## Menu Hints

Recipes for New and Novel Dishes, Household Hints and Suggestions

### COPY CHEF'S MAGIC AND TOAST CAKE FROSTING

By BETTY BARCLAY

Why don't you take a tip from the chef and toast the frosting for your next cake right under the broiler? It's the latest style in luscious frostings. You'll be sure of a creamy smooth triumph if you use those short-cut recipes made with sweetened condensed milk. They are magically future-proof, so even a bride can produce "a toothsome triumph."

#### COCONUT BROILED ICING

1 cup sweetened condensed milk  
2 tablespoons butter, melted  
3 tablespoons brown sugar  
1 cup shredded coconut

Mix sweetened condensed milk, butter, brown sugar and shredded coconut. Spread on cake plate very low (broiler under slow heat). Broil until icing bubbles all over and the surface becomes light brown. Remove from broiler, cool. This frosting covers top of leaf cake of about 18 cup cakes.

#### TOasted ALMOND FROSTING

1 1/2 cups sifted confectioners' sugar  
1 cup sweetened condensed milk  
1 cup toasted almonds, finely chopped  
1/2 cup powdered sugar

Add confectioners' sugar gradually to sweetened condensed milk, beating until smooth and creamy. Spread on top of leaf cake of about 18 cup cakes.

Note: For toasted almonds, place almonds on pan and brown lightly in moderate oven.

#### SOUTH SEA FRUIT CUP

Combine:  
2 cups orange sections  
1 cup fresh pineapple cubes  
1 cup shredded coconut  
With:  
2 cup orange juice  
2 teaspoons grated orange peel  
Add:  
3 teaspoon dried, preserved or candied ginger

If available, add one of the following fruits: Cherrymoy, Papaya, or Sapote. Serve 6.

#### DRESSINGS FOR FOODS

Salads, like doebutans, are much more alluring when presented with proper dressings. But the salad dressing must taste good as well as look good. Here are three modern dressings that you will find more than satisfactory.

#### SALAD DRESSING WITHOUT EGGS

2 tablespoons butter  
2 teaspoons sugar  
1 teaspoon salt and pepper  
1 teaspoon mixed mustard  
1/2 cup cream or milk  
1/2 cup vinegar  
1 tablespoon cornstarch

Combine butter, sugar, salt and pepper—mustard, cream or milk and vinegar; add starch mixed to a paste with a little cold water. Cook over low heat until thickened.

#### SALADE AU PERNOD

1/2 teaspoon salt  
1/2 teaspoon dry mustard  
1/2 tablespoon chopped parsley  
cloves garlic  
1/2 cup small, toasted bread, cuties  
1 cup salad oil  
1/2 cup Pernod

Mix seasonings well. Rub bread cubes with cut side of garlic clove. Toss with seasonings. Mix oil and Pernod; add bread cubes all shake well. Serve on green salad. Approximate yield: 1 1/2 cups dressing.

#### SPICED DRESSING

1/2 cup chopped parsley  
1/2 cup chopped onions  
1/2 teaspoon salt  
1/2 teaspoon fresh ground pepper  
1/2 cup vinegar, flavoring with horseradish

1 shallot, finely chopped or dash cayenne pepper  
1/2 cup salad oil  
Combine ingredients and beat well. Serve on yeast egg or vegetable salad.

#### CUT "PENS-ACROSS-SEAS"

Sydney, NSW (CP) The Department of Education is discouraging pupils from corresponding with children abroad, saying that pen friendships may get information to the enemy and spread Nazi propaganda.

#### EAT MORE POTATOES

London (CP) Saying "We eat an average of only half-a-pound of potato a day in Britain," the Ministry of Food is urging Britshers to eat at least three-quarters of a pound a day.

