MARKED GOLDEN WEDDING EVENT SUNDAY, JULY 13th

Sunday, July 13th, Mr. and Mrs. R. M. Armit (parents of Mrs. David Richardson) were at home to their many friends and relatives on the occasion of their golden wedding.

Receiving the guests were the three daughters, Mrs. G. Sutherland, St. Catharines; Mrs. D. Richardson and Miss Barbara Arnot of Toronto. Pouring tea and assisting at the tea table were Mrs. Wm. Laing, Schenectady, N. Y.; Miss M. Scott, Pittsburg; Mrs. J. Crombie, New York City; Mrs. A. North, Toronto; Miss Bernice Arnot, Toronto and Miss Margaret Sutherland, St. Catharines. Mr. and Mrs. Arnot appreciated the good wishes from many friends on this occasion.

THE CYGNEK-ROSLY WEDDING AT ST. JOSEPH'S CHURCH HERE

St. Joseph's Church, Acton was the setting for the wedding on June 28th at 10 a.m. of Sophie, only daughter of Mr. and Mrs. Karol Rosly, R. R. 1, Acton, to Raymond Cygnek, son of Mr. and Mrs. Joseph Cygnek, of Poland. Father Morgan officiated. Given in marriage by her father, the bride wore a broadcote white nylon gown with a sweetheart neckline and slight train and her sweetheart head-dress had a full length veil. She carried a cascade of red roses and wore a single string of pearls, the gift of the groom. Miss Stella Zajac, the maid of honor, was gowned in pink. The bridesmaids were Miss Christina Dabrowski of Toronto, Miss Helen Kot of Hamilton and Miss May Rennie, Georgetown, who wore blue, lime green and pink respectively and carried cascades of pink roses. John Grezbowski of Erin was best man and John Talpa, Bill Bak and Chester Dabrowski, Toronto, acted as ushers. At the reception which followed at the bride's home, Mrs. Rosly received wearing a navy, rayon with white accessories and a corsage of red roses. Guests attended from Toronto, Hamilton, Guelph, Georgetown and Erin. The couple motored to different points in Ontario for their honeymoon and upon their return they will live near Acton.

WASTED EFFORT

When Bob Hope was on an entertainment tour of Great Britain during the war he saw a British soldier standing beside a winch from which a cable ran straight up into the foggy sky. Curious, but friendly Hope asked the Tommy if there was a barrage balloon at the other end of the cable. The soldier answered: "If there ain't then I'm doin' the bloomin' rope trick."

Young Milton Flyer Missing on East Coast

Lieut. Robert Malcolm Galbraith, 25, was taking a refresher course in flying during his vacation when he and companions reported missing—Searchers work on sea and land.

Sad news reached the home of Mr. and Mrs. Robert Galbraith, Queen St., last Friday morning when they received word their son, Lieut. Robert Malcolm Galbraith, 25, was reported missing during exercises while flying on the east coast of Canada.

Using his vacation period to take a refresher course in flying, Lieut. Galbraith was observer of a Firefly single motor craft in which Lieut. Jack L. Lamson of Toronto was at the stick when it was reported missing about 4 o'clock Thursday afternoon near its base at Eastern Passage, about 40 miles east of Halifax. The plane was last seen over Clam Harbor, a village east of Halifax.

Fog has hampered searching planes since the mishap and according to Canadian Press reports, has hampered shipping as well. On Monday an oxygen bottle was found on the shore of the bay which was the fourth piece of wreckage picked up by fishermen. Previously the undercarriage of an aircraft was found, a gas tank came in a fish net, while a radio tube was shed up on the beach.

Drugging operations were scheduled to begin Tuesday in Clam Bay while a ground party continued its search as Navy and R.C.A.F. boats were combing the waters. Searching aircraft was grounded during the week-end owing to the heavy blanket of fog. It was reported.

Employed with the Bell Telephone Company since his discharge, Lieut. Galbraith has been stationed at St. Catharines. His parents were quite shocked to receive word that their son was reported missing. His mother said Malcolm was not a very good letter writer, but had heard him mention he was going to take a course during his holidays. She said he was very busy with his work and his interest in flying was so great, she thought he did not have time to write home and they were very surprised when they received the telegram saying he was missing.

Born in Milton, he was educated at Milton Public and High Schools. He enlisted with the Canadian Navy in 1942 and after preliminary training he thought he "would like to get in the air" and was transferred to the fleet air arm stationed at London. Since his discharge he was a member of the Naval Reserve base at Hamilton. He was also a member of a Hamilton flying club.

