

The Week at OTTAWA

By H. L. JONES
Canadian Press Staff Writer

OTTAWA (CP)—Canadian labor problems hold the attention of Parliament as the Commons seeks to wind up its session by mid-November. At the weekend the Ford strike at Windsor still defied the best settlement efforts.

Parliament heard a warning from Labor Minister Mitchell and got a future employment picture from Reconstruction Minister Howe. From the opposition it got some criticism. Social Credit leader Solon Low said the Commons there was content among industrial labor and that there was but the doubt that there was a backlog for a period of some unemployment.

Labor Minister Mitchell told the House that Canada could not and would not attain a period of full employment in peacetime unless management and labor work together. He knows and strikes he said would be a milestone on the streets of reconstruction. At present every effort was being made to keep men from being discharged and to secure such payments that had been made between April 1941 and July 1943. Actual payments to date totalled \$8,880.

What must be done is to make both men and the minister said the industry may say on freedom of choice of jobs and services by the workers and employers respectively. He believes the later is more important while necessary to work out a lasting place in the Canadian scene in times of peace.

The minister added to the hope the Ford strike would soon be settled. But even as space new negotiation meetings between the union and the company at Windsor broke down.

Post-War Industry

Mr. Howe's reconstruction picture was both interesting and encouraging so far as labor was concerned. He said that at least two-thirds of government-owned war plant capacity could be put to good use in peacetime. Plans had been made for continued operation of government plant capacity with a total value of more than \$200,000,000 or about 30 per cent of the government's wartime plant investment.

The picture so far as private enterprises were concerned was not complete. But indications were for a big expansion—say in millions of dollars. In 1943 plants some 170,000 had been employed in 1943 and more than 345,000 in 1944. These companies, the minister said, expected to employ 220,000 persons in 1945 than they did in 1944 within one year of completing their reconversion.

Canada has indeed grown with the war. Mr. Howe said that at least 100 major products never before manufactured in Canada now will be made here in the post-war years—everything from buses to prefabricated houses, plastic products and chemicals.

On future employment the minister gave this picture: if conversion would cause temporary jobless unemployment, but it was his belief by next spring there would be sufficient job to prosecute the need for public works. These he hoped would not be needed for another year or two.

Meat Rationing

Prime Minister Mackenzie King returned to Canada and to the Commons seat during the week, fresh from his trip abroad and atomic energy conferences with Prime Minister Atlee and President Truman at Washington. He did not immediately report to Parliament on his trip and his talk but he did not fail in time to make a new statement on a famous but subject—the meat rationing.

Following some time in the United States that means a statement would be set on the calendar Nov. 24. Mr. King said that Canada would not follow suit, Canada's position might be reviewed at that time. The U.S. delayed its own statement as the government's main concern at the moment is to get the economy as far as it can fed and satisfied without other measures.

Thus Mr. King's statement probably will come in the second half of November. It is likely to be a statement of what was done in the U.S. and what Canada will do in the same period.

However, the statement will be given in the first half of November. It is likely to be a statement of what was done in the U.S. and what Canada will do in the same period.

But for Canada perhaps his most immediate message was that his Empire government's reorganization of British industry and agriculture would prove no obstacle to steady and increasing trade between Canada and Britain which has been her best customer.

His party, he said, stood for an expansionist economy and he hoped never again to see the starvation-angli-

plenty tragedy of 1931. The labor government, he said, held it of vital importance that there should be a steadily increasing standard of life for the masses of the people throughout the world.

HIS GARDENER WAS KILLED

A columnist who for many years has publicly championed the drink habit, wrote sentimental pieces when his gardener was killed while drunk. He reported that his office gardener spent his evenings in drinking tournaments. Naturally the mornings he would feel pretty rough and once when wrung his aching head, he offered a short speech he regarded us as his friend and protector.

Rather nondescriptly the columnist described the fatal ending. "We think he had his mind on with the night he was killed. He had also a lot of talk but either the one or the other had any connection with the assault upon him we do not know. The presumption is that somewhere he took more beer than he could safely handle and wandered into a dark sat down to meditate upon his woes. He was struck and killed during early or four days after the accident. A few reflections are obvious. Drink and the drinker become the focus of suspicion and as such are often the cause of death. The lesson to all is that drunkenness and carelessness of safety are dangerous. Even a suggestion of the drink traffic and the drink habit should when appropriate, border on the absurd. No man's sin is an unforgiving attitude to drink towards the infected problem.