## War Prisoners Find Lifeline In Recreation

### Some Still Arrogant but Music and Other Activities Tend to Soothe the Nazi Ardor in Foreign Land

BY DOUG HOW  
Canadian Press Staff Writer

AN EAST COAST CANADIAN (CP) Feb. 26 (CP) Col. Hubert Stethem, the grey-haired director of internment operations at Ottawa, took a short time out preparing for the arrival of a new contingent of Nazi prisoners to let a reporter in on facts about the men watching war from behind Canadian barbed wire.

The problem of recreation is there, even though authorities encourage it as a safeguard against mental or physical breakdown. Medicine, ball and walking are favorites. Diplomatic athletic articles usually come from the International Y. M. C. A. Actual war prisoners do everything possible to keep in the best of health, always looking for a chance to escape and get back into action.

German prisoners are still "arrogant" but have grown "quieter" since September, the month Hitler's invasion of Britain backfired. Practically all camps have received a piano from the Y. and orchestras are common. A 30-piece German officers' orchestra produces the "finest music" Dr. Graham said increased consumption and reduced production of butter in Canada, combined with labor and food shortages in Eastern Canada, to complicate the dairy products problem. Further, he said, the price of butter was high in comparison with cheese.

This resulted in a tendency to turn milk into butter, with adverse effect on prospects of Canada supplying the required 112,000,000 pounds of cheese to Britain under the trade agreement.

## Chronicles of... Dominion's Cows Called to Arms to Win the War

### Reinforcements and Better Feeding Needed to Produce Dairy Exports for Britain Experts Point Out

Winnipeg, February 5 (CP) A prairie university authority declares that "more cows and better feeding" are needed to produce at least 722,000,000 pounds of milk more in 1941. (None are needed if Canada is to meet domestic and export demand for dairy products.)

Dr. V. E. Graham, of the University of Saskatchewan Dairy Department, suggested better prices as an inducement to farmers to increase production with margin of profit.

Dr. Graham said increased consumption and reduced production of butter in Canada, combined with labor and food shortages in Eastern Canada, to complicate the dairy products problem. Further, he said, the price of butter was high in comparison with cheese.

This resulted in a tendency to turn milk into butter, with adverse effect on prospects of Canada supplying the required 112,000,000 pounds of cheese to Britain under the trade agreement.

#### Better Feeding

Dr. Graham said if farmers had the incentive to produce, the increased demand could be partly met by better feeding of dairy herds. But high-priced labor, present prices for cheese which he said were below cost of production, and food shortages tended to cause farmers to sell their dairy cows.

Dr. Graham thought any suggestion requiring reduction of butter consumption in Canada would prove unsatisfactory. He saw the possibility Canada might be forced to import cheese from the United States to meet Canada's commitments.

Before the war, he said, Canada exported 61,000,000 pounds of cheese to Britain. Under the first trade agreement ended last November 30th, Canada exported about 96,000,000 pounds. But this year, Canada required increased cheese production of 15,000,000 pounds and the same increase for domestic butter consumption in addition to possible increased evaporated milk production for export.

Previously farmers protested the pegging of butter by the Wartime Prices and Trade Board at maximum wholesale levels prevailing December 12th as being "unfair" and below cost of winter production.

#### Minimum Prices

Hon. J. G. Gardner, Dominion Minister of Agriculture, has announced he would recommend to the Federal Cabinet that a minimum price for butter be established for the summer months. Agricultural leaders, however, asked that the price be set for a full year.

The Federal Minister also said he would recommend that cheese producers receive 15 cents a pound instead of 11 1/2, with continuance of present bonuses for quality production.

He announced the recommendations at a conference with Ontario farm leaders and said that if it became necessary to bring feed into Ontario from Western Canada the Ontario government should pay part of the cost and look after distribution.

Ontario's Agriculture Minister Hon. P. M. Dewan, maintained farmers were being called to make unfair sacrifices in the war effort.

Officers must buy their own food and clothes. Food and the facilities to cook it are given the men not to them as theirs from them or Internes organize their own educational programs, choosing learned men from among them to instruct. Seamen take courses in navigation, usually given by the leading officer supervising the numerous camps strung across the land is strenuous job as Col. Stethem well knows the sailors 14 hours a day. Seven days a week.