Though employed at St. Catharines he was stationed at H.M.C.S. Star, Hamilton. Keenly interested in all things pertaining to the navy, he attended all the drills and gatherings of the Star. "He was one of the most popular officers of the Star and well liked by everybody there," said Commander S. F. Ross, commanding officer at H.M.C.S. Star, commenting about the young officer. His superior could not speak too highly of Lieut. Galbraith and of his interest in naval affairs.

Beat the Heat

During the hot spells of summer those who are employed in the so-called "hot jobs" of industry should be instructed in a few simple rules, such as—

1. The skin must be kept clean; a bath should be taken at least once a day. If a bath tub or shower is not available a simple sponge bath from a basin or pail will do.
2. Clothing should be as light as compatible with working conditions.
3. Food consumed should be about half that eaten in winter. Food containing large amounts of fat and sugar should be avoided.
4. The use of alcohol in any form should be very moderate.
5. Plenty of cool (not iced) water, lemonade or orangeade should be taken.
6. If an individual develops that common condition where his thirst is not satisfied by ordinary water, salt is needed. A half teaspoon of ordinary table salt to a glass of water is usually sufficient.
7. Where men are at work this need for salt can be best met by salt tablets. Suitable tablets and dispensing machines are now on the market. Dispensers should be located near drinking fountains.

It has been found that tablets containing 10 to 15 grains of salt or 10 grains of salt and 5 grains of glucose are very satisfactory. The dose is 1 or 2 tablets taken at intervals of 1 or 2 hours during the hottest part of the day. A total of 6 tablets daily is usually adequate.

SUMMER DISH

Suggestion of government nutritionists at Ottawa for summer diet is ice cream, which they point out, is nutritious as well as palatable. Ice cream, in addition to a mixture of cream and other milk products, includes such things as starch, sugar, gelatine, gum arabic, flavoring extracts and eggs. To tempt jaded appetites, the food experts further suggest a "topping" of fresh strawberries.

Early to Bed Early to Rise

The old saw, "early to bed, early to rise, makes people healthy, wealthy and wise," appears to have been founded on scientific fact. There must be a great virtue in morning light. Early risers and early sleepers achieve more, learn more, and enjoy better health than the average of their fellows.

City-slickers, who can sleep soundly through the morning roar of traffic are awakened at dawn on the farm by the singing of the birds and the sunshine in the window. Hearing the cheerful breakfast noises from the kitchen, they rise to enjoy the morning magic.

The shining haze, the gleaming dew, the washed and brightened colors of the trees, shrubs, and flowers captivate and entrance them. The overwhelming beauty, the assurance of well-being, and the thrill of harmony, inspire an appreciation of morning they have not known.

The new discovery of the morning prompts good resolutions to rise at dawn each day, but the good intentions fade in the glare of the dance floor of the evening. The next morning they come sheepishly down to breakfast at ten, five hours after the wise began the enjoyment of the day.—The Scene.

FARM PROSPERITY

The country hopes most earnestly that the coming season will be a successful one for the country's farmers. The prosperity of the whole country will be prosperous.

After money flows into the farm country, it comes back in the form of orders for farm and household equipment, interest on mortgages, and for various things. This plays a great part in keeping the factories busy, and labor employed.

The country looks with admiration at the marvellous gains that have been made for agriculture by modern and scientific methods, and by countless new ideas for farm production and management.

HOPES FOR THE FUTURE

We can all hope that the time will eventually come when all great nations will become democratic, and when the people of such nations will have no desire to engage in any war of aggression. Even if democracy thus spreads over the whole world, the people of some countries might still be convinced by misleading propaganda that a war of aggression would be desirable. At least under democratic government all over the world, the chance of war will be greatly reduced.

Any such development of democracy is too far in the future to be counted upon now. So far as we can now see, the democratic nations need such military protection that no attack on them could possibly succeed.

KEEPING COOL

In addition to wearing light, loose clothing, Canadians should drink a little water at frequent intervals, to offset heat in summer. In excess quantities, create greater thirst. Medical officers suggest that a five-grain salt tablet, two or three times a day, with the water, will help compensate for the loss of water and salt in the system through perspiration, and prevent heat cramps.

BEE'S SWEET TOOTH

So as to determine their value as nectar producers, cultivated and wild plants have been established in nursery plots by the Bee Division, Experimental Farms Service, Dominion Department of Agriculture. One plant showing much promise is Anise Hyssop, a perennial commonly found in Manitoba and Alberta. During the blooming period of 48 days, the plant was visited continuously by bees for nectar and pollen.
