Manitoba Stakes 3,500,000 Acres For Fur Raising

Central Province Goes Into Production of Fur-Bearing Animals in Big Way of Public Development

WINNIPEG. (CP)- Manitoba's fur industry revolutionized with the help of the provincial government's Department of Mines and Natural Resources, produced pelts exceeding \$3,-000,000 in value during the last year with a vast expansion in sight.

Hon. J. S. McDiarmid, Minister of Mines and Natural Resources, announces that fur rehabilitation blocks in Northern Manitoba as public development projects now comprise 3,500,000 scres. A total of 140,-00 neres are in production now and within another two years 500,000 acres will be producing.

The new system of registered traplines has been brought into successful operation since 1939 and has widely extended. Under this system trappers are not permitted to indiscriminitately reduce the stock but instead they are conservationists and their own game guardians, said the

Fur from the "wilds" for the year ended Sept. 30 last totalled \$2,460,000 -100 per cent. higher than the avkinson, died at the home of his daugh- erage for the last 13 years, said the ter, Mrs. Daniel McMullen, Mill St., Minister. From the 845 fur farms, Saturday evening after a two weeks' representing an estimated value of illness. He was born in Yorkshire, more than \$2,000,000, pelts worth England, 94 years ago and came to \$875,000 made up the year's crop. Winnipeg as Centre

The growth of the fur industry has made Winnipeg one of the world's greatest fur markets in the last decade. In the last 12 months fur marketed in Manitoba exceeded \$6,-000,000, an increase of \$1,000,000 over.

The rehabilitation blocks referred to by the Minister are: the Summerberry muskrat project near the Pas. 500 miles northwest of Winnipeg, now in production; a 170,000 acre area adjacent to Summerberry, scheduled for production next April; another 100,-000 acres-west of Summerberry, was scheduled for production in 1943; a fisher, otter and muskrat, and the God's-Dayes river area of 2,500,000 acres for production of fur-bearing animals including beaver.

Development work last summer included construction of dams in the Fisher Bay zone which will control water levels several thousand acres of fine fur-producing country, Mr. McDairmid said.

This winter the registered trapline districts will extend over an area of approximately 30,000 square miles, large enough to accommodate from 750 to 1,000 trappers, Mr. McDiarmid said. Other trapline districts will be set aside in accordance with a closely co-ordinated program.

In the fur farm field Manitoba now is producing chinchillas in addition to fox and mink. A lone Manitoba rancher has 17 chinchillas, produced from a pair purchased in California for \$2,200.

Master and Crew of Coastal Vessel Cited for Heroism

LONDON, (CP)-Heroism of the master and two of the crew members senior survivor of the bombing.

"I cannot speak too highly of the mote far away island just off the master," the report said. NOTICE!

Due to the fact that destruction of property in and around the Legion Club Rooms is still being indulged in, it has become necessary to close the "short cut" through these premises.

"No Trespuss" signs are now erected and it is therefore carnestly requested that all persons refrain from trespassing in or on this property at all times. Persons found doing so, will be prosecuted. Parents are particularly requested to see to it that their children do not use this "short cut" in future, or enter upon this property at any time, in any way, except when they have the right to do so, such as the Boy Scouts.

A Way to Serve . . and a Way to

MAKE MONEY

anxious to serve our country's best interests. But we are all increasingly conscious, too, that "money makes the mare go." So it's mighty pleasing and important, too, to find a way to serve, and at the same time break more than even.

Here's one way, "made to order": Fill all the brooder space you have with early chicks . . . the best you can buy.

These huge British orders for eggs at a price ranging between 28.79c and 32.12c per dozen, Grade A-Large at Canadian seaboard, and the Dominion Government subsidy of 3c per dozen on Grade A-Large bought for export, have put a definite "floor" under Canadian egg prices. Unless we miss our guess by a nughty wide margin, Winter and Spring egg prices. this year, will hold at least 7c, and probably 10c per dozen above those of a year ago. That's a paving difference, and It appears likely to continue.

We don't suggest over-expanding, overloading, or overcrowding. That's bad business.

should use all the noultry equipment you have, to the limit. Start all the good chicks you have accommodation for, early . . . just as soon as you can get your brooder house cleaned up, tightened up, and ready. Both the egg and broller markets look so promising that you can't afford to overlook this really extra-special profit possibility; and there's practical patriotism in it, as well as profit.

Naturally, when you're choosing your good thicks, we would like to have you consider Bray Chicks. They're good chicks. They've done a real profit-making job for others. They ought to do the same for you. Get your order in early.

EXTRA INCOME Could you use some extra income 10 or 12 weeks from now?---You-can-get_it easily endugh_if_you_have_brooder room for some extra "Bray" 90% cockerels. Check up on the price of broilers, and you'll soon see what we mean, in dollars and cents.
