

## With Our Weekly Newspaper Representatives Overseas

Mr. Maxine, Mr. R. P. MacLean and C. J. Miller, official delegates of the C.W. D.A., with the Canadian Press Party who toured the United Kingdom

### SOME DELEGATES ARE LEAVING TOMORROW.

By R. P. MacLean

While the current London blitz is not to be compared with that of 1940, it cannot be lightly brushed off. It is true, too, that the raids are of the "blasted out" variety with the planes striking across the "city," dropping their bombs haphazardly and thudding homeside. This enables the people to obtain almost all the sleep they want. But the raids are not and cannot suddenly affect the war effort.

But notwithstanding the people of London do not like them. It must be remembered that Londoners have been in the lead front line of the war for five years now. Five years of blasters and an unbroken string of the years of war has turned to the any people. And the people of London are tired.

They had hoped, too, that the raids were over and knew they did not think this is not so. As one man expressed it: "It's like going to the dentist after having been badly hurt for the first time. You just do not like it."

The raids have served two useful purposes. First they have made plain to the people of Britain that the time has not yet come when they can return to their own pastime and party days. They were beginning to forget this. And the raids have served to show many thousands of Americans a little of what the British people endured while they stand alone in the world with their fate to the enemy.

Although the current blitz is light when compared with the tremendous attacks to which Germany is subjecting us, it is enough to serve as a reminder that Germany is still not devoid of striking power. If anyone was apprehensive enough to believe the days of air attack on London were over, they have been disillusioned.

Our Londoners have had good evidence in the immense weight and volume of the indiscriminate bombing alone that their defenses have not been neglected but on the contrary have been strongly reinforced since the last raiding time.

There has been some disposition to treat this attack as being launched mainly for the purpose of propaganda. This element undoubtedly plays a part in it. What much was shown in the German press and on the German radio and by the talk of "hundreds of bombers" and the pretense that the British government is making desperate efforts to command the death. The Germans are obviously squeezing from the air raids every drop of propaganda value they can extract from them. Yet the new blitz has also another significance. It aims at creating disorganization and strain in London. On the other hand, the bombing has appeared to the bombardier and based upon no considered plan, while limitation of methods and devotion employed by the British did not indicate.

As in other fields Germany has been compelled to call upon sparse and precious resources in order to resume this form of warfare which she was so long forced to lay aside. When the reserves appear in a sufficient number to do an efficient job, the adversary. When, however, they are thrown in a futile effort to ward off defeat, that adversary will note their presence with a certain grim satisfaction and accept with clenched teeth such losses as they may inflict upon him. Such is the situation to-day. It is not to be expected that there will be an immediate cessation of this assault. The losses inflicted upon the raiders in proportion to the forces they have employed has been appreciable, but they have not been great enough to check him if the remains intact upon his design. He is, therefore, likely to go on striking in this manner. But the British people will face him with resolution, and, since this is so, he has not the remotest chance of affecting the course of the war or of modifying his own doom by his present methods. On the contrary, the latest attack on London, is a timely summons to the British people in this fifth year of war to play their part in the decisive struggle which still lies ahead. It does not alter the nature of the struggle. It adds little or no weight to the enemy's high-tipped scale.

### SIXTH LOAN DETAILS

Details of the Sixth Victory Loan are now revealed. On an objective of \$1,200,000,000, subscriptions totalled \$1,407,547,650, with 2,770,000 individual applications. The armed forces bought \$47 million, those overseas \$12 million. Finance Minister H. G. told the House of Commons that cost of the issue would not exceed 3% cents for each \$100.

### FEEDING THE COW

Feed the dairy cow according to the individual needs and desires of each animal. Feed regularly both as to the hours of feeding and the character of feeds. Sudden changes in feeds will not only cause a loss in gains and production of milk but will often induce ailments.

## See That Hens Have Plenty of Water

Improved summer egg production is another means to save costs. Well maintained production in summer under present conditions can be more profitable than in winter. It is possible to maintain a 30-40 per cent. production in summer as well as in winter. When conditions are right, a hen can lay all the year round. Many of the principles of adequate housing apply equally in summer and winter.

Right to the above in summer production are: (1) the comfort, maintenance, and proper feeding of the birds; (2) clean and the whitewash, open the doors, and make the penning houses cool and airy as possible; (3) keep the house and meat clean, clean the floor and make the ample supply of drinking water. Never let the water freezing go dry. Clean water definitely from back of water on a hot day; (4) lots of green food—the ground conditioner, and (5) a good dust bath. The birds do like to dust themselves.

Start your local County Council to decide one pupil from each of the schools in the county to attend one of their meetings in order that they might, by mutual cooperation, have a good start and method of running the country.

This proved to be such a success that they decided to do the same this year. It was my honor and privilege to be chosen as the representative from our school to attend this meeting in April in Milton.

On my arrival at the County Building that morning, I met a number of boys whom I knew and was soon directed up to the main entrance where I began my day.

We were taken to the Presbyterian Church where we enjoyed a delicious meal served by the ladies. After dinner, we were shown by a man named Mr. Colin Anderson. Following this we all took part in some community singing.

At this time, Mr. Slaine, inspector of schools for Ontario, gave an interesting talk on the work of the different governments of our country and how we may become youth-white citizens. Little audience was followed by others including Judge Mann, Crown Attorney Ford, Mr. Smith, County Sheriff and Mrs. MacLean, County Treasurer. These all told us of their particular work in the county.

We were then taken back to the council-house where we were divided into four groups and conducted through the hall. We were all interested in hearing our neighbors talk and learning how it was done.

We then proceeded to the Registry Office where Miss Field showed us how deeds of people's homes and farms were registered.

We returned to the council-chamber where the council was still in session. We learned them discuss the damage done by warships and how they should be destroyed because of it. Mr. Hall, member of the Legislative Assembly for Halton, spoke at an instant, expressing his approval of the council's endorsement of the pupils of the schools and of the advantages to be gained by it.

A short interval's silence was then observed by all in honor of Mr. Colin Smith, Deputy-Minister of Education, who had died recently.

A vote of thanks was then given to the council by John Beauchamp and Marcelle Servais requesting the application and thanks of those who had been present and enjoyed the meeting with the members of our County Council.

One of the pupils present was an English boy who spoke to us regarding his pleasure in being present and the value the meeting had been to him.

The meeting closed with the National Anthem and we departed for our home feeling that we had spent a most pleasant and profitable day at Halton's County Council.

### SUPERIOR PRODUCTS

If a concern gets a reputation for producing or handling superior goods that do not cost any more, the merits of such a concern become widely known. Business flows into that shop, and the community where it is located gets the benefit of its reputation.

All workers should feel an interest in this problem of turning out superior products. They all profit by it. If they can make their work a little better than that which competitors do for the same price, their company will prosper. Its employees will benefit by this prosperity, and its goods will always be in demand. Superior products build up a community or business.
