterday.

Mrs. L. P. Snyder and Miss Daley Snyder, of Montreal, visited at Moorecroft on Monday.

Mrs. Emily Thompson and Miss Marjorie visited with Mr. and Mrs. N. F. Moore on Saturday.

Mrs. J. B. McLeod and Jamie, of Kingston, are visiting with her parents, Mr. and Mrs. Bert Mason.

Mrs. Prudence Cook, of Toronto, spent holidays with friends in Acton and vicinity the past couple of weeks.

Mrs. William Kaley and Gloria, of Barrie, are visiting at the home of her parents, Mr. and Mrs. J. Massey.

Mr. John Nicol, Misses Marian and May and Andrew, spent several days last week on a vacation at Wasaga Beach.

Dr. and Mrs. J. O. Lindsay, Misses Jean and Anna Lindsay, of Toronto, spent the week-end at their home here.

Miss Dorothy Ellison, of Toronto, has returned home after spending several days with Mr. Darwin Cripps and family.

Mr. and Mrs. Francis Wilson, of the Phillippe Islands, visited at the home of Mr. and Mrs. N. F. Moore on Tuesday.

Mr. and Mrs. Aubrey Allan, of Detroit, returned on Saturday after spending holidays with Acton relatives and friends.

Mrs. Chas. Steele and Nellie, Detroit, Mich., are spending the week with Mr. and Mrs. A. Farry and Mr. and Mrs. John Lightle.

Mr. and Mrs. Harold Reed and Wallace, of Regina, Saskatchewan, are visiting at the home of his parents, Mr. and Mrs. J. H. Reed.

Mr. and Mrs. E. O. Roadknight and family, of Niagara Falls, are visiting the former's parents, Mr. and Mrs. E. O. Roadknight, Arthur Street.

Miss Beadie Ross, of Toronto, who has been visiting at the home of Mr. and Mrs. Charles Landborough for ten days, returned to Toronto on Sunday.

Mrs. W. D. Wallace, of London, Ontario, returned via the "Duchess of Richmond" from a two months' holiday in Scotland, and a visit to the Exposition in Glasgow.

Mrs. John Scott, Shelburne; Mr. J. D. Watson, Toronto; Mr. W. George Watson, Winnipeg, Man., visited a few days with their brother, Thos. Watson, and Mrs. Watson.

Mrs. George Woods, Mr. George Louth and children, Mr. and Mrs. Fred Stuckey and little daughter, Joann were visiting in Durham for the week-end. Violet and George Louth are staying up on the farm for a couple of weeks.

Mr. and Mrs. Hugh McCutcheon, Mr. and Mrs. Fred Denny and Lucy, Mr. and Mrs. Everett Denny, Mr. and Mrs. J. J. Stewart and Jack had a very enjoyable motor trip to North Bay and through the Muskoka district last week.

Mrs. F. S. Selwood, of Calgary, who has been making an extended visit with her mother, Mrs. A. E. Nicklin, also visiting relatives and friends in Ontario and New York, left Monday evening for her home in the West. En route home she will visit her sister, Mrs. T. K. McCallum, in Saskatoon.

Voters' List, 1938

MUNICIPALITY OF THE
VILLAGE OF ACTON
IN THE COUNTY OF HALTON

Notice is hereby given that I have compiled with Section 9 of the Voters' List Act, and that I have posted up at my office in Acton, Ontario, on the 18th day of July, 1938, the list of all persons entitled to vote in the said Municipality for members of Parliament, for members of the Legislative Assembly of the Province, and for Municipal Elections; and that such list remains there for inspection.

And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law, the last day for appeal being the 8th day of August, 1938.

O. F. LEATHERLAND,
Clerk of the Village of Acton.

The Bannockburn Institute Honor Mrs. Wiley

Bannockburn Women's Institute met at the home of Mrs. Stanley Swackhamer on Wednesday, July 20th, with a good attendance. The President, Mrs. W. Harding, was in the chair.

Following opening exercises, roll call was answered by "Where I Started to School and Name of First Teacher." It was decided to have a booth at the School Fair, which is to be held at Bannockburn School in September. Current events were read by Miss Margaret Swackhamer, and an historical research of Churchill was given by Miss Edna M. Russell, and a reading by Mrs. F. Kerr, "A Wedding Slightly Mixed." Another paper, by Mrs. J. McLean, on Woodside School, was given.

Mrs. S. Morrison read the following address:

Dear Mrs. Wiley:
It is with deep regret that we, the members of Bannockburn Women's Institute, find ourselves minus one of our oldest and most faithful members this year. You, Mrs. Wiley, are always so cheerful. It was a pleasure to see you at the meeting. You have always taken such an interest in the Institute work and have given your best of time and energy toward making this branch a success.

