

# Personals

Mr. and Mrs. Alfred Fryer are holidaying at Inverhuron.

Mrs. Fred Anderson spent Saturday with friends in Toronto.

Mr. and Mrs. Harold Baxter and family have been holidaying at Waage Beach.

Dr. and Mrs. Neville Harrop and daughter of Kingston, have been holidaying in Acton with friends.

Mr. Alex M. Campbell, of Buffalo N.Y. spent last week at the home of Mr. and Mrs. Norman Robertson.

Mr. and Mrs. William Cooper have been spending two weeks at their cottage at Stanley Park, Erin.

Mr. and Mrs. Harvey Hazzard and son, of Forest, were visitors last week with Mr. and Mrs. E. J. Hazzard.

Mrs. E. Morgan and children, of Toronto, are spending the week at the home of Mr. and Mrs. Norman Robertson.

Mr. Albert Edmondson and his son, Mr. Russell Edmondson, of Bracebridge, called on Acton friends this week.

Friends are indeed pleased to see Rev. C. J. Peake able to be about again following an operation in Toronto Hospital.

Mr. and Mrs. David Conley, Patricia and Michael of Strathmore, California visited with Mr. Thos. Gibbons last Wednesday.

Mr. and Mrs. D. F. Wilds and children, Mr. and Mrs. J. Wilds, spent Sunday with Mr. and Mrs. Norman Wilds in Vineland.

Little Miss Doreen Gordon of Rockwood spent some holidays last week with her grandparents, Mr. and Mrs. A. M. McPherson.

Friends of Mrs. Alex Bell, Knox Ave., were sorry to hear that she had the misfortune to fall in her home last week and fracture her arm.

Friends will be glad to know that Mr. Jacob Bauer is progressing favorably following an operation in Toronto General Hospital on Saturday.

Friends will be glad to hear that Ted Freeman is recovering favorably following an emergency operation for acute appendicitis on Thursday night.

Mrs. Wm. E. Kentner of Bossvain, Manitoba, and her niece Marjorie Wain, whose birthdays occur on the same date celebrated together July 17th at the home of Mr. and Mrs. Robert Wain. Twenty-six relatives and friends gathered for the happy occasion.

Friends will be glad to know that Mr. Jacob Bauer is progressing favorably following an operation in Toronto General Hospital on Saturday.

Friends will be glad to hear that Ted Freeman is recovering favorably following an emergency operation for acute appendicitis on Thursday night.

Mrs. Wm. E. Kentner of Bossvain, Manitoba, and her niece Marjorie Wain, whose birthdays occur on the same date celebrated together July 17th at the home of Mr. and Mrs. Robert Wain. Twenty-six relatives and friends gathered for the happy occasion.

## How Father May Get Into Kitchen

Something has to be done to make room for husbands in the kitchens if husbands are to be kept in the homes. This business of making meals in a clothes cupboard, that's called a kitchen merely because it has tiled walls and some cooking equipment, has about reached the limit. I've argued for big home kitchens all my life, but the more I advocate them the smaller they get," said Dolis McLabbitt, our hard-headed contributor, as he warmed up to his favorite subject.

"But I think I have got the answer. If the men cannot have a couch to lie on in the kitchen they can have a contraption to snooze in while mother's getting dinner ready. The modern ironing board which folds into a nook in the wall could be fixed with a big swivel so that it could be laid flat on its back on the floor and father strapped to it like a papoose. With the aid of a counterweight mother could push him into his niche in the wall. In this outfit he could talk to her or go to sleep, but at least he'd be in the kitchen."

"My idea is that this device should be tried on henpecked husbands first, goodness knows there are enough of them. If it worked, it could be extended to other husbands, very few of whom have anything to say about kitchen dens, or other things in the house. It may be the only means left by which a man can spend a little time with his wife in his own kitchen."—The Scene.

**RESTRICTIONS**

The man had just bought a cigar in a department store and started to light it.

"Didn't you notice the sign?" asked the salesgirl.

"What exploded the customer?"

"You sell cigars here but you prohibit smoking?"

"We also sell bath towels," the salesgirl replied.

Boys are more emotional than girls during childhood, according to psychiatrists.

# Acton Wins Two Games In The Week's Baseball

(Continued from Page One)

the fifth where Footitt muffed. Clements took a free ticket. With two on the hook, Rusk slammed a drive into deep left scoring both runners.

Acton 050 001 0 6 11 2  
Milton 000 002 0 2 5 2

Ignoring past performances, Acton Intermediates last night posted a convincing 7-3 victory over Georgetown, here for their seventh win, and struck a new precedent by winning two consecutive games, something they have failed to do hitherto this season. They collected eleven hits off wispie Don Herring, while Bill Leader set down the visitors with seven bingles besides whiffing seven batters for his third win in Acton livery.

