The Week at OTTAWA

BY H. DENY HODGSON Canadian Press Staff Writer

OTTAWA (CP) Canada last week bumped squarely into the fact international maturity and responsibility sometimes bring in severe diplomatic headaches.

The full meaning of this new-found international responsibility, an outcome of Canada's large contribution to victory, burst on Canadians in a new and somewhat alarming gular with the violent Moscow reaction to a disclosure in Ottawa that leakages of secret information to a foreign power were being investigated

It all started with a carefullyworded statement by Frime Minister Mackenzie King, who said a Royal Commission inquiry was being made into disclosures of secret and confidential information to unauthorized persons, including some members of the staff of a foreign mission in Ottawa. Some appeared "far more deeply and consciously involved than been made The case, he added, would remain "sub judice" until the pore (M. A. 1) investigation was concluded.

Sub judice or not, there was no steming the tule of sumor, auspicion, report and denial that flooded the capital and other parts of the August, 1915; Controlling Authority, country after the prime minister's Nipponese Army High Command in announcement.

It was Canada's first major spy story, and even the sparse and guarded information available was tinder for wildfire curionity Artful Journallatic prodding at impregnable government sources established some basis for belief that the Russians had been building up a vast "fifth column" in Canada; that the information sought concerned everything a spy might be interested in including atomic encigy, radar, arctic weapons and Canadtan economic and political structure. the Russians were said to have employed a system of "blackmail" in getting information by first obtaining innocent data and then threatening government officials with disclosures that they had previously committed! the indiscretion of supplying unauthorized information, an Ottawa agent had "spilled the works" to RCMP officials when threatened by Soviet minions.

Strangely enough, the first official Information that Russia was the power involved came from the Soviet itself. Without having been named officially by the Canadian government, the Russian government issued a statement saying its military attache in Ottawa, Col Nicolai Zabotin, had been given certain information of "a secret character" from Canadian citizens, and that he had for this reason been recalled

The Moscow statement said any information received was of no value to Russia since that country had superior technical facilities and chided Prime Minister Mackenzle King for eign Minister Bevin the "face" the latter was said to have lost at the U.N.O. conference in London. It added the action of the Canadian prime minister was, "not compatible with friendly relations between the two countries."
