USING PRACTICAL JUDGMENT

Some towns are said to be asleep and it is claimed that they are missing oportunities to go ahead Also there are many communities which are called live towns, which are receptive to new ideas and considering how progress and development can be secured.

It is not necessary for a community to spend money extravagantly in order to obtain a reputation for being a live town. In such a comnunity there is a great deal of practical judgment which will postone or abandon plans that seem Sunday was appointed as a day of too costly for the resources of the community. In a live town people are likely to be considering carefully the means by which their community can make progress and making plans for such gains and done with any satisfaction-that is if one wants-to hang it out and

Are You Asking These Questions About Saving Electricity?

IS IT STILL NECESSARY TO SAVE ELECTRICITY?

Yes. Not nearly enough saving is yet being made, especially in the home. Result, for some time past several large industries have had their power supply cut off for lengthy periods in the 24 hours.

IS IT NECESSARY TO SAVE ONLY AT CERTAIN HOURS?

No, it is vital to save at ALL hours. While electricity cannot be stored, water that generates it can be stored. The water storage for the five Hydro plants in the Niagara area is provided by the Great Lakes. This assures a continuous flow of water sufficient to enable these plants to go all out 24 hours a day-still there is not enough power. In 48 other Hydro generating stations throughout Ontario the water supply must be very closely guarded-if too much electricity is demanded one day, the next day's power supply must suffer. This condition is aggravated by the abnormally low rain fall last Autumn.

MUST HOMES DO ALL THE SAVING?

Not by any means. ALL consumers must play their full part. Modified rationing has to some extent reduced the consumption of, electricity in stores and by other commercial consumers, but still greater voluntary savings are urgently needed.

HOW CAN I SAVE MORE ELECTRICITY?

Don't leave lights burning in unoccupied offices. Turn idling motors off. Use range elements as short a time as possible. Turn off verandah and all other lights when not needed. Use electrically heated water sparingly. Do not use electric heaters or grates.

Avoid All Waste - SAVE ELECTRICITY!

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO
