

Personals

Mr. Maurice E. Stark, Barrister-at-Law, has returned to Acton.

Mrs. James Higgins and Russell spent a few days in Toronto.

Gen. James Ford was home for the week-end from Newmarket.

Mrs. James Ford and Teddy spent a few days in Toronto visiting friends.

Miss Nellie Williamson, of Toronto, is visiting with Mr. and Mrs. A. T. Brown.

Mr. R. F. Johnson of Toronto, visited his mother, Mrs. Wm. Johnson on Sunday.

Mr. and Mrs. Gordon Cooper of Coprac, are visiting with Mr. and Mrs. Wm. Cooper.

L.A.C. Elmer Lashy is spending a few days at the home of Mr. and Mrs. George King at Massey, Ont.

Mr. Percy Martin of Hamilton is visiting with his sister and brother-in-law, Mr. and Mrs. Francis Wilds.

Mrs. Murray Smith is improving nicely after an appendicitis operation at Guelph General Hospital last Thursday.

Miss Oakes has returned to her home in Guelph after spending a week with her brother Mr. W. J. O. Oakes, Willow Street.

Miss Jean Bertle has left for Peterboro, to take up the position of laboratory and X-Ray technician at the Nicholls Hospital there.

Little Miss Sharon and Master Ronnie Hawk of Guelph, spent last week at the home of their grandparents Mr. and Mrs. Martin Kelly.

Pte. Elwood Perryman and Pte. Raymond Robinson of Woodstock spent the week-end at the home of his parents Mr. and Mrs. E. E. Perryman.

Rev. and Mrs. Harold Bailey and Jonina and Cecylia of Kappasack visited last week with Mr. and Mrs. Gordon Hagvaldson and Mr. John Hagvaldson.

Mrs. A. L. Staneman is visiting her daughter and family in Windsor. She is also attending the Graduation Exercises of her nephew at the University of Michigan, in Ann Arbor, Mich.

Mrs. Peter Smith and Miss Pearl Smith will attend the graduation exercises to-morrow of Mrs. Smith's granddaughter, Miss Mary Sibbett, who graduates with honors in her course at Trinity College.

Pte. Anne Kelly of Newmarket is on two weeks furlough at the home of her parents Mr. and Mrs. Martin Kelly, and is spending a few days in Guelph with her sisters Mrs. L. Forsell and Mrs. F. Hawk.

Dr. and Mrs. E. W. Harrop and Rose Marie of Belleville, Mr. and Mrs. W. Harrop and Shirley Gail of Hamilton, Mrs. Ted Harrop of Guelph, and Miss Pat Harrop of Detroit, visited last week-end at the home of Mr. and Mrs. E. Harrop.

Mr. and Mrs. Chas. Wilson, Miss Doris Wilson and Mr. Bill Wilson, attended the graduation exercises at Toronto University yesterday when Miss Hazel Wilson graduated in her course in hospital supervision. Miss Wilson joins the staff of the Western Hospital in Toronto.

Engagements

Mr. and Mrs. W. J. Gordon, Rockwood, Ont., announce the engagement of their only daughter, Floris Jean, to Lloyd Arthur, only son of Mr. and Mrs. A. K. Thomas, Rockwood, Ont., the wedding is to take place the latter part of June.

B.Y.P.U. RE-ORGANIZES ELECTS OFFICERS HOLDS FIRST MEETING

On Tuesday evening May 25th, the Baptist Young People held their annual meeting. Mr. W. Coles led a singing. Mr. Len Atkinson acted as chairman for the evening. The secretary-treasurer's report was given and adopted. The election of officers followed.

Hon. President—Rev. J. E. Ostrom. President—Wilma West. Vice-President—Ida Fryer. Secretary-Treasurer—Beta Lincoln. Pianist—Jean Matheson.

Mr. S. Cripps closed the meeting with prayer.

The B.Y.P.U. held its regular meeting Tuesday, June 1st, with the president in charge. Following the business session a short program was presented.

Kenneth Anderson and Bertie Collett read prayers. Mrs. C. Landborough sang a solo and Beta Lincoln led in prayer. Ida Fryer read the Scripture lesson. Mrs. Grundy, speaker for the evening, took as her topic "Who is My Neighbor," which proved very interesting and helpful. Elvin Keatner played a musical number, which was followed by a hymn. Mrs. Anderson closed with prayer.

BRAY CHICK

CHAS. BROWN, Manager
of Acton Free Press and
Daily Only

C. THORNER, Redwood
I. C. COLLIER, R. S. Wilson
—Agents—

Your Eyes and Glasses
will be well cared for if trusted to us. Our prices are also moderate. Satisfaction Assured.