Leader was in command most of the way allowing only two earned runs in the sixth frame. In the fourth with bases loaded he bore down hard striking his way out of a hole and again in the ensuing inning he set down on strikes, all three batters to face him. Except in these instances he never had to extend himself.

But it was clean cut hitting that let the Acton nine take the lead and hold it. Additionally, Georgetown were in co-operative mood and contributed six errors to their own defeat. In spite of bobbles, however, Acton would have won in a breeze.

Booting the ball all over the field "Scottie" Patterson staged a one-man comedy of errors committing four of the Georgetown miscues to the amusement of Acton fans who gave Patterson fitting applause for every miscue. The big backstop dropped the sphere, threw wild to second in permitting many of the Acton runs to score. As there is some similarity in uniforms it is suggested he was ruffled at the sight of no many monkey-suits of identical colour and completely forgot whose side he was on.

To cite an instance, let's peek at the first inning when Acton chalked up three runs. They chalked up three more in the fourth and a single in the fifth to close the ledger.

With Bud Rousstadler on first, Lindsay smashed a ground ball into safe territory. Rousstadler moved to third on the drive while Lindsay pulled into second just in time. Masales poked one to short that "Spud" Patterson headed. Rousstadler scored and Lindsay went to third. As Masales attempted to steal second, "Scottie" Patterson heaved a proverbial mile over the second baseman's head. Lindsay scored. The pattern of play followed this trend throughout.

Again in the fifth, Patterson dropped a force-out at the plate besides allowing Footitt to stretch a scanty bump into a hit. He was all thumbs, was Patterson, and the crowd amused.

Georgetown's bid in the seventh to tie it up fell far short of the mark. Wilson hit to Kentner in left field and Dang Ji dropped the sphere while Wilson scurried to second. Wilson stole third with two out and when Spud Patterson smashed a single to center, Wilson scored. But Patterson tried hard to stretch the hit into a double and Footitt's throw to second easily caught Patterson for the final out.

Masters, Hough, Footitt and Bill Leader all racked up two hits to lead the Acton parade. Modestly "Dude" Lindsay refrained from hitting more than 250 when the presence of a nearby editor was observed.

Acton 300 310 4-7 11 2  
Georgetown 000 002 1-3 7 6

Breaking a deadlock in the ninth inning, Fergus Vies managed to slide Acton 5-4 in an error ridden contest at Fergus last Saturday.

Acton committed six errors in losing to Vies and although they split fourteen hits, errors did the damage in the early part of the game.

Going into the ninth, Fergus nursed a 4-2 lead but Acton pushed two runs across in the top half to tie the count. However, Frank Utley sealed their fate when he combed relief pitcher Sam Snyder for a double and scored on Horner's bingle in the last half with two out. Snyder had relieved Bill Leader in the eighth inning. McMillen went the route for Fergus.

The game completed the four-game Acton-Fergus series with the league leaders coming out on top in three decisions, two by one run margins.

Acton 020 000 002-4 7 8  
Fergus 101 200 001-5 7 1

**BEGAN 50 YEARS AGO**

Boston began instituting regulations for putting wires underground more than 50 years ago.

Of the 75 essential oils used in the making of perfume, only eight are produced in the Western Hemisphere, and all of these are wild-growing plants.

# Acton Club Activities

Highlights of district conferences and Rotary assemblies he has recently attended were presented by Secretary Jack Royston at the weekly luncheon of the Acton Club on Tuesday and many helpful suggestions were given the local Rotarians.

President Alf Long presented the proposed budget for the year and estimated that over \$700 had been raised by the Rotary Fair this year. Details were not complete for final presentation of the day's activities.

Vacations have lowered the attendance at meetings the past two weeks, but those attending found the Y.M.C.A. basement about the coolest spot in town.

## "They Gotta"

A Canadian business man, who acquired a good education while he was earning success, was disappointed when his nineteen year old son gave up university in the first year to take a job in a department store. Being a wise father, he told his son that every young man must build his own life and make by the choices he makes. He was sorry that his son was throwing away the great advantages of a university education. It would be harder to do, but he could study along with his work and become a well educated, happy and useful man. It was up to the boy.

The son, having decided that there was no royal road to learning, believed that there was a state short-cut to financial success and security. He had been at school long enough to come to the conclusion that the problems of young people could and should be solved by the government. He had come to believe that anyone, no matter how unimportant his work, could enjoy an easy life, prosperity and security, if the government controlled production and working conditions. He lived in a province in which the people were learning the limitations of government in producing prosperity by legislation, but the experiment was in its early stages.

After a few weeks the father inquired how the boy was getting on. The son was enthusiastic about his pay and working conditions. He was getting the minimum wage. He said, "They've gotta pay me the minimum wage. They've gotta pay me time and a half if I work overtime and they have gotta give me two weeks holidays with pay."

