1,466,000 Cheques to be Cashed Monthly by Canadians

"Starting sometime this month, the banks, through their branches all over Canada, are called upon to perform still another service to the public. They must and will be ready to negotiate the new government cheques issued under the Family Allowance legislation," said S. M. Wedd, President of the Canadian Bankers' Association, in a statement issued.

"Official estimate is that 1,466,000 individual cheques will be issued by the government each month," he continued. "Most of these cheques will be presented at the branch banks for encashment or deposit."

"All government cheques are cashed by the banks without charge. The banks willingly accept this added opportunity for serving Canadians, many of whom, perhaps, for the first time, will come into contact with the banks and with the useful services they perform."

"We shall welcome all of these people and aim to cash Family Allowance cheques with speed and efficiency. At the same time it is my duty to stress the need of the banks for co-operation on the part of all who receive cheques."

"Recipients of Family Allowance cheques can help themselves and the banks by remembering four simple requirements:

1. The need for proper identification at the bank.
2. The need to make sure that a cheque is correctly endorsed.
3. The need to guard against losing a cheque after endorsing and before cashing it.
4. The importance of going to the bank in the morning hours if possible.

"First of all, of course, is identification—a bank must be sure that the person presenting the cheque is the right person; therefore if the holder of a Family Allowance cheque is not known in the local bank, he or she should take into the bank when presenting it somebody who is known in the branch. This will help to obviate delay and misunderstanding."

"Next, is the endorsement on a cheque. It must be endorsed exactly as it is made out to the payee; after it is endorsed the payee should take no chances of losing it, or having it stolen before it is cashed."

"Recipients can help very greatly also by using the banks during the easier hours of the day rather than during their busiest hours."

"No doubt many cheques will reach the banks through merchants who cash them for their own known customers. Merchants and storekeepers would be well advised to make sure of the identification of any person offering a cheque and to make sure also that the cheque is endorsed exactly as it is made out."

THIS WEEK

By FRANK HINDS

TORONTO, July 3 (CP) — Attorney General Blackwell of Ontario has issued a statement regarding "the publicity campaign" going on in Toronto "dealing with sale of stocks in Ontario's mining industry" part of a plan to "revive the extradition treaty."

A disastrous blaze on Sunday at a hotel at Red Lake, northwestern Ontario mining centre, left at least seven persons dead or missing and 24 injured. Breaking out only five minutes after a night watchman had just found everything in order, the blaze swept the frame building in a spectacular flash fire.

Canadian Pacific Airlines planes rushed to town, nurses and supplies to the distant town, and flew the more seriously injured persons to Winnipeg for treatment.

Patrick Leonard Kieley, Kenora, Ont., cook, was arrested on a charge of arson in connection with the disaster. Employed by a diamond drill crew, Kieley says he can not remember what happened for several hours around the time of the fire. Details of the charge against him have not been disclosed.

Writs for a by-election were issued for Glangary constituency in eastern Ontario after Dr. W. H. MacDermid, Liberal member elected in the recent federal election vacated the seat to accept an office of emolument under the Crown. Announcement of the by-election was seen as a step toward re-election of Prime Minister King to the House of Commons. It is expected Mr. King will be nominated in the riding, but whether he will be opposed by any of the opposition parties would rest with local party organizations.

SCOTLAND LOOKS FOR FARM LABOR

EDINBURGH (CP) — Despite the fact that 20,000 prisoners of war will help gather Scotland's harvest this year, 12,000 volunteers from offices and factories will be needed to harvest grain along with 61,000 school children over the age of 12 to lift the potato crop, the department of agriculture has announced. The department said these numbers were made necessary by the vast increase in tillage areas, from 1,490,000 acres in 1939 to 2,113,900 acres in 1941.

NEW BUILDING MATERIAL

LONDON — A new synthetic building material which combines the properties of concrete and wood has been evolved in Britain.

It is made by mixing sawdust with concrete. Hitherto no way of marrying sawdust to concrete has been found but British scientists have discovered a chemical process which successfully blends them.

The new wood-concrete can be produced in bricks or sheets of any shape or size. It is especially suitable for interior walls or panelling, since it can be sawn, drilled or nailed, exactly like wood.

Unlike wood it does not warp, takes a high gloss and can be stained any color.

CANADIAN GENEVA

Quebec (CP) Mayor Lucien Horn announced he had received a letter from Mayor Robert Saunders of Toronto supporting "proposals to the San Francisco World Security Conference that Quebec city be chosen as permanent seat of the United Nations World Security Organization."

LONDON — Free milk, issued under the national milk scheme to expectant mothers and to children under five years of age, cost Britain \$50,879,368.14 in 1943.

AUSSIE ABORIGINE NOW ARMY OFFICER

CANBERRA (CP) — A full-blooded Australian aborigine has just become an officer in the A. I. F. He is Lieut. R. W. Saunders, the first of his race to attain commissioned rank. He served overseas as a sergeant, saw much fighting in North Africa and Greece, and was in Crete for 18 months under German occupation, but, as he puts it, "not as a prisoner of war." Instructors in the officers' training school through which he passed spoke highly of his ability. In the war against Japan, aborigines have done splendid work both on land and at sea. Their ability to live on the country and their skill in tracking and scouting and in bushcraft have been of great value in the jungle warfare in the regions of north Australia.

No full-blooded aborigine has yet gone to Oxford or entered parliament. But a half-bred was a Queensland Member of Parliament, and another entered the New South Wales parliament.

AUTHOR RETIRES
