#### THE VELLOW WHOT TIME TO RE KIND

The fellow who'd time to be kind was With an awful lot to do; The day was over and half the

night. Before this man was through. But still, no matter how great the

That weighed upon his mind, No matter how hungry and tired he He'd always time to be kind.

He'd time to get out of his automobile If he thought you looked downcast, And tell you the weather was glorious, That summer had come at last; And spin you a couple of funny yarns And leave a smile sehind -It made him 5 minutes late of course, But still, he'd time to be kind.

He never had time to cherish grudge. Such things soon sickened and pined There never was room for weeds to

In the soil of his crowded mind. And so he never will find The shrine that memory dedicates To the fellow who'd time to be kind

## This Bulletin Will Be Useful Just Now

In the household storage of garden fruits and vegetables, the question of arranging a suitable place is an important one. In an ordinary house, a storage room may be partitioned off in the basement, care being taken that It is as far as possible from the furnace. Because the main object is to protect the vegetables from high tenperature and loss of moisture during the storage period, the materials used side wall of the house for ventilation and temperature control, which may also be aided by the door of the partition being opened or shut as requir-

is best, but as nearly all of the floors a covering of sand three or four inches in the partitioned part will mak. of lumber slats one inch thick by four to ensure circulation of air possible and not higher than 38 de-

ground until dry and the operation little boxes on their brows, but alas! Pine: 100 ft Rubber Garden Hose son as possible. Where necessary, tops hearts (Matt. 23: 5). should be cut off at once to prevent of the vegetables. Further inform- opening of His public ministry. In | fat. #### NEW BRITISH SPEED (AR

Lieutenant Robert Morgan, a Brit sh Fleet Air Arm Officer, has after all years of research work, completed the plans for a new type of car designed to raise the present world speed record of 368 miles to 520 miles per hour. The invention represents a resolutionary novelty in design and construction of cars. The car consists of a gigantic wheel approximately 12 feet in diameter, Livestock, which contains the driver's seat and tins a pear-shaped lasty which int largely made out of a special glass and light metal. The cut, which the inventor has called the "Bomb" is jet propelled. It uses liquid gas as Lot 20, Con. 7, two of Nassagaweya. fuel, and works almost on the same principal as the German V2 rocket. According to the inventor, the "Bomb" will only be used after measurement and testing of fpels intricants and combustibles and after the reaction of the bulnan body has been ascertained to the "lightning" rule In his opinion, the construction of the new car will result also in the practical possibility of a journey into space. The "Bomb" weighs about a ton and will cost & H.(WH)

### Compressed Sawdust New Domestic Fuel

FORT WILLIAM, (CP) The answer to an old problem of what to do with the waste sawbust from sawmills has been found in the manufacture of a new form of domestic fuel produced [Con 4, Nassagaweya, on the Rockwhen the sawdust is pressed into the wood line, 21, miles cast of Moffat on form of small logs.

A new plant at Fort William the first in Canada has begun produc tion of the material, called Press-toling, which is made by subjecting the pounds per square inch in small cylin- milking, bred Sept. 30, 2 Heifers, ders or dies

The pressure breaks down the structure of the sandust particle, eliminates moisture, and produces a small log, 121, inches long, four inches in diameter and weighing eight pounds, which is comparable to the weight of rock and coal

Press to log is of much the same composition as coal, which is vegetation, usually frees, subjected to pres sure underground for thousands of The Undersigned Auctioneers have the method of pressure last been hast. Wagon, Set Sloop Sleighs, Set Scales

Value of Press to Log as fuel has to sell by Public Auction at the farm, been proved by tests most conder value ous comfittions in the United States quesing town line, about 41, miles Among its advantages are that it torns well with a nonmoun of ash sand and smake

It should particularly appeal to horrewises because a basement stockof with this fuel can be kept as clean about 14's) lbs, a real good term, as any other room in the house, and up farming brown Mare, Clyde, I years old, Grey the logs can be handled without soilthe the hands -

MORE FARMERS PLANT De Kalle than any other Order your DeKalb Now from DONALD McNABB R. R. No. 2 Georgetown, Ont.

To keep step with farm progress and to extend service to more farm families. the telephone industry is working on important new devices and methods.

Plans are already under way for resuming the rural telephone expansion program suspended in 1940, when equipment and material became urgently needed for the armed forces. Surveys are being made to determine the needs and to provide the facts for carrying out plans to expand farm telephone service.

The goal is to bring the telephone to the greatest possible number of farm families.