While Col. Stethem declined to give any information regarding his most important hostages, it is known from other sources that former Mayor Houle of Montreal has been splitting wood in an Ontario lumber camp centre. Houle is quoted as saying many other civilian internees Reports that he was punished for political talk were branded "nonsense."

#### BOMBAY'S MOONSHINING

Bombay (CP) More than 300 distilleries were discovered in Bombay during the last six months. Hundreds were arrested, including six women.

#### 10,000 ARMY COOKS

London (CP) Interest in army cooking schools and 100 emergency training centres, 25,000 cooks have graduated since the war started. The British army now employs nearly 40,000 cooks.

#### DIES FROM EXPOSURE

Bethesda, North Wales (CP) David Miles, 20-year-old university student, died in hospital here after he had laid for 25 hours, half-frozen in a crevice of a mountain.

#### HELLOS IN AUSTRALIA

Canberra, Australia (CP) Australia now has 702,800 telephones presenting a seven-fold increase since 1939 and an increase of 100,000 in the last three years.

#### FAMILIES IN WAR

Harpden, England (CP) War or war, people should be encouraged to have larger families, says Dr. R. A. Fisher, eugenics professor of the University of London.

## Close Calls ... Five He Wants Another

### Four Narrow Escapes Afloat and One Ashore But Sailor Craves More

Somewhere in Scotland, February 10 (CP) Cats may have nine lives but a ship's officer, commanding here after his fourth narrow escape, thinks he has quite a few. Three times he missed death on the high seas and once when a theatre was bombed.

He masked off his first "It's" October 1939, when he was third officer aboard the Rockpool, which was sunk with a U-boat and became the first merchant vessel to sink the Atlantic, but the Rockpool replied and escaped in a smoke-screen.

The Nazi reappeared, started the shelling and the Rockpool exploded. The U-boat was sunk and the Rockpool rescued survivors.

"It's No. 2 went by the boards when the Nazi sander scored a direct hit on a gun mount, and he was kept at home to help if the need were urgent. So with this jury job ahead of him, Partner was 'through' everything; he could get a little ahead of the ship." But you can't milk cows or clean stables in advance, so we were looking forward to a few days' very early rising if Partner's name should happen to be one of those called for by the jury.

Partner reported for duty at one o'clock Monday afternoon. At three o'clock he was ashore again with four dollars, his ship pocketed. He had not been called. Somehow or other four dollars ranked. At a time when money is so badly needed and often so hard to get, easy money seems almost a crime. Refuse to take it? Well, that would be rather extreme. Partner had another solution. He took the hills out of his wallet and said, as he handed them over to me: "If you are going to town tomorrow take this money with you and grow a war savings certificate." It was money we had not looked forward to therefore it was money we could well afford to spend. So that was that and now everybody's happy. And am I relieved to think we haven't got to get up in the small hours of the morning for Partner to be away by ten o'clock!

Last week was rather a bad day for him. Last Tuesday I got up about half-an-hour after Partner had gone to the bar and found a column of smoke rising from my wicker chair that sits beside the stove. Down from the chair I saw what looked like a small ball of fire - just glowing red, not blazing. Pulling the cushion away I found a pair of rayon stockings which I had been burning and left there. How they came to catch fire is a mystery. I can only think a red hot spark flew into the chair as Partner was lighting the fire. It was a mercy I came out when I did. In a few minutes the chair would have been ablaze, as it was tinder-dry.

