HUGHES CLEAVE

The report of No. 1 Subcommittee on War Expenditures which was tabled at the end of the recent session of the House of Commons contained some important recommendations. This subcommittee this year completed its inquiry into aircraft production in Canada. We are now producing the Lancaster and Mosquito Bombers, on British account; a Dive Bomber for the U. S. Navy as well as seven other types of planes. As of June 30th of this year Canada has delivered over thirteen thousand planes.

The committee found that the Vickers Aircraft plant at Montreal had a profit sharing scheme under which the men and women working in the plant receive one half of the profits after reaching 75% efficiency. As a result of this profit sharing plan the efficiency of the plant has been so increased that production costs have been substantially lowered notwithstanding the payment of the bonus. The savings effected greatly exceed the cost of the profit bonus. The committee recommended that this plan of profit sharing by labour should be instituted in all aircraft plants in Canada. Already active steps have been taken by the department to implement this recommendation. This report was opposed by the Conservative members of the committee but was supported by all other members including the Social Credit and the C. C. F. members.