"Yes," the father said, "they've gotta do all these things as long as they want to hire you, but they don't have to keep you on if your work is not good enough, or if their costs get so high that they cannot sell their goods. Son, you have been here several weeks now, haven't you learned anything about what you've 'gotta' do to make yourself worthwhile to your employer and to the community. Sooner or later you will learn that no government can save you from doing the work you've 'gotta' do if you are going to put anything into life and to get any satisfaction out of it."

The son was unimpressed. He is perfectly sure that life will be a steady progression of more for less, that his father and those who share his views are old fogies who haven't learned the facts of modern political science.—The Scene.

## Speed and Cutting In Worst Offence

To find out how much the average driver knows about avoiding traffic accidents, the Department of Highways has been conducting a public opinion poll among drivers.

One fact stands out: the public and the experts are agreed that excessive speed is the most dangerous action that drivers indulge in. The poll asks the question: "Which of the following bad driving practices, in your opinion, is the worst?" In the results, "Excessive Speed" headed the list of six bad driving faults, with 41% of the votes, 17% more than any other single fault.

This checks with official provincial accident statistics for last year, which show "speed too fast for road or traffic conditions" as an accident factor one third more often than any other reported violation.

On the other hand, the poll shows the experts that the public is not as concerned as it should be about another dangerous driving practice, driving on the wrong side of the road. Only 5% of the answers to the poll rated "Driving on the Wrong Side" as the worst offence, whereas in actual accident records, this dangerous practice ranks second in rural accidents and third in the combined figures of rural and urban accidents.

"Cutting In" was picked as the worst offence by 21% of those polled, while 22% picked "Passing on Curve or Hill". A positive way to avoid these two offences, as well as the offence of driving on the wrong side of the road, is to "Stay in Your Own Traffic Lane". Appropriately enough, this same rule is one of the current themes in the Department of Highways' newspaper advertising campaign at this peak period of dangerous summer holiday traffic.

## THE TEACHING PROFESSION

When young people are thinking about careers, teaching is one that could well receive their careful consideration, says F. K. Stewart, Executive Secretary, Canadian Education Association, writing in "The Financial Post". For one thing the next four or five years will see a great expansion in the educational system. And although salaries are generally regarded as being not enough (but they are improving) the profession can be regarded as well rewarding in other directions — in fact, it has been called the most rewarding of all professions.

Persons in other occupations and professions look with some envy at the teacher's allegedly short working hours from 9 a.m. to 4 p.m. five days in the week, with two weeks off at Christmas, 10 days at Easter, and two months in the summer.

These hours are no more indicative of the time spent at work than the hours 10 to 3 for bank employees. During the day the teacher must keep at least 30 lively children actively and purposefully engaged in learning.

When the school day is over there are reports to prepare, pupil activities to plan, and exercises to correct. There are frequently staff meetings to attend and possibly special school projects to supervise or promote.

But the fact remains, however, that school hours are still relatively short, and the vacations, particularly in the summer, attractively long.

# Vote on Acton Sewers To Be Taken Sept. 6th

(Continued from Page One)

"That this Council sanctions the erection of a new home for the aged in the County of Halton by the County Council in preference to an expenditure to build an addition to the present joint home of Peel and Halton Counties."

A by-law to add an addition to the pumping station at a total price of \$1000 was read. This was passed because the first Contract had been refused to sign the Contract. Council decided it was advisable to call for tenders again before a contract was awarded.

A letter from the Liquor Control Board advised Council that at the present their building program was at the limit. If however at any time the situation should change the Board would survey Acton as a possibility for a new outlet.

A letter from the Municipal Service Co. offered to supply and erect 153 street signs on present poles at a cost of \$275. Further inquiry was to be made before any contract was awarded for such work.

Additional street lights were to be placed at the corner of Peel and Arthur Streets and Peel Street and Acton Boulevard.

A letter from Mr. E. P. Bowman, surveyor, stated that a new working plan map of the whole of Acton would cost \$250 but if a registered plan were required it would cost more. The Clerk was instructed to get an approximate price on a registered plan to include all new sections and submit it to Council.

A letter from the County of Halton gave explanation of the charges on Calcium Chloride delivered to Acton.

A letter from the North Halton High School Board gave notice that the boys for the year would be \$7000 and the Board requested that a third of the amount be paid by August 1st.

A letter from the Municipal Board confirmed the conference that representatives of the municipality had regarding the construction of sanitary sewers and pointed out that a vote was necessary before a decision was made.

A letter and copy of a sanitary by-law was received from the Halton Health Unit. The matter was left over for another meeting.

Mr. B. D. Rochlin made application for a rebate on an unoccupied building on Main Street which was assessed for \$200. The rebate was refused on the ground that the building was condemned by the Department of Health and the onus was on him for the condition.

With the rain pouring in torrents outside Council sat at the Council table until 7:30 a.m. and discussed the location of the new swimming pool in the park. Mr. Parker of the Committee, had as requested, submitted sketches and location at the west end of the park.
