

## Announcement!

Commencing MONDAY, MAY 9th, we will have a Beatty Salesman, direct from the factory, calling on the homes in Acton soliciting sales of Beatty Washers, Trainers, Vacuum Cleaners and Floor Polishers.

You can rely on this man as he represents both the Beatty Manufacturing Co. and Talbot's Hardware, the Beatty agent for Acton.

Also we have installed a complete repair department and are now able to repair Beatty Washers at our store with genuine Beatty parts.

Bulk CHOCOLATES, assorted, Special 1b—48c  
Chocolate MAPLE BUDS, 1b. 75c

## HINTON'S

5c to \$1.00 Store

### Halton Young Men Gold Medalist at O.A.C.

At the recent graduating exercises for the Associate Diploma Course at the O.A.C., J. H. Maw, formerly of Palermo, was declared the best all-round student of the course and received the Students' Council Gold Medal. Jim also took a prominent and leading part in the College Royal, both in 1948 and in 1949, and was declared grand champion showman.

His many friends in the Palermo District will be delighted to learn of his success and will wish him well in his new position with the Halton Purina Company.

### Trafalgar Township Farmer Appointed Judge for the 1949 Royal

J. H. Willmott, well-known Hampshire breeder of Trafalgar Township, was recently signally honoured by being selected to judge both Hampshire and Suffolk sheep at the 1949 Royal Jubilee, many friends throughout Halton will be delighted at this well merited recognition.

### Club Members Plan Active Program

The Court House, Milton, was crowded with rural young people on Friday evening last. It was the occasion of the initial meeting to complete the organization of the Boys' and Girls' Club Projects for 1949, for Milton and district.

Agricultural Representative J. E. Whitehead, assisted by A. T. Woodley, well-known Trafalgar Township Holstein breeder, was in charge of the meeting. Four clubs in all were organized and the election of officers resulted as follows:

- Halton Baby Beef, Guernsey and Jersey Club**  
Number of members—30  
President, John Willmott, Milton; Vice President, Evelyn McCann, Milton; Secretary Treasurer, John McKinnon, Milton; Club Leaders, Guernsey Section, J. L. Chisholm, Milton, Jersey Section M. C. Beatty, Milton, Baby Beef W. H. Merry, Oakville
- Milton Holstein and Ayrshire Club**  
Number of members—26  
President, Stuart Alexander, of Georgetown; Vice President, John Pickett, Hornby; Secretary Treasurer, Douglas Ford, Milton; Club Leader, A. T. Woodley, Milton
- Halton Boy's Swine Club**  
Number of members—12  
President, Earl Wilson, Norval; Vice President, Howson Ruddall, Georgetown; Secretary Treasurer, Edwin Tyrell, Freeman; Club Leader, Bruce Reid, Georgetown
- Milton Boy's Beaver Oat Club**  
Number of members—11  
President, John Currie, Georgetown; Vice President, Fraser McNabb, Georgetown; Secretary Treasurer, Geo. Lucas, Freeman; Club Leader, W. E. Breckon

A very interesting feature of the evening's program was a panel discussion, the panel of experts consisting of M. C. Beatty, J. L. Chisholm, A. M. Brain, Erwin Gunby, W. H. Merry, Ross Segsworth and A. T. Woodley. And did those young people put the experts on the spot—the questions came fast and furious. All in all it was one of the most interesting Club meetings held in Halton in some years, and augurs well for an outstanding Club year.

### Assistant Agricultural Representative Announced

It was announced at the Court House, Milton, on Friday evening last, that Harold Baker, of Merrickville, who has just completed his third year at the Ontario Agricultural College, Guelph, where he is majoring in Animal Husbandry, will act as a part time assistant to Agricultural Representative J. E. Whitehead for 4 or 5 months during the summer. Mr. Baker will be working between the two counties of Halton and Peel, and will devote most of his attention to Junior Extension work. In his home county of Grenville, Mr. Baker was an active club member for six years and prior to entering at O.A.C. was a member of the Dominion Champion Dairy Cattle Club Team.

### Seeding Well Advanced

Despite catchy weather good progress has been made with seeding. A goodly percentage have completed the seeding of cereal crops. Taking the County as a whole it is estimated that at least three-quarters of the crop was in by Saturday last. The preparation of the land for corn will soon be under way and already we hear arguments as to the merits of open pollinated vs. hybrid strains for silage. Some growers are of the opinion that the open pollinated varieties make silage which keeps better with less spoilage. Experimental work at the Central Experimental Farm, Ottawa, reveals that if hybrid corn is ensiled at the same stage of maturity as the open pollinated, it makes equally as good silage. In other words, the respective sugar contents in the two types of corn are the same at the same

stage of maturity. Hybrid corn retains its green appearance for a longer period than do open pollinated strains. Hence many farmers have ensiled their hybrid corn at too mature a stage and therefore the reason for spoilage. A well-known Wisconsin corn authority recommends the sowing of a blended mixture—that is the mixing together of two or three different maturities of hybrid. For this County, Agricultural Representative J. E. Whitehead recommends equal quantities of the Canada strains 606, 645, and 606. Such a mixture he states, will provide a silage with plenty of grain from the 606 while the other two varieties will give additional bulk and the last named strain 606 being later maturing, will provide ample sugar to provide the proper fermentation to make good silage. It was also pointed out that quite a number of good dairymen in Halton and surrounding counties follow the practice of sowing a few pounds of sorghum with the corn.

Both practices have a good deal of merit and are worthy of a trial in 1949.

It has been reported from Buenos Aires that compared with 1948, the area sown to sunflowers in Argentina this year increased by 25 per cent to 4.4 million acres—a record figure. The corn acreage has declined by 15 per cent. Farmers have found the sunflower crop to be more profitable than corn. In addition, maturing wheat crops killed by frost, have been replaced by sunflowers.

THE PROGRESSIVE CONSERVATIVE PARTY

Everytime you see PONTIAC you'll say

That's it!

THE MOST Beautiful THING ON WHEELS . . . and PRICED RIGHT too!

Yes, Pontiac's first completely new line in more than seven years! Into its creation went years and years of research, trials, designing and re-designing, testing and re-testing. And finally everyone was satisfied . . . everyone said, "That's it . . . here's a car that's fine enough in every way—a car that incorporates the 14 major advancements we sought—and yet retains all the thoroughbred characteristics that Canadians have learned to expect from Pontiac."

So you are in for a thrill when you visit your Pontiac Dealer. You'll see a car of breathtaking beauty—a car with more comfort and roominess, broader vision, greater safety. It's a powerful, responsive car, easy to drive—and a pleasure to drive. You'll say it's a really remarkable motor-car value, whether you compare it with luxury cars, medium-priced cars, or other cars in Pontiac's own price field. For Pontiac is priced with the lowest! See it today!
