### What's Wiltshires That Britain Asks?

OTTAWA, (CP)-The Bacon Board points out that the standard and preferred form of preparing pork for the British market is in the farm of Wiltshire sides and all packes have precise and detailed instruction on how to prepare them. A Wiltshire side is practically whole half mg. It is a practically whole half mg. It is made practically whole half mg. It is made by splitting the carcass down the back, cutting off the head just back ! of the ears and cutting off the feet bout the knees.

Canadian Army Overseas

Just a short note to thank you for regularly for the last sixteen months and I assure you it means a lot to nearer to the old town.

We had a wonderful voyage only for one instance . . . we continued on our way and at last arrived in our camp, which is a really lovely snot in England.

About three weeks after we arrived Col. G. Drew visited my Battery and gave us a warm feeling of friend- 12.00. ship. He was in the 16th Battery part of the last war and he gave us the history of our Battery.

We were . . . for two weeks on the ranges and we had a lot of hard work, but also a good-time. We slept out on the moors about 1200 above sen level and it sure was cold at night, but we all came through fine and are now waiting for our call which I hope won't be long.

I met a lot of the boys from Acton and we are fairly close to one another when we are at barracks and it-makes-you-feel-good-when-we meet and talk of home.

We are getting ready for the visit of the King and Queen on Thursday, Sept. 18th. Will send you a few lines later about their visit.

We had a visit from the Huns the other night but they soon left when we opened up on them and no damage was done. So now I must close thanking you for your many favors and THE ACTON FREE PRESS.

I remain, one of the boys, H. De FOREST

The three main factors in providing the machines which will continue to Improve farm operating and make it more profitable are closely inter-related and achieve the utmost in their functioning when properly correlated. These three factors are -· ENGINEERING ... which by study and experimentation conceives and develops the implement or machine to meet the immediate need or problem of the farmer. MANUFACTURING—to produce in quantity and quality the machines developed so that they may be economically available to the farmers whom they were designed to assist. ■ DISTRIBUTING—to sell with all the details which this includes, and which in its broader sense implies the missionary work of introducing new developments so that the full possibilities envisioned by the engineer may be fully appre-MASSEY-HARD dated by a sufficient number to provide the volume necessary to bring manufacturing costs

It is evident that when these three functions are co-ordinated under one management, the success of each being entirely dependent on the success of the other, and the success of all being the responsibility of that management, that each functions at its highest point of efficiency. One cannot blame for its short-cominas the actions of the others, insofar as the automer is concerned there can be no-"buck-passing." It's an undivided responsibility.
