A UNEQUE ELECTRIC MOTOR

An electric motor which is the only one of its kind in the world is to be shown at the British Industries Fair in May. It has a chaft appeal of 10,000 r.p.m. yet can be worked on a 3-volt battery. The amount of current used by this tiny motor is less than that required to light a fleshlight. As operation of the shaft can be reversed it can be but to a very wide variety of uses. It should prove sa invaluable sad sconomical device for driving turntables and small window displays fast In many households the mornor for working midget cars and

6 D Chronicles of Ginger Farm

Written tipocially for The Antas Pres Prom GWENDOLINE P. CLARKE

One morning last week something happened which made us realize how greatly conditions have changed since we started farming

It was this way: There were

couple of oak trees up in the bush that needed cutting down-and so we sold them. As a result soon after breakfast one morning along came two young fellows with a chain saw to work on the trees. Before they could get to the bush there was an elm in the lane that had to be removed. It had blown down in a recent high wind and was blocking the road. But when the men got busy with their chain saw, that elm was cut into lengths and the road schedule got started it was the Why not begin a Better Breakfast nual meeting of Oakville Com- cleared in no time at all. Then the contention of even some of the Campaign next week-serve pan- munity Centre Council in Victoria men with their equipment went on veteran players that the club would cakes for breakfast one day, a Hall, Thursday evening Half of up to the bush. EVERYBODY'S BUSINESS Agu Graham

Look for the facti! In this simple phrase there her magic power to help you build a more effective personality and win

A famous industrialist was once asked how he could make so many wise decisions quickly. "I get the facts", was his reply. "Once you eather all the important information related to any matter, the facts

themselves decide the issue." Needless to say, the man who can make sound decisions most frequently and rapidly wins against

ill competitors in any field. Many a new invention, too, has been made because somehody discovered new facts, or gave familiar facts a new interpretation. You may notice some little detail that others have overlooked and he inspired to change it in some way that will create a money-making invention.

or lead to a valuable time ormoney saving idea on your job.

Facts may serve us in countless other ways. They provide power for selling or convincing others. Introduced into conversation, they make our comments more effective and interesting. Used as guidepour, they keep us from the dangers of wishful thinking and impractical philosophies.

Above all, facts add to our knowledge. And "knowledge is

To build a sound life insurance plan for yourself and your family, you need the help of someone who can analyze all the facts related to your future needs. The nuxlern life insurance company representative is trained to do this - and you can rely on his recommendations.
