

A WEEKLY EDITOR LOOKS AT **Ottawa**

*With special
for the weekly appearance of Ottawa.*

Bond people were instrumental in Canada only as a plan to deposit money or cash in exchange; but in the suggestion of deposits it reflected the well-being of Canadian citizens as a whole. In this connection it is notable that July saw an all-time high when savings deposits at our chartered banks amounted to \$2,164,127,000. At the end of that month demand and time deposits amounted to \$1,000,000,000. All the while bond people demanded and savings deposits amounted to \$1,000,000,000 and more than four times that year of \$748,676 millions.

In all communities of the Dominion patriotic men and women now are organizing to help put the recently Wartime Loan opening October 22, amount. The people are doing "all that is reasonable" \$2,000,000,000 by \$100,000,000 greater than any previous loan and things look very bright for next year. But let us not over joy. When we savings up more money might now turn over before. Our total requirements cover and ordinary will probably reach \$4,000,000,000 for the year, just think about. Our spending nationally will be more than \$1,000,000,000 in essentials, more than \$200,000,000 in war and more than \$250,000,000 in day. Our individual savings must be enormous to take the balance which leaves our bags and girls home sooner. After all we're only lending—not giving.

The month of August saw National Service Savings Civilian Emergency Assistance bring contributions the \$774 per cent, with 3,661 names still pending—200 being changes against employees, 287 against employees, and 5,677 being civilian employees. These amounts 27 more citizens were held than in the previous month; 25 and 53 C.O.'s being considered, changed with changes to follow a direction the regard to an alternative camp. Sixty-one employees were consulted on changes including qualifying "designated" employees with Selective Service permission or failing to take high priority work as referred.

Now is the time of year when many rural homes expect the annual visit of the village dressmaker. As a rule they cut down and make over for the children, sometimes cutting into new materials. The Consumer Branch in our weekly item finds them, patients and in such cases they come under regulations which govern the manufacture of children's, women's and misses' clothes. When mother has the visiting seamstress make her a winter coat or soft jacket afternoon jacket from brand new cloth, any style is good as long as the skirt does not measure more than 22 inches around the bottom in the waist back and 28 in the rear back. And of course there won't be any long sleeves made since they aren't permitted except at weddings and then only in white and lace. Regulations on the use of excess materials have been revised to help meet the still heavy demands of the armed forces for rayon and cotton fabrics.

Another reduced rate is announced

on overseas mail now, with Aliquippa—"the letters on film that travel by air"—may be sent for just 5 cents no matter in which the airmail service operates as well as the members of the Armed Forces. It is interesting to note that these letters are shown to "elements" photographed on roofs of buildings—10,000 messages having contained on a 30% saving each off air—over 60,000 messages to the point. Aliquippa prints one masterpiece after being shown names like this. It is well to bear in mind that savings can always be made and duplicated.

Bond money. The postal department advises that letters from Canada go through in Germany, or in course, may cause the number of letters to increase due to the speedily allied drive. So soon as certain nations are cleared it will be for allied authorities to collect P. of W. mail from these postal people and city in them where the country of origin is, and the movement of Canadian postmen is still working but it will be difficult to collect letters from Portugal.

The Agricultural Food Board will give the public usual own purchases of milk or any possible wonder. What we want in Canada Canada wants in getting off in milk production and we know the fluid milk consumption and the difficulty in between of carrying Canadian's agreement to supply 2,000,000 pounds when any previous loan and things look very bright for the year. But let us not over joy. When we savings up more money might now turn over before. Our total requirements cover and ordinary will probably reach \$4,000,000,000 for the year, just think about. Our spending nationally will be more than \$1,000,000,000 in essentials, more than \$200,000,000 in war and more than \$250,000,000 in day. Our individual savings must be enormous to take the balance which leaves our bags and girls home sooner. After all we're only lending—not giving.

All Coder Brigids, Boston, the Department of Agriculture reports that savings increased the consumption of eggs especially hard boiled milk, bacon, which Americans could always expect to eat as much as they could. Citizens and relatives found they could just sit at the expense of milk bottles as a thing itself that held only 25 round bottles.

Don't let them down. Most young Canadians passed over the the right to buy or not, because seem willing closer with the past.

The steel production of Canada has doubled since the outbreak of war, so is present total of three million tons. While contributions to the International Emergency Fund paid in by employees, employees used government facilities \$2,000,000 on July 31, the amount received on contributions has been enough to take care of the total benefit payments under the Act as far.

The Department of National Resources has had 300,000 men in three departments, civilians, regulars and reserves, 200,000, 200,000, over an increase of nearly 300 million the same month last year.

Canada's travelling stock is destined to play a great part in rebuilding devastated Europe's livestock and towns for farm power. It is estimated that of Britain, Belgium and Holland have been reduced by half, in Russia by one-third and that only a third remains in Poland, Czechoslovakia, Yugoslavia and Greece. Germany alone is believed to have over one-half its stock.

THE PAS, Mass. (CP)—Wolf packs have been sighted in the district and farmers and game warden have taken special precautions to protect sheep and other livestock from the big bad ones.

Everybody is Invited to Hear
Hon. John Bracken
Premier George Drew
Hon. Charles P. McTague
AT
AN OPEN MEETING
OF
**THE WEST CENTRE
PROGRESSIVE CONSERVATIVE
ASSOCIATION**

ROYAL CONNAUGHT HOTEL

HAMILTON

Friday, October 6, 1944

Lady Members Special Meeting - - - 1:30 p.m.
General Meeting 2:30 p.m.

Election of Officers - - - General Business

EVENING BANQUET

For Reservations Write:
M. L. Sarge,
222 Macmillan Street, Hamilton
Telephone 2-1672

A. L. Brooks,
President

Note may also be obtained at Royal Connaught Hotel

Food, Ration Cards Delight War Brides

**British Women Encouraged at Possibility of Buying Clothes
Without Coupons**

WORCESTER (CP)— British war brides recently arrived in Canada get a great thrill from Canadian ration books. With fewer rationed articles and no restrictions on what they may be bought, buying will be fun.

In British houses most registered with rationed items at a specific shop and that makes food procurement an isolated business.

Quantities and prices are fixed in Canadian shops among one young British wife who has been a great success in the speedily allied drive. She soon got certain nations she cleared it will be for the allied authorities to collect P. of W. mail from these postal people and city in them where the country of origin is, and the movement of Canadian postmen is still working but it will be difficult to collect letters from Portugal.

The Agricultural Food Board will give the public usual own purchases of milk or any possible wonder. What we want in Canada Canada wants in getting off in milk production and we know the fluid milk consumption and the difficulty in between of carrying Canadian's agreement to supply 2,000,000 pounds when any previous loan and things look very bright for the year. THE PAS, Mass. (CP)—Wolf packs have been sighted in the district and farmers and game warden have taken special precautions to protect sheep and other livestock from the big bad ones.

Well! At Least He Had the Idea

EDMONTON (CP)—A young Edmon ton boy without a cent of his own didn't let that stop him from attempting to win a prize in the International contest for school children.

Early on the morning of the contest before his mother was awake, he took a faded bouquet of asters in the living-room, stripped off the dead leaves, cleaned the vase, added some newly-sprouted petals—the mother had taught him at the garden's a few days earlier—and his friend tribute was ready for the exhibit.

Although the judges didn't pick his entry as outstanding, he stoutly asserted they would have given him third place. "If one of my pictures hadn't been too big."

SCALDING ADVANCES VEGETABLE FREEZING

ABERDEEN, BRITAIN (CP)—A home scalting goes a long way" in preserving vegetables says Mr. George Hart, manager, 24 of Victoria, would you say is paid up seven feet in pair of skates. Bright-colored meat trays have been put out in England for freezing, meat and vegetable containers.

Canadian, maple, fresh fruits, milk, cream and butter—the pleasure in Canadian's meat is a delight and an advancement the British girls coming to their home for special occasions.

The first part over a big deal. I found that old house of mine has a load of hay.

What's the good of a load of hay if you haven't got a horse?

The man says he'll be willing to load me like horses strong enough to eat up the hay.

One just put over a big deal. I found that old house of mine has a load of hay.