During your terms as President you gave very capable leadership, and as Secretary, none could be better. When in need of a neighbor's help in any way, one always knew where to go, to Mrs. Wiley. No matter how busy you were, you always had time for your friends and neighbors.

Mrs. Wiley, as an expression of our best wishes for you in your new surroundings, and also our hopes of seeing you back with us, we would ask you to accept this small token of remembrance.

Signed on behalf of the Bannockburn Women's Institute,
MRS. W. HARDING,
MRS. RUSSELL,
MRS. D. D. MORRISON,
MRS. McDONALD,
MRS. A. CRUE.

Mrs. Russell presented Mrs. Wiley with a silver tea service. Mrs. Wiley thanked the ladies with a few well-chosen words and invited them all to come and have a cup of tea with her in Georgetown.

A hearty vote of thanks was tendered to the hostess and the meeting closed with the National Anthem. A delightful lunch and social hour was enjoyed.

HOUSE FLY WORST CARRIER OF DISEASE

A serious menace to health and a nuisance of the first order is the charge fly. This is especially true in the warm months, from mid-summer to autumn, when it reaches its greatest abundance. It is a menace to health because it breeds in garbage, manure and human faeces, and may pass directly from filth and other infested matter to foodstuffs. Particles of decomposing organic matter, bacteria and other living organisms adhere to its hairy body and legs, and sticky feet and mouth-parts, or may be conveyed to food in its excreta and saliva. One fly may carry as many as 1,000,000 germs.

The house fly, known to scientists as *Musca domestica*, is world-wide in distribution and notorious for the part it plays in the dissemination of dangerous diseases, such as infantile diarrhoea, tuberculosis, typhoid, cholera and dysentery. It also serves as the intermediate host of certain species of roundworms that infest the stomachs of horses, and of tapeworms that occur in poultry. In Canada, the house fly is probably the most important insect species concerned in disease transmission. On this account it is very essential that measures be taken to control it and to prevent it from having access to human foods.

Methods of Control

The most effective method of controlling house flies consists of eliminating or reducing their breeding places by properly treating or disposing of manure and garbage. Fresh horse manure is probably chiefly responsible for the majority of flies in rural sections. It has been estimated that more than a million flies may develop from one ton of manure. In the cities, garbage is an important factor in production. To be fully effective, control measures should be organized on a community basis, as one neglected manure heap or garbage dump may infest a whole neighborhood. Collections of manure should be removed from city stables and disposed of at least twice weekly. In rural sections, where practicable, the manure should be removed daily and spread thinly in fields where the drying effect of sun and wind will prevent breeding. An alternate method consists of taking advantage of heat produced by fermentation when manure is placed in tightly packed piles. The manure pile should be constructed on hard ground or concrete. The sides of the pile should be clean cut and almost vertical, but sloping slightly towards the centre. As fresh manure is added to the pile it should be tightly packed by means of a shovel. The heat produced by fermentation destroys all fly eggs, larvae and pupae, except possibly those close to the surface of the top layer. The application with a watering can or sprayer of a solution of borax consisting of 1 pound of borax in 5 gallons of water will destroy any fly stages in the top layer.

PRESENTATION AT WOODSIDE HONORS BRIDE AND GROOM

Woodside School was the scene of a pleasant surprise party and presentation when a large number of friends and neighbors gathered together to congratulate and honor Mrs. Jack Smethurst (nee Vera McEchern) and her husband. The meeting was called to order and the chairman for the evening was Mr. Stanley Swackhamer. A short program followed, in which Mrs. Smethurst played a piano solo; the Swindichurst brothers gave an instrumental; a guitar solo by Frank Burgess; a stop dance by Wilfred McIntyre; and a piano solo by Rhea Burgess, and community singing. Miss Beattie Spear read the following address:

"Dear Vera and Jack:
It is with mingled feelings, both of joy and regret, that we, your friends of this community, gather in this hour of your happiness. There is joy for your joy, and the thought that after all this is not any sad and prolonged parting.

Our regret is that you are going so far away from us. You will be missed in this immediate vicinity more than you know, where you have lived all your lives. You have become so much a part-of-our community that your going is leaving a gap that will be hard to fill. With your cheery dispositions, kind words and smiles, and readiness to help wherever needed, you have endeared yourselves to all.

May you know in your new life, with its added responsibilities, as well as joys, that the good wishes and prayers of your friends here are that the smile and blessing of God may be upon you and that your lives may be an example for those with whom you associate.

Wishing to express our love and esteem in some tangible way, we ask you to accept these gifts.

Unitedly we wish you much joy and prosperity in the years that are to come.

Signed on behalf of friends and neighbors,
Following this address, Miss Margaret Swackhamer and Miss Viola Spear presented them with a beautiful miscellaneous shower. Mr. and Mrs. Smethurst replied in a very fitting manner, thanking their many friends for their beautiful and useful gifts. After a lunch was served, the remainder of the evening was spent in dancing.

