

Halon Farmers Visit Ohio State

Seventy-five farm folk from Halton and Haldimand counties (53 from Halton and 24 from Haldimand) returned on Wednesday evening of last week from a four-day bus tour to the state of Ohio. It was a trip which will long be remembered. They were privileged to be the guests of the Muskingum Water Conservancy District to see the strip mining of coal near Cadiz, to visit the famous Bluff and Maalabar Farms to meet their owners to spend three hours at the Northern Ohio Artificial Unit at Tiffin. At each point members of the party were overheard to state: "This was worth the trip itself." It would be impossible for the writer to do justice to the programme in one article in fact it would be impossible for the writer to do justice to the various features even in a series of articles. In this week's article we shall try and present a few of the highlights of the trip around the Muskingum District Conservancy, one of the wonders of the world. We were privileged to have as our guides, Walter Regland, Frank Crume, and Jack Curtis, three of the key officials of the big project starting out from New Philadelphia, some 375 miles from Milton, the party visited the Dover Dam, an impressive concrete structure with 18 sluice gates controlling 174 miles of the Tuscawas River back of the dam. We also were taken to see three or four other dams which range in height from 45 feet to 113 feet and these are constructed of earth and rock fill. Over them runs the road or highway. Altogether they have constructed fourteen reservoirs, these artificial lakes vary in size from 420 to 2550 acres with a total water surface of 180,000 acres and 365 miles of shore line. The project originated as a result of the disastrous flood of 1913 in which Ohio suffered a loss of 500 lives and \$300,000,000 worth of property. But the plan included something else that has become increasingly important. This was a dual purpose use for ten of the fourteen reservoirs. They provide for water conservation, they control and prevent floods, and they also provide some beautiful recreational centres. Previously Ohio State was almost devoid of any inland lakes for fishing, boating, and bathing. With over five million people living within 75 mile driving distance the recreational values of the Muskingum District are high. The Conservancy rent concessions to various individuals some of whom we were informed have gross receipts of fifty thousand dollars during a single season. The lakes are so well populated with fish, that there is no closed season and no limit on catches. The Conservancy also has some 30,000 acres in farm land which they rent or operate on a share crop basis. This particular part of Ohio State is quite hilly and the land is not suited to agriculture an extensive reforestation programme is under way. There was some sort of timber stand on 130,000 acres of the land taken over by the Conservancy District. Since the project got under way nearly two million trees have been put in. Their plan calls for 33,000

acres to be ultimately covered with forest. While the disastrous flood in this section of Ohio was in 1913 it was not until 1933 that the Conservancy District became a reality. It takes in all or parts of eighteen counties about one-fifth of the State of Ohio. In other words in a period of 17 years they have transformed the area from a potential flood area and also a drought area to one of the great scenic beauty. With this has gone flood control, conservation of water, proper land use including reforestation and provided outstanding recreational centres. In short, it is a model for the world and many of the principles utilized on the Muskingum could be utilized to advantage in Ontario. In next week's column we shall try and present a few of the highlights of our visit to the strip coal mining area near Cadiz and other of the wonders of the world.

One Thousand Halton and Peel Halstein and Jersey Folk Attend Field Day at O.A.C.
The annual field day sponsored by the Halton and Peel Halstein and Jersey Clubs was held at the O.A.C., Guelph, on Saturday last, with one thousand in attendance for this popular annual event. The group were the guests of the O.A.C. for dinner, following which Dr. W. H. Reek, M.B.E., President of the O.A.C., extended a welcome. The programme also included tours to the experimental plots; the agricultural engineering dept., live stock judging contests, a livestock parade, a meat demonstration for the ladies and a sports programme. The prize winners in the judging

contests were as follows: Man's Section—Ross Egsworth, Freeman; Andrew McClure, Norval Ladies' Section—Mrs. Clarence Lyons of Cheltenham; Miss Velma Cook, Peel County; Juniors—John W. Pickett, Hornby; Geo. Rogister, Milton.

Maple Cattle Breeders Stage Successful Field Day
Five hundred members attended the successful field day held by the Maple Cattle Breeders' Association recently. Speakers included Prof. Geo. E. Rathby, and C. D. Graham, Deputy Minister of Agriculture for Ontario. During the five years which this artificial unit has been in operation it has made a phenomenal growth. It now has over 2250 members in the eight counties which it serves. Hundreds of outstanding sires of five different breeds are now available. That the association is in a sound financial position is indicated by the announcement made at the field day that a rebate of \$15.00 per member is to take place immediately and that in future the life membership fee would be \$5.00, plus a loan of \$20.00, or \$25.00 in all. Heretofore the membership fee has been \$40.00. Those owning three cows or less may secure service by paying the \$5.00 membership fee only.

Mines are operated in every province of Canada except Prince Edward Island.

Money Management Vital to Farming

Farming is a continuing business. Before you've harvested one crop you're getting ready for the next. The far-sighted farmer plans his finances just as he plans his crops, making sure that he has ready money at the times of the year when he most needs it. William Clayton, manager of the local branch of the Bank of Montreal, reports that many successful farmers keep special savings accounts at the B of M for this purpose. They know that having too much cash around leads to unplanned spending, and so they put away a portion of all their produce cheques. Then they have the cash they need for financing bigger and better crops, for buying livestock or equipment that will boost farm revenue. To give your farm the strong financial foundation it requires, open an account at the B of M with your next produce cheque. And for the easier planning of your farm finances, ask for a copy of the B of M's special Farm Account Book. You'll find it a real help in managing your farm revenue.

