In the household storage of garden fruits and vegetables, the question of arranging a suitable place is an important one. In an ordinary house, a storage room may be partitioned off in the basement, care being taken that It is as far as possible from the furnace. Because the main object is to protect the vegetables from high tengs perature and loss of moisture during the storage period, the materials used in the construction of a partition need not be expensive. NEW BRITISH SPEED CAR

Lieutenant Robert Morgan, a Brit sh Fleet Air Arm Officer, has after six years of research work, completed the plans for a new type of car designed to raise the present world speed record of 368 miles to 520 miles per hour. The invention represents a revolutionary novelty in design and construction of cars. The car conxists of a gigantic wheel approximately 12 feet in diameter, [Livestock, which contains the driver's seat and has a pear-shaped body which is largely made out of a special glass and light metal. The car, which the inventor has called the "Bomb" fuel, and works almost on the same saturated on the Nassayaweya and Es According to the inventor, the "Bomb" will only be used after measurement and testing of fuels lubriciants and combustibles and after the reaction tained to the "hightning" ride. In his ar will result also in the practical Mare, 9 years old possibility of a journey into space. The "Bomb" weighs about a ton and Dec 1st, Black Heifer, bied in July, will cost ES,000