CANADIAN MINING DISPLAY AT GLASGOW EXHIBITION

Canada's importance as a producer of the metals that are widely used in industry and commerce is reflected in the display of Canadian mining specimens being staged by the Department of Mines and Resources, Ottawa, at the Empire Exhibition, now in progress at Glasgow, Scotland.

Visitors to the mineral exhibit in the Canadian Pavilion cannot help but be impressed by the diversity and scope of Canada's mining industry. The central feature of the display is a large map of Canada showing the six well-known physiographic areas or divisions, the location of commercial occurrences of metallic and non-metallic minerals, the geographic positions of refineries and steel plants, and railway and aerial transportation routes. On both sides of the map, is a collection of colored photographs of typical metallurgical and milling plants erected for the recovery of the various metal and mineral products. The next important feature is a display of large specimens of ores and minerals representative of the more important deposits that are being commercially developed in Canada. These specimens include the ores of gold, copper, silver, radium, nickel, lead, and zinc; asbestos, gypsum, limestone and other non-metals. A series of panels adjacent to the specimens show in tabulated form the value and importance of the products from the different ores.

Canada's position in the British Empire as a source of minerals is an enviable one; she is the only producer of radium, the second largest producer of nickel, zinc, lead, copper, and asbestos.

Cover Garbage Then Burn It

All organic refuse such as household garbage should be wrapped in paper and stored in fly-proof garbage cans until finally disposed of by burning. The accumulating of garbage in municipal dumps during the warm months of the year is undesirable, as such dumps produce enormous numbers of flies as well as other vermin, and many constitute a serious public nuisance. The only satisfactory way of disposing of garbage during the fly season is by incineration.

Every effort should be taken to exclude flies from dwellings. The screening of doors and windows very useful in this regard. Flies that find their way into the house should be promptly destroyed. Fly swatters, sticky fly paper, poisoned fly pads, poisoned bait made by mixing one teaspoonful of formalin in a cupful of sweetened milk or water, and exposing it to saucers (out of the reach of children or pets) are included among the various means of doing this.

The Rhyme to Solve for This Week

By W. COLES
"OLD SOLDIER'S NEVER DIE"

My first you will find in returned,
My second in scorched, not in burned;
My third in a regular jamboree,
My fourth in a spot, but not in a spree;
My fifth not in twist, but in turned,
My sixth is in every city and town;
My last not in black, but always in brown.

My whole you will know as soon as you find it,
With soldiers inside, before and behind it,
And some will be up and some down.

Band Tattoo Drew Big Crowd on Saturday

(Continued from Page One)

republics of the United States and France.

Perhaps the most impressive part of the whole function was this climax, when, with these flags before the crowd, Prof. Thiele addressed the audience. His remarks were brief, but full of meaning. He explained that the flags in the parade were those of countries under democratic control. In other words, the flags not under dictatorship.

But in the centre, and above all, stood the Red Cross emblem, respected by all civilized nations. Then, as the Galt Boys' Band played, softly, "Nearer My God to Thee," Prof. Thiele continued his remarks. "The Red Cross is the emblem of faith, charity and good will toward men. The Red Cross does its work in war or peace, quietly and without ostentation. We as civilized people revere and respect it."

The final event in this Band Tattoo, arranged by Acton Citizens' Band, was a very good display of fireworks. The booth, operated by the Band, was well patronized. While the event was quite a big undertaking, and may not yield large financial returns for the band treasury, there was general appreciation, and we understand plans are to be started immediately for a bigger and finer event next year.

BUY A FARM

"Buy a farm," or start a business in a small town, Roger Babson told a graduating class of American university students the other day. Mr. Babson went on to explain that times have changed, and the lure of the big cities no longer is the one to be followed.

If many of our present unemployed, and particularly young aggressive men looking fruitlessly for some job in the larger cities, had heeded this advice back in 1931 the depression would not have lasted so long nor would our relief bills have been so high.

It is very doubtful whether the young people of to-day are radically different from their parents or grandparents. Rather, times have changed. No longer is it possible to buy new homes out of free and virgin bush. No longer is it possible to exploit the natural resources in the wasteful ways of the last century. There is less and less room for squatters; less opportunity in the larger cities where competition for work is getting steadily keener.

But new developments have brought new opportunities which are gradually being recognized by such observers as Mr. Babson. These opportunities, however, are not developing in the larger centres of population, but along the highways and in the smaller towns. On the new roads in Ontario there is still ample scope for small businesses such as retailing of gasoline or meats and overnight accommodation, development of summer resorts and roadside markets. Hand in hand with such pursuits would be large gardens or small farms to supplement earnings or to at least defray a large proportion of family costs.