PHOSE 125 — GUELPH

ANNUAL MEETING
—Of The
PROGRESSIVE CONSERVATIVE ASSOCIATION
Of The County of Middlesex
Will be held in the
TOWN HALL, MILTON
—
FRIDAY EVENG., JUNE 2nd, 1943
at eight o'clock P.M.

SPEAKER
JAMES A. BOGS, M.P.
Mr. Bogs is a farmer from
South, Manitoba

EVERYBODY WELCOME
Lt.-Col. S. B. Phipps, President
Lloyd D. Dingle, Secretary

GREGORY THEATRE

FRIDAY, JUNE 4
TRIDE OF THE YANKEES
(The Life of Lou Gehrig)
played by Gary Cooper, Carleton "Sufferin' Cade" Chayler
"King of the Mounties."

SATURDAY, JUNE 5
MIDNIGHT
"GHOST OF FRANKENSTEIN"
Lon Chaney, Evelyn Ankers.

THERE'S ONE BORN EVERY MINUTE
Hugh Herbert, Peggy Moran.
Fox News.

MONDAY, JUNE 7
"WAR AGAINST MRS. HADLEY"
Fay Bainter, Edward Arnold.
March of Time "The Navy and The Nation." Pete Smith
"Wild Horses". Miniature "Foca Gold."

Rationing Time Table
(Clip This Out and Keep Available)

COFFEE (or TEA) (General)
Coupons 1, 2, 3, 4, 5, 6, 7, 8 now valid.
Coupons 9 and 10 valid June 24th.
No Expiry date.
Each good for 8 oz. coffee or 2 oz. tea.

SUGAR (Pink)
Coupons 1, 2, 3, 4, 5, 6, 7, 8 now valid.
Coupons 9 and 10 valid June 24th.
No Expiry date.
Each good for one pound of sugar.
Spare B No. 1 coupon is no longer good.

Canning sugar special coupons marked June now valid. Each good for 5 lb. sugar.

BUTTER (Purple)
Coupons 12 and 13 now valid. Expiry June 30.
Coupons 14 and 15 valid June 10. Expiry June 30.
Coupons 16 and 17 valid June 24. Expiry July 31.
Each good for one half lb. butter.

MEAT (Red)
Coupons 1 (pair) now valid. Expiry June 20.
Coupons 2 (pair) valid June 3. Expiry June 30.
Coupons 3 (pair) valid June 10. Expiry June 30.
Each good for ¼ to 1½ lbs. meat.

Chronicles of... Ginger Farm

Well, here we are again—and it's the last day of May. Yesterday we turned the cows out to pasture and the excitement was not without incident. Farmer let them go late in the forenoon and we had just slowly finished dinner when our son came in and asked if young Mugs was meant to be loose. "No," answered Farmer, "he certainly isn't."

"Well, he's running around in the barnyard right now anyway," said Bob.

So Farmer changed into his working clothes once again and went back to the barn. There he found Mugs had succeeded off the iron bar in his stall to which he was chained; moved open the stable door—and was making the most of his unaccustomed liberty. You can almost imagine him saying "Well, after all why should all those females be let out in the luscious green pasture and I left behind in the stable all alone? It just doesn't make sense."

However Farmer thought otherwise so a new iron bar was installed and after Mugs was driven unwillingly back to his place Farmer put a rope on him as well as a chain. Mugs is just a young fellow and has never been roped before so he forgot his anxiety to get loose in trying to figure out what this new contraption might be.

When I went down to the barn last night the mole was like he had had a line. Each time a cow was milked and turned out the rest of the herd followed their heads off thinking they were going to be kept in. The calves joined in the chorus while Mugs contributed a sort of obligato on his own. It was terrible.

Another week has gone by and will no wonder, since we were very busy last week just the same. We had a carpenter here most of the week building a new brooder house and also a set of steps for the front door. It is nice to get those things done but oh dear, the price of lumber...

Friday we moved the chickens to their new quarters and they like the change very well.

After the weekend we had our small family together again. I am so happy when it happens that way. I am never quite satisfied when one of our "children" is home without the other. It never seems exactly as it should be. I watched the two of them come in and cross the lawn together Sunday night—tall and fully grown—and yet such a little while since they were a little boy and girl going to public school. Yes, it is all right to look back because there are always happy memories, but one dare not look forward—not in wartime, with one in the army and the other in munition. But there is always the present—and we can make the most of it.

Family life has many problems. For instance, in spite of hard work and sweat of struggling against depression prices for farm produce, we still think there is no better place to live than on a farm—although there are a good many improvements that we should welcome to make farm life a little easier. And yet neither of our off-spring like country life — they would much rather live in the city.

Daughter and I were arguing about country versus city life when she sprang this on me—"Well, why should we like the country? After all neither you nor Dad were country born or bred so why should you think it ought to be natural for us to love the country? Of course, I just love to get out here where the air is so fresh and clean. It's fine for a day or two. But live here. I just couldn't. It's too dead."

Well, I just didn't have an answer to that one because part of it was true—another part, not. I knew anything about farming until we were well in our teens. And I suppose it is equally true that because we like farming we have no reason to expect that our children should like it too.

However, here we are and, I suppose, here we stay. What our youngsters will do in the future is anybody's guess. In the meantime I almost forgot to mention we have started work on the land. Seed time and harvest shall never fail.

Late Season Magnific Food Shortage Problem

The interest of the season has become serious not only to our farmers who are concerned with the production of food for their livestock, but also to our urban dwellers, many of whom for the first time in their lives are faced to face with food shortage, not because they haven't money to buy it, but for the reason that prospects at present certainly indicate that there is not likely to be sufficient food for the combined demands of our business commitments and home consumption, since J. E. Whitehead, Agricultural Representative for Halton, Ontario, certainly from the standpoint of our war effort, those on the first line of defense must be kept supplied with sufficient food stuffs even though it means the tightening up of our belts in Halton, it is questionable if more than 10 or 15% of the crop in the ground, and approximately 50% of our farmers have not been able to get on the land at all. This situation is more or less prevalent in all parts of Canada and to a large extent in the United States.

It has been stated that President Roosevelt, in the morning of those days when the North American continent was in a total crop failure. Stimulated with this fact and with the optimism characteristic of those who till the soil, Ontario farmers are adjusting their plans so that the best possible results under the circumstances, may be secured even though experimental evidence indicates that June 1st normally marks the latest date in this section of Canada when such crops as oats and barley may be expected to give worthwhile returns.

Crop specialists and many practical farmers are recommending that consideration be given to sowing early maturing varieties of oats, barley, corn, soybeans, and other catch crops as buckwheat and millet. Certainly it is not too late for the latter four crops. Furthermore, with good growing conditions during the early part of August, such early varieties as the Kabot, Golden, and Paganis, may be sown up until June 15, with confidence of the crop maturing satisfactorily. Another crop which should be given consideration is one of the earlier hybrid corn varieties such as the 325, 335 or 355, which can be utilized for silage purposes. Perhaps some farmers, locally, realize that corn will yield more pounds of grain and silage than any other cereal crop. An acre or two of corn for silage on many Halton farms, would assist materially in solving the possible grain shortage problem. The corn may be removed in the fall and stored in a home made crib. The whole crop may be put through a hammer mill and used in the feeding of livestock. Millet is another crop which also might well be given consideration under average conditions. Millet is practically equal in feeding value to oats and barley and can be safely fed up to 25% of the grain ration to hogs and up to 30% to dairy cattle. Millet as a grain crop may be expected to yield more pounds per acre than late seeded oats, barley, or buckwheat. It does, however, state Mr. Whitehead, present certain mechanical and such other early varieties as the Kabot, Golden, and Paganis, may be sown up until June 15, with confidence of the crop maturing satisfactorily. Another crop which should be given consideration is one of the earlier hybrid corn varieties such as the 325, 335 or 355, which can be utilized for silage purposes. Perhaps some farmers, locally, realize that corn will yield more pounds of grain and silage than any other cereal crop. An acre or two of corn for silage on many Halton farms, would assist materially in solving the possible grain shortage problem. The corn may be removed in the fall and stored in a home made crib. The whole crop may be put through a hammer mill and used in the feeding of livestock. Millet is another crop which also might well be given consideration under average conditions. Millet is practically equal in feeding value to oats and barley and can be safely fed up to 25% of the grain ration to hogs and up to 30% to dairy cattle. Millet as a grain crop may be expected to yield more pounds per acre than late seeded oats, barley, or buckwheat. It does, however, state Mr. Whitehead, present certain mechanical and such other early varieties as the Kabot, Golden, and Paganis, may be sown up until June 15, with confidence of the crop maturing satisfactorily. Another crop which should be given consideration is one of the earlier hybrid corn varieties such as the 325, 335 or 355, which can be utilized for silage purposes. Perhaps some farmers, locally, realize that corn will yield more pounds of grain and silage than any other cereal crop.