What must be done is to make both men and the minister said the industry may say on freedom of choice of jobs and services by the workers and employers respectively. He believes the later is more important while necessary to work out a lasting place in the Canadian scene in times of peace.

The minister added to the hope the Ford strike would soon be settled. But even as space new negotiation meetings between the union and the company at Windsor broke down.

BLACK DAYS AHEAD

The picture of alcoholism in years to come is foreboding. World conditions are sending people neurotic. There is conflict of race against race and class against class. There is hate, fear, anxiety and hopelessness. Amid these conditions thousands of frustrated people are going to turn to drink, not for fun but as an emotional panacea. They will seek release in alcohol.

The head of a gamut of caring foundations says that the government should even now be making preparation to care for "a deluge of women alcoholics." Eleven years of women beer rooms in Ontario have begun to yield an increasing number of drunks among women. Hospitals refuse to take them and the jails cannot accommodate them, and their own homes can no longer endure them. Yet the government is selling more drink to get more revenue because of the destruction of health and happiness among the drinkers, both men and women.

RECORD BEER OUTPUT IN UNITED KINGDOM

A wartime record beer production was exceeded by the United Kingdom last year, an report from London quoted in the Economic Times. Official figures show the output of beer at 1,000,000 barrels a year, exceeding the 1940 production figure.

Assuming that the regular output of the 1940 improvements of 1941 totalled 1,019,000 barrels, which is about 100,000 barrels above previous four-quarter average war year.

RECORD STRIKE

VANCOUVER, B.C.—Indians at Bella Bella B.C. probably have set a world record for strikes. Fifteen men held up by wet-cold weather for 15 days over a dispute with a salmon fishing company over the price of young salmon. They haven't caught a salmon since.

DAMP DELAYS FARMERS

CHARLOTTETOWN (CP)—Farmers in Nova Scotia lumber production this year is expected to reach 22,000,000 board feet. Last year they had a dispute with a salmon fishing company over the price of young salmon. They haven't caught enough to mature before the autumn when in 1940 was 302,000,000 board feet.

LUMBER CUT UP

HALIFAX (CP)—Nova Scotia lumber production this year is expected to reach 22,000,000 board feet. Last year they had a dispute with a salmon fishing company over the price of young salmon. They haven't caught enough to mature before the autumn when in 1940 was 302,000,000 board feet.

NEW STREAMLINED STATIONS

In contrast to the familiar frame buildings of the past, this new station at Pendleton, Ont., stressing modern lines and a bright interior, is a forerunner of what smaller stations on the Canadian Pacific Railway may look like when

building restrictions are eased. Three other new C.P.R. stations in Ontario at Lewisdale, Marathon and Whitchurch Hill are included in the program of experiment to develop a model as part of an overall improvement plan.

BANK OF MONTREAL

Reports—

TO 4 MILLION CANADIANS

More than a million Canadians keep their money safe in the Bank of M. Each of its Banks, branch and deposit agencies is a branch of the Bank of M. Now, instead of 4,000 branches, there are 5,000. This means that the Bank of M has more places to do business and more opportunities for you to do business with the Bank of M.

Business firms and private citizens from the Arctic to the Pacific have, during the war, borrowed and repaid more than \$100,000,000 from the Bank of M. Now, instead of 4,000 branches, there are 5,000. This means that the Bank of M has more places to do business and more opportunities for you to do business with the Bank of M.

Well over one hundred thousand individuals, Canadian, American, foreign, have invested in the Bank of M. Now, instead of 4,000 branches, there are 5,000. This means that the Bank of M has more places to do business and more opportunities for you to do business with the Bank of M.

Businessmen, accountants, to support their families, have invested in the Bank of M. Now, instead of 4,000 branches, there are 5,000. This means that the Bank of M has more places to do business and more opportunities for you to do business with the Bank of M.

In meeting the needs of over one and a half million Bank shareholders, to do business with government and other family and business firms, the Bank of M has increased its resources from \$1 billion to over \$2 billion dollars. The majority of these are cash, for securities, insurance and real estate, and are readily marketable.

RESOURCES WHICH THE B of M HAS TO MEET ITS OBLIGATIONS:

CASH \$ 16,267,581.42

MONEY \$ 12,063,250.42

INVESTMENTS \$ 11,760,682.83

STOCKS \$ 1,000,000.00

CALL LOANS \$ 1,000,000.00

QUICKLY AVAILABLE RESOURCES \$ 1,000,000.00