MILTON

Milton police reported a 70 m.p.h. chase after an American tourist between Milton and Brampton over the week-end. The Toledo, Ohio, motorist, driving a 1950 model passed through Milton in excess of the speed limit and scattered a group of townspeople like a flock of chickens as they were crossing the highway, police stated. Stopped in Brampton, the American willingly paid his \$21 bail bond. Although final arrangements have not been made for the annual visit of Santa Claus next Christmas the machinery was set in motion for a successful event for the children in Milton and district when nearly 1,000 people turned out last Thursday evening to attend the annual Street Fair sponsored jointly by the Milton Fire Brigade and the Milton Branch Canadian Legion. Gordon Hume, son of Mr. and Mrs. William Hume of Milton, and graduate of Emmanuel College was ordained as a minister of the United Church in Westdale United Church last week. Canadian Champion

GEORGETOWN

Miss Jane Early graduated last week from the School of Nursing at Wellesley Hospital Toronto. She is the daughter of Mr. and Mrs. J. Amott Early of town. The former Barbara Cousins Mrs. Keith Duncan received her diploma in Physical Therapy at the graduation exercises at the University of Toronto last week. A Georgetown boy, Jim Ruddle, has taken a position with the Operational Research Group at Ottawa following his graduation in Engineering and Physics at Queen's University, Kingston. Son of Mr. and Mrs. John D. Kelly, William Kelly has graduated in Civil Engineering at the University in Toronto and has a position in Toronto with the Consumers Gas Company. Jack Armstrong was selected president of Georgetown Lions club at the annual meeting of the organization which was held last Tuesday at the McGibbon House. Herald.

OAKVILLE

A written request from a newspaper for a copy of the minutes and an account of the proceedings of a special meeting held May 20th was refused by Oakville District High School Board at its regular meeting Tuesday evening. The secretary of the board was instructed to inform the newspaper that the board did not propose to make the information available. The meeting concerned was the one at which the resignation of Principal W. S. Blake was accepted. Fire of an undetermined origin completely gutted the plant of Ontario Metal Specialties on Bronte's main business street early Wednesday morning. Only the walls of the large brick structure, the original part of which was over 90 years old were left standing. A film projector will be purchased for the Oakville Public Library by the Oakville Film Council. It was decided at the monthly meeting of the library board. Oakville Lions are busy these June evenings getting the Busby park wading pool and surrounding grounds ship shape for the hot summer days.—Journal.

WALES EXPORTS MUSIC

The harps of Wales have entered Britain's export drive. Music is being exported to Canada and the U.S. by a West Wales company in the form of organ keyboards and "actions".

AUCTION SALE

Farm Stock, Tractor, Farm Implements and Furniture
The undersigned have received instructions from
REG. F. ARKINS
To sell by public auction at his farm, Lot 15, Con 2, Twp. of Esquimaux, half mile west of Speyside Store on
FRIDAY, JUNE 23rd
At 1:30 o'clock the following
COWS and YOUNG CATTLE —
1 White Face Cow, fresh, calf at side; 1 Brindle Cow, fresh, calf at side; 1 Ayrshire Cow, fresh, calf at side; 1 Durham Cow, fresh, calf at side; 1 Durham Cow, fresh 6 wks., bred May 29; 1 Brindle Heifer, fresh, calf at side; 1 Durham Cow in full flow, bred May 26; 1 Durham Cow, in full flow, bred April 20; 1 Durham and Ayrshire Cow, in full flow, bred May 31; 1 Ayrshire Cow in full flow, bred May 26; 1 White Face Cow, in full flow, not bred; 1 Jersey Cow, in full flow, bred April 21; 1 Ayrshire and Durham Heifer, bred 2 mos.; 7 Durham Calves; 1 Holstein Heifer, bred June 3; 1 Brindle Heifer, 1 yr. old; Holstein Bull, 1 yr. old.
FARM IMPLEMENTS — Case Tractor, cross motor, in good working condition; M.H. 3-furrow Disc Plow; Oliver 2-furrow Tractor Plow, single furrow Riding Plow; 2 Walking Plows; Disc, 14 plate; Deering Grain Binder, 6 ft.; Deering Mower, 8 ft.; M.H. 13-disc Drill; Turnip Seeder; Farm Wagon; Wagon Box; Set of Sleighs; Light Wagon; Hay Rack; Cream Separator; Vikar; Evaporator; and Sap Pails; 1932 Ford Coach, recently overhauled; 1932 Chevrolet Sport Roadster; Hay Fork; Rope; 2 Peagle Hounds; Foxes; Shovels; etc.; Dump Rake, team; Double Disc tractor; Hay Loader, spring tooth, tractor, on wheels; No. 30 Cockshutt Grindery; Ford Model B Truck; stake; 10-20 International Tractor.

Performing Red Cross duties that were so essential in flood-stricken Morris, there was little time for Wes. Moody to think of his own home. Here in the result shown better than words could describe. Most of Mr. Moody's furniture and personal belongings were under three feet of water. Many of these effects are beyond repair. The Manitoba Flood Relief Fund will assist these destitute flood victims in setting up their homes anew. Your donation, large or small, can be mailed direct to the Fund in Winnipeg or paid into any Chartered bank in Canada. Donations are tax free.

There is No Substitute for GOOD EQUIPMENT

Nothing takes the place of up-to-date equipment for getting work done when it should be done . . . for catching-up with the job in late seasons . . . for removing the worry of the help problem . . . for increasing production . . . for keeping costs down and leaving more margin for profit.

Good equipment pays in many ways. And through a wide range of sizes and styles of tractors and power machines the advantages of modern equipment are available for all sizes of farms and types of farming.

Designed and built to embody the latest in engineering developments and manufacturing skills Massey-Harris power farming machines bring to users features that help them do their work easily, quickly, and at less cost.
