ROY HINDLEY, Auctioneer.
Phone 1529, Erin. 16-2

Now See if You Can Get This One Solved

It is just a year ago since we gave you a puzzle with the heading "This is Day." This week's puzzle is given you with the same event in mind. Being a year later, we must say "Tomorrow is 'Trifalgar Day'."

Let us think of a hero. My first is in his name. As also is my second. Remember NELSON's fame; My third you'll find there too—and see My fourth in the crew of the VICTORY. In Victory you must see my fifth, My sixth in NELSON. That's quite a little.

Now NELSON holds my seventh? Why not? And eight in that name a place has got; Oh yes, and nine is in there too; But my tenth is in man, but not in the crew. My eleventh in ruffian but not in a loak; My last in the enemy, that received a bad rout.

These lines are of Nelson and his ship, Victory. If you read them correctly, you surely can see That while he fought bravely and the enemy faded, They were not all there. What was it he lacked?

THE COMMON COLD

If the sum total of suffering inconvenience, expense and economic loss from common colds be obtained it would rival into the rank of the serious diseases. The autumn is the time for colds, though they may occur at any time of the year. Many of us have from one to three colds a year. One attack produces little immunity.

Of what does a cold consist? It is a group of acute infections of the mucous lining membranes of the throat and nose, often extending into the windpipe and larger bronchi. The sinuses, that is the hollow spaces adjacent to the nose, are frequently involved. The infection may be confined to the nose when it is called rhinitis, it may affect the throat as in tonsillitis, or be a pharyngitis, the larynx as a laryngitis and the bronchial tubes as a bronchitis.

Cold and draughts.

The popular idea that a cold is due to draughts is scarcely correct. Exposure to draughts, sudden changes of temperature and "chilling of the body" are predisposing causes of colds, but no cold can originate without the specific micro-organism or bug which is the essential cause.

The Cause.

Some say that a common cold is due to a virus that is a germ so small that it cannot be seen under the microscope. Many different germs seem to be associated with colds. Perhaps the cause is a combination of viruses and germs. Common colds may not be a single disease but rather a group of infections which vary in severity and catchability.

Colds are caught from other persons having colds, just as diphtheria is contracted from diphtheria patients. Arctic explorers, exposed to all the conditions popularly supposed to produce colds, do not suffer from these ailments until they return to civilization and become infected by contact with their fellows.

Prevention and Cure.

The two really important matters about colds are first their prevention and second their cure. Prevention may be summed up in the avoidance of those having an infection especially in street cars, offices and other poorly ventilated places. Colds like other diseases conveyed in the secretions from nose and mouth are often transferred by direct and indirect contact through kissing, the common drinking cup, the roller towel, paper toys, pencils, fingers, food and other objects contaminated with the fresh secretions which carry the disease. Ventilated air draughts, dust, sudden changes in temperature, exposure to cold and wet weather, lack of sleep and improper food all have some effect in causing colds. It must be admitted on the other hand that the most vigorous will contract colds if they receive the infection while some persons are so immune that they appear to resist attacks of colds year after year.

Persons with cold should at once go to bed and stay there as long as there is any rise of temperature. Methods of cure had best be left to the doctor. Some persons put their faith in bed, a hot bath and a hot drink. Others use vaccines. There is one vaccine, namely that prepared by Rosenow, which, taken by mouth in doses of ten drops once a week, is said to prevent the onset of a cold and taken daily in the course of a cold seems to break it up. It is worth trying.—John W. S. McCullough, M.D.

VERY ILL

KEMAL ATATURK
President of Turkey whose illness from a chronic liver complaint has taken a grave turn, according to an official communique from Ankara.

Nomination By-law Passed—Speed Limit Set for the Park

Public Health Act, governing nuisances in the municipality, complaint of which had been made to Council at the last meeting. It appeared that the Act gave adequate protection of the public health and no further steps were necessary or could be taken by the Council. The matter was one for the Board of Health to deal with.

A letter from the Department of Highways, returning the by-law regulating speed on the highways and in the park. Approval was not given, in view of the fact that speed on the streets was covered by provincial law and was not now necessary.

Approval was received, however, following a visit of the Provincial Inspector for regulating speed of vehicles in the park. The speed limit was set at 15 miles per hour and the required readings were given and it was passed by the Council.

The by-law to provide for the annual nominations for the municipality for the year was read and passed by Council. Nomination day was set for Friday, November 20th, at 7:30 p.m. In the event of a poll being necessary, voting will take place on Monday, December 1st. Deputy Returning Officers were named as Mrs. Chapman and Leonard Atkinson. Voting hours were to be from 9 a.m. until 5 p.m.

The Clerk reported that Mr. H. H. Ford had requested that a discharge of the mortgage and desired to pay the balance due for the property. By-law No. 718 was read and passed by the Council giving power to discharge the mortgage on payment of the balance due.

A letter from the A. 100 Branch of the Canadian Legion, asking permission to hold a Poppy Day and also confirm the usual arrangements for Homefront Day services. The Council agreed to carry on the usual arrangements and gave permission to set up a wreath at the cost of \$4.00.

Drummond was also granted for the Acton Boy Scouts to hold Apple Day on Saturday next.

A letter from the Commissioner of the National Highway Act was received enclosing a by-law that should be passed if the municipality desired to take advantage of Part III of the Act. A copy of the by-law and map of the municipality were also to be forwarded to the Department.

The Clerk was instructed to secure five additional copies of the map of Acton. Instructions were also given for passing at next meeting.

VERY OBLIGING

"Donald," asked Maggie eagerly, "will ye tak' me to the seaside this summer?"

"No na, lassie, I cannot," said Donald, "but if ye full me of the place ye like best I will write for the local free guide for ye to read."

SMALL, BUT GOOD

"How was your vegetable garden this summer?"

"Fine. We had it for lunch on Monday."

THE FORWARD VISION

Father (to infant son sucking his thumb): "Hey, son! Don't do that. You may need it when you get old enough to travel!"

THE FORWARD VISION

What would you do if your gun captain's head were blown off in the midst of a battle?

Seaman: Nothing.

CPO: Why not?

Seaman: I'm the gun captain.

One reason people cannot settle their problems is that they are too busy making new ones.

Sea Harvest Salesmen Meet

As Forest Fires Raged in Rainy River District

APPLE DAY BY ACTON SCOUTS ON SATURDAY

Perhaps the most practical of tag days is that of the Boy Scouts. For the day money they give something that is of real benefit—a big red Canadian apple. Perhaps that is the reason their tag day is so popular. At any rate young Canadians in the Boy Scout Troop will be on hand in Acton on Saturday offering big rosy McIntosh Red Apples. You can't wear them on the lapel of your coat, but you can have burgers in your pockets. The smile of a Boy Scout and a big red apple are a real appeal. It's not necessary to urge support for such a combination.

JIM McINTYRE PRESIDENT OF GREENOCK LITERARY

Members of Greenock Literary met in the school on Friday evening, October 14th. Reports of the past year were given and general discussion took place.

The following officers were elected for the coming year:

President: Jim McIntyre
1st Vice-President: Evelyn Pearson
2nd Vice-President: Evelyn Aitken
Secretary: Jean Mann
Treasurer: Arthur McKewen
Reporter: Laura Johnston
Phonist: Mrs. Wm. Johnston
Assistant Phonist: Donald McPhail
Assisting Committee: Gordon Leslie, Calvin Aitken.

NO COMPETITION

A school teacher says that she once put a question to one of her boy pupils as to what was the distinguishing feature of the State of Texas.

"Texas," replied the lad, "is celebrated for being the only one of the United States that is the largest."

LOYAL TO THE CORE

Clerk—Did you say that you wanted some Spanish onions, ma'am?

Customer—Yes, but be sure that they are not from the insurgents.

JURY A WARNING

"I didn't insult her. I merely said that if looks could kill, it would be suicide for her to use a mirror."

As Forest Fires Raged in Rainy River District

Submerged against the raging flames of the forest fires that spread death and destruction on the Rainy River District, are these two firefighters. They are but two of the thousands of men who fought to gain control over the raging forest fires which claimed over 20 lives, burned 3,000 acres and inflicted millions-of-dollars worth of damage to valuable timber land.