In the smaller towns and villages, too, there is more opportunity to-day for skilled artisans, men who can handle jobs that require and possibly combine a certain amount of carpentry, electrical services, plumbing and masonry. In short, small one-man contracting machinery by farmers surrounding the villages and towns has resulted in a growth for expert repair work.

In nearly every small town in this whole country to-day there is a lack of real high-class handy-men who can repair or build a house, install a bathroom or fix a binder.

FARM BOY, LIKELY

Teacher—Johnny, if five sheep were in a field and one jumped out, how many would be left?
Johnny—There wouldn't be any left; You know arithmetic, but you don't know sheep.

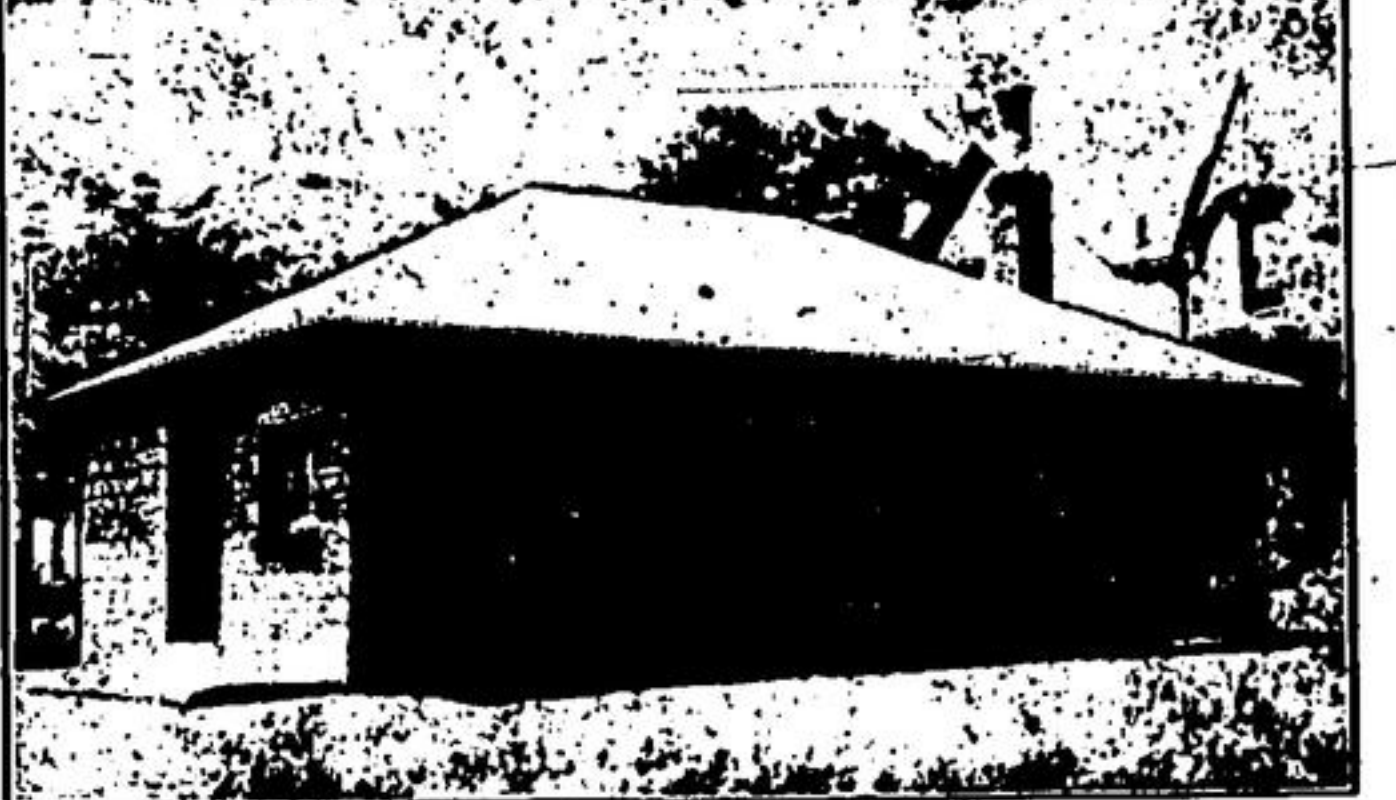

BEAVER FAMILY COMES TO TOWN

Experiences in Canada's National Parks have demonstrated that the beaver, long regarded as an animal which very definitely preferred his own company to that of human beings, is really more sociable with man than has been supposed. The beaver, like the other so-called "wild" animals of Canada, responds to the human friendliness which he finds in the national parks. He is an intelligent animal, very quick to sense danger, but once convinced that humans mean him no harm, he proceeds about his business.

However, this fraternal feeling is not confined solely to the parks. Now comes word from Red Deer, Alberta, that

THE REAL REASON

Daughter—But, Daddy, why do you object to my becoming engaged? Is it because of my youth?
