DON'T PLANT WEED SEEDS

Seed drill surveys in Canada show that many of the weeds, which later farmers fight by cultivation and chemical weed killery. are there because they were planted along with the crop. One of the simplest ways of reducing weeds on the farm, is not to plant them It's not too far from seeding that if such should occur, people But they will be planted unless time to give some thought to hav- affected would be taken care of by care is taken to sow only seed that is as free from weed seeds as is humanly possible.

Much of the seed used in Canada is still farm grown and is cleaned on the farm. It is false economy not to clean it thoroughly. It should not be a matter for congratuation if the material screened out is not large, unless there is assurance that the remaining seed is clean and as free from weed seeds, and other material as possib'e. Small seeds in particular. such as clover, alsike and red clover, are not easily cleaned, and these seeds are often sown when they would be classed as "rejected" under the regulations of the Dominion Seed Act, or at best would grade only No. 2 or No. 3. Many progressive farmers prefer not to sow No. 3 seed.

A simply purity seed test can be made by apreading about a pound of seed on a clean surface in a fully picked over and all foreign seeds removed, and the general quality of the seed and the size of the kernels should be noted. This jest will give a good indication as to whether the seed should be recleaned. If any noxious weeds Irate salesg'rl to disagreeable are found, or if there is reasoncustomer: "Go easy, madam. The able doubt of the purity or quality Hamilton River in Labrador is days when I used to insult cus- of the seed after recleaning, it is tomers are still fresh in my mind." advisable to obtain other seed.

NEXT QUESTION

The question of choosing colleges was being discussed at a high school English class. One bright girl contributed her bit: "First you've got to decide whether you want to go to a coeducational school or an educational one."—The Reader's Digest.
