OPERATING FOR GORDON YOUNG LIMITED

NEW RAIL CHIEF: Donald Gordon, C.M.G., devoted his first hour is office as president of the Canadian National System to a press conference. "We are conducting a public service, and it is essential that the management should know what the public is thinking and that the public should be informed of what the railway is doing," he said. "I hope, as soon as circumstances will permit," continued Mr. Gordon, "to go over

the system. I want to get to know the men and women who make it

tick. The railway is faced with almost every kind of problem one can think of, but it seems to be a first-class working organization and its coundation is sound. My work with the Wartime Prices and Trade Board, perforce, kept me in touch with every phase of our economy, and in that respect my duties will be similar with the transportation system.

We must provide a service to every phase of Canadian industry, and make our contribution to the progress of the country."

Lime in Relation to Crop

Production Halton Farmers are showing increased interest in the use of Agricultural Limestone. In 1049, 49 permits were issued by the Agricultural Office in Milton, in comparison to 20 permits for the prevtrend is true in many other sections of the Province. In Haldimand, for example, they issued ! permits in 1949 covering almost 3900 tons which is greatly in ex- | Ontario. John Stewart has been cres of any previous year The use of limestone as a soil amendment is by no means a new blea Helerence to the use of lime was made and 18 in literature written before the birth of Christ. In Great Britain the application of Agricultural Limestone to the fields is an old established practice. The same is Plowing Match, Harvey Nurse of true in many parts of United Norval Juniors won the Halton States Louis Bromfield in "Mal- Junior Farmers Roden Contest shar Farm" describes how he used Last week the provincial finals in lime as the first step in his will which thirty-two county winners building programme. The Halton competed, was held in the Collseum Crop Improvement Association laid in Toronto In this strong competdown their first series of demonstrations and experiments with limesone in 1939 Twenty demonstrations were laid down on as the Ontario Department of Agrimany different farms in 1948. Some culture and the Junior Farmer very interesting data is now coming | Association of Ontario. This proto light. Victor J. Lawrence of the ject was introduced to promote Merton district in Trafaigar Town- economical operation and maintenship, on whose farm one of the ance of farm machinery and betoriginal demonstrations was laid ter safety methods among Ontario down some eleven years ago reports outstanding results Legumes such as alfalfa, the clovers, peas, MORE NEW FIRMS etc. are all heavy feeders on calclum In addition to a greaty increased yield of alfalfa from the limed area Mr Lawrence states he got nearly double the yield of peas off the limed area that he did off the unlimed area adjoining. L de-Vries of Georgetown area, whose farm is in the limestone area is strangely enough, perhaps the biggest twoster for the use of Agricultural limestone in Halton. A test was laid down in the fall of 1948 on the farm of W E Breckon near Appleby, Nelson Township, In this test Beachville lime and Dundas lime were tested side by side both at the one and two ton rates of application The field was sown to spring grain and seeded down in the apring of 1940 Recently Mr. Breckon reported that this past fall there was a trememous difference in the catch of clovers on the 4 acre limed area and the halance of the field. He was not able however, to detect any difference in the stands in so far as the source of imestone was concerned, nor between the areas receiving the different rates of application

Our readers should realize that lime is chiefly a soil amendment In other words, it is not intended nor does it take the place of barnyard manure or commercial fertilizer Lime does, however, have a great deal to do with the availability and utilization of the plant food in the soil.

Reference was made earlier in this article to the issuing of permits by the agricultural office at Milton. The permit enables the purchaser of agricultural limestone to secure a subaidy of 3 cents per ton mile on the transportation of the limestone. A lime spreader service is now available. In other words, the firm in question will transport the lime to the farm and apread it directly from the truck onto the fields. The cost of the limestone loaded on the truck is \$1.35 per ton at Dundas. Transportation costs 6 or 7 cents per mile per ton. The spreading of the lime on the fields is done at a cost of 50 cents per ton. Recently a farmer in the Milton district whose farm is 25 miles from Dundas had 68 tons apread on his farm at a net cost of \$2.60 per ton after deducting the transportation sub-

Those considering the use of the agricultural limestone should first secure a soil test to make sure their land requires such application. Full information concerning soil tests, sermine for purchase of lime etc. can be secured at the Agricultural Office in Milton.

Kingsway Kiwanis Donate Scholarships to Halton Club Members For the past two years the Kingsway Kiwania Club of West Toronto has awarded a scholarship (value \$12.50) to the high club member in each of the club projects organized in Halton. These scholarships apply on short course held at the O.A.C. each winter. Seven Halton young people received such awards in '49 and attended the courses at Guelph earlier this month. Nine such scholarships will be awarded by Kingsway Kiwanis in 1950. We understand they will be awarded on Calf. Swine, Grain. fractor Maintenance, Garden Club Projects to be organized in Halton in the near future. The Halton Milk Producers for several years have awarded two such scholarships annually, and it is anticipated that similar action will be taken again this year.

BURLINGTON

Those who attended the annual meeting of the Chamber of Commerce at the Estaminet on Thursday evening last heard a very fine ahead for this community.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817

We Didn't Know You Could Do That!

That's what a customer said when he was making enquiry regarding some specialized printing. So we produced some other samples of printing done by our modern equipment and we've been supplying more and more specialized printing for that firm.

Trouble Is

That we don't always get the opportunity to show samples of our printed products to local business places. We employ no Salesmen. Matter of fact we've been having difficulty keeping up with the requests that come without solicitation for the products of our equipment and the experience that goes with it. But, if you have a printing problem we're adequately equipped and delighted to give you our best service.

It Doesn't Matter

Whether it's a fancy job or a run of the day, we give every piece of printing careful attention and good workmanship and endeavor to be prompt. If it's printing we can do it.