Well, as if that scare wasn't enough for one day I had to go and sit down on the ice, just half-an-hour later. I was merely walking from the house to the garage, but half way there I sat. After I writhed, and finally I limped, and by these easy stages I eventually got back to the house again. After a bit I began to feel my bones and decided I wasn't badly hurt even if my back did feel as if it had come in contact with a steam roller. So I tried again, and this time I reached the car, but half-way to the place where I was going my left-hand and arm began to ache like nobody's business. Presently I couldn't hold the wheel. On my way home I had a passenger who drove me car for me. And that was the end of my activities for a few days. But added to the misery of my aches and pains was the thought of Partner having to serve on the jury. How was I going to help with a sprained wrist and a lame back? and there wasn't much I could do for the back except sit on a hot water bottle! But I had to do something for that wrist. Cold cloths wouldn't do, cold cloths meant rheumatism. So I poulticed and poulticed and persisted that wrist every two hours to be exact and in two days I could use it. Not very well, but a little. In less than a week the swelling was gone, the hand almost stiff, and most strength coming into the wrist every day. These minor injuries are an awful nuisance but its kept me off work than in an armchair.

During my forced inactivity I began to reading and one of the books I read was "Horseshoe" East by Douglas Reed. A book that describes life between the last war and the present one, and in reading it one is not surprised that this war should have come about. Douglas Reed writes of an England that Partner and I did not know, an England lulled into a false sense of security, an England whose ministers deliberately kept its people in the dark about the rearming of Germany and the sinister designs of the dictator powers. Reading this book it is easy to understand that Hitler thought defeat for his armies would be impossible. But, thank heaven, we know that Hitler's underestimated British strength of character. The more one learns of pre-war England, the more one

## Troops Asked To Skip Farms

### Britain Hopes to Save Crops and Pasture by Do's and Don'ts

London (CP) The British position in the British Empire, established by the Government of Ireland Act, will never be altered against the will of the other people, declared Prime Minister J. M. Andrew.

## SURE OF ULSTER

Belfast (CP) Ulster's position in the British Empire, established by the Government of Ireland Act, will never be altered against the will of the other people, declared Prime Minister J. M. Andrew.

## GOULISH THIEF

London (CP) For stealing rings from fingers of four people killed by Nazis, an mortuary attendant was sentenced to three years penal servitude.

## HEALTHY BRITAIN

London (CP) Sir Wilson Jameson, Chief Medical Officer of the Ministry of Health, says that after nearly seven months' intensive air attack, there is no sign of serious epidemic anywhere in Britain.

## KILLED IN BLIZZARD

Wainfield, England (CP) Five workmen returning to their home were killed when a snowdrift buried them in a black cloud.

## "Fishermen's Patrol"

## Silk of Glass

### Going Out From Britain to Save World Fuel Supply

Glass silk is now being sent overseas from Great Britain in increasing quantities. The manufacturer exports 250 per cent more of it last year than in 1939.

It is used for saying heat. Not less than seventy-five per cent of the heat created each year by millions of tons of fuel is wasted. The specially manufactured glass silk is perhaps the most efficient material for stopping such wastage in domestic equipment, like boilers, pipes and stoves.

In the last few months, this glass silk insulating material, which is unaffected by temperatures up to 300 degrees Fahrenheit, has been shipped from Great Britain to South Africa and Calcutta in the form of blankets as mattresses to East India (or railway locomotives) and to Northwest India (for insulating petro wagons) in rigid sections to New Zealand, Trinidad and Portugal, and in sheets for separating the positive and negative plates of electric accumulators to Chile, New Zealand, Australia, and Europe.

Various other glass silk products have been recently dispatched to Arabia and the whole of the insulating material required for the new Bulawayo Hospital and Nurses Home, Rhodesia, will consist of British-made glass silk.

marvels at her present strength and remarkable come-back. And the more one is confident of ultimate victory with Winston Churchill at the helm and each one of us behind him pulling our weight. Not leaving a to-the-other fellow but pulling him along for all we are worth. And although the degree of our strength may vary, the degree of each one's effort should be the same. To the limit of one's capacity.

In an emergency they can be mobilized quickly, efficiently, to repair the basic weight by storm, fire, or flood. The equipment they carry is standardized apparatus of many kinds makes possible the speedy restoration of vital services. Preventive maintenance, preparedness, and skill in these all serve to ensure that your message will get through with minimum delay in any emergency—a vital contribution to the country's war effort.
