E. Braida Shoe Store

Installs New X-Ray Machine
to Aid Fitting Footwear

NO GUESSING!

Our Primex X-ray shoe fitter makes it possible to see how shoes fit before you buy. This assures satisfaction and comfort.

We have added a new, modern X-ray machine to our store. This machine reveals any deformity of the bone structure of the foot and it not only helps to select the proper shape shoe but it also determines if the shoe fits properly as to width and length. The machine is adjusted for three degrees of penetration, low for children, medium for women and high for men. In this new X-ray machine the flesh as well as the bone is shown so that it is absolutely impossible to fit shoes too short.

This is especially important to children, because short or improperly fitted shoes can greatly damage the soft, pliable bones of a child's foot. It eliminates guessing when fitting children's soft feet for it is well known that youngsters may not know "how the shoes feel" nor be able to express their opinions. This X-ray machine permits you actually to see the fit of shoes before they are purchased and worn.
