#### How True The Headlines?

week in the water aituation, particularly by the late a concrete contribution toward solving an urgent editions of The Toronto Star, one may well pauso and desperate human need. to consider the headlines about other places with. The world food problem has reached such magwhich we do not have close contact. Certainly the nitude that millions of people in Europe and Asia headlines carried in the late editions of "poisonous" are faced with famine conditions. This is in additand "deadly" water in Acton were, to say the least, ion to the overwhelming task of rehabilitation and greatly exaggerated and we've heard other words reconstruction both national and personal that inused to describe the Star stories that were a lot critably follows in the wake of war.

stronger. are not contradicting the fact that the water in many to alleviate the situation. To this end Prime Mintaps was dirty and had smelling for a few hours on ister King recently announced a nine-point program Saturday. So far there is nothing to prove it was aimed at restricting the amount of food used by Canpoisonous or deadly and at time of writing, a week | adians, maintaining war-increased farm production later, we have yet to hear of any illness directly and providing more for famished lands. traceable to the water supply. Folks in Acton are liable now to take the screaming headlines not very duction and a reduction in Canadian consumption soriously after the local experience and wonder what of wheat and its products in order to step up supplies little truth may be in any of them.

## A Vast Change

When the auto salesman starts calling on his prospect list this summer he is likely to discover that there has been a vast change in buying habits since 1030. Old customers in the medium salaried class who used to buy a new car regularly every other season may have to be convinced that they can afford a new vehicle after waiting five years. And purveyors of radios, furniture, rugs, refrigerators and a score of other goods in the semi-luxury class are going to meet the same resistance, because the "surplus" money that used to be available for such purchasing now largely goes to Mr. Ilsley and to meet the higher cost of necessities. The fact that there are now almost twice as many Canadians carning \$5,000 a year as there were in 1919, and the same proportion would hold for the \$3,000 and \$4,000 citizens too, makes no difference. Sharply higher taxes and an increase of more than 20 per cent, in the bare necessities of life has drained away the bulk of the surplus purchasing power of the medium salaried classes .- The Financial Post.

## Getting A Dollar's Worth

C. L. Burton, C. B. E., head of one of our largest mercantile companies, claims Canada's urgent need is to cut out controls and promote production. He says Canada must choose, and choose soon, whether to have:

1. Large production and full employment; or

2. Small output and unemployment, due to price

ceilings and wage controls.

This question of government restrictions on prices and industry certainly has become confusing to the ordinary citizen. It isn't made any clearer when we find two of the biggest industrialists in the United States directly opposed in their opinions on the subject. Henry Ford II, for instance, favors'removal of all restrictions, while on the other hand Henry Kaiser claims such action will spell econom- Acton and Milton. ie disaster.

Those who favor removal of controls say large production and keen competition should combine to Ontario budget for the maintenance of the Premier, min employment. Those in opposition say the result school boards as extravagant bodies and out on a will be sky-rocket prices and inflation.

The decision which our economists and experts must make is one which demands the greatest atudy and consideration, because our future prosper- providing industries in order that its young people ity is at stake.

The working man and farmer are not interested ment. Industries mean payrolls and payrolls enable In higher incomes if it means the cost of living will young people to stay and help build up their own Sump out in proportion. What they want is a dollar home communities. Boards of trade and municiwhich will purchase a dollar's value, not fifty cents palities should encourage these industries .- Altona worth.-Barrie Examiner.

City Paper Pays Tribute to the Home Town Paper

Turning from the city to the small town papers that come to us is like stepping from the clums, full of vice, into an old-fashioned garden aweet with lavender and thyme and the scent of perennial flowers. The pages of the big dailies are so full of murder, thievery, immorality and selfishness that the better news is obscured by these glaring shatterings of the Decalogue. One puts the paper aside with a feeling of depression and heartache that the world is so full of terrible and unhappy things.

Then picking up the papers that record the happenings of the little towns around us, one gains renewed faith in life. Here are set forth only that which uplifts the community-the activities of the husiness men, the church items, the happy social gatherings of the people, the swarriages, births and deaths, farmers' items, and all the thousand and one daily occurrences that make up the simple annals of the great common people, who are really the foundstion of this country of ours.

Scandals are seldom published in the country newspapers, but if it so happens that decency demands it, the uglier dotails are omitted or given a kindly touch that is widely different from the unfeeling publicity of the city press. The offenders may be our neighbors, or people we have rubbed elhows with all our lives. They are real human beings to their town paper, while to the great city dailies they are merely grains of a sort that are ground out hourly in their new mills.

Sometimes people speak lightly of the country newspaper, but it is one of the most potent and up lifting factors in our national existence. Christian Science Monitor.

### Now to Nave

Canada, as one of the great food-producing coun-The situation might have been a serious one. We tries of the world, has undertaken to do her utmost

> The problem is essentially one of increased proof exportable food. Here is where every householder who has a piece of workable ground can do his

> High up on the government's food-saving program is the encouragement of home gardens. The announcement came in plenty of time to allow backyard gardeners to lay their plans. At first thought planting an extra row of lettuce would not appear to make much impression on the famine situation, but more home-grown potatoes and other vegetables would affect family wheat requirements.

> Like every plan for alleviating human suffering the current food production program calls for effort on the part of individuals. However, benefits will not be entirely one-sided. . Nutrition experts assure us that backyard gardeners get better food, for the clusive vitamin has less chance to escape oil its journey from garden to table.

## EDITORIAL NOTES

A firm conscience is better than a stiff upper lip.

Freedom to say what we think is important, but the courage to do what we say is even more so.

A home that isn't fighting for something beyond itself will become simply sweet or decidedly sour.

New cars, like other things, are just to be looked at and not for general use, but another few months

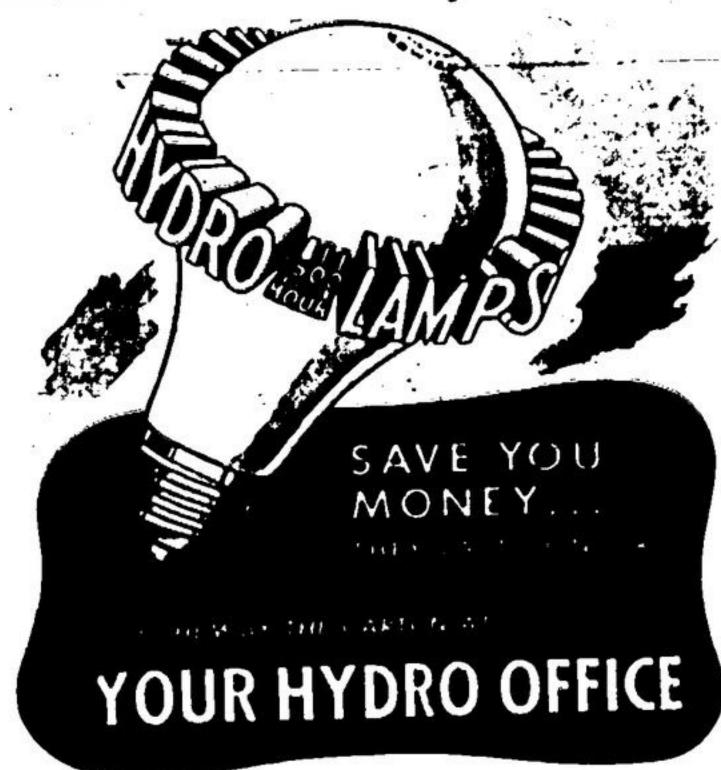

is neither here nor there.

It's said that the better weather has created a new demand for new tires and sales have been much heavier this month.

Appropriations for highways have been doubled the Ontario budget. Still wondering after twenty-five years if it will include the road between
