

**Maple Artificially Bred Heifer Makes World Record**

Recently 140 members of the Maple Cattle Breeders Association verified over slippery roads to the farm of Cecil Atkinson & Son of Schomberg. The occasion was a farm meeting to see the new World Milk Record artificially bred two-year-old Holstein heifer, Orchard Vale Laurel Trial Ideal. The first cow purchased by the Maple Cattle Breeders when the artificial breeding unit was organized in 1945.

John Powell of the Halton Farm Association at Bradford pointed out that the herd average from the twelve cows and heifers was 16,111 lbs. of milk. It was also pointed out that one season yearling and a girl two years old, bred by King of Britain 1951 by planting a cow of the herd had an average of 17,770 lbs. of milk and three of the herd records were for 90 days. Incidentally one of the heifers in her second lactation has averaged 81 lbs. per day for 79 days.

The guest speaker, W. P. Watson, Ontario Livestock Commissioner, presented some startling figures as revealed by cost data secured in connection with the new Dairy Herd Improvement Association. Mr. Watson pointed out that grassage and feeding farms would appear to be two methods of reducing costs for feed and labour.

Several of the Halton members of the Maple Unit also have some fine records coming along on heifers bred by bulls in the Maple Unit.

All of which would indicate that the formation of the Halton branch of the Maple Unit and the organization of the three Dairy Herd Improvement groups in Halton mark two of the most important advances ever made by the dairy breeders of Halton County. Certainly under present day agriculture with its high production costs due in the main to the upward spiral in the cost of labour and feed in fact everything which enters into the cost of producing farm products, the farm operator must cut costs wherever possible if he is to keep out of the "red".

**Club Winners Entertained by Kingway Kiwanis**

Eight of Halton's top Club Members were entertained by the Kingway Kiwanis at their weekly luncheon on Monday of last week. Each of the eight Club Members was presented with a cheque for \$12.50 by C. D. Graham, Deputy Minister of Agriculture for Ontario, on behalf of the guest speaker, Mr. Graham was the guest speaker for the occasion and his address pointed out that the young people in connection with their respective projects learn to make decisions and to substantiate their decisions with good reasons for so doing. The young people from Halton so honoured were as follows:

Jean Bird of the Halton Girl's Garden Brigade; Eleanor Stark, of the Halton Jersey and Guernsey Calf Club; John Currie, of the Halton Boys' Swine Club; Fraser McNabb, of the Halton Boys' Grain Club; Don Milton, of the Halton Tractor Maintenance Club; John C. Wilmott, of the Halton Baby Beef Club; John W. Pickett, of the Halton Holstein Calf Club; John Macpherson of the Halton Junior Farmers' Association.

Others who accompanied the young people were A. T. Woodley, and Arnold McDuffie, both of whom gave outstanding service as Club Leaders during the past year, and Agricultural Representative, J. F. Whitelock.

**Why Can't We Have a Night School?**

This was one of the queries in the columns of the first issue of the Milton Reformer on November 5th in 1885. Sixty-five years have elapsed and the Milton District has its Night School. Whether or not any have been held in the interval we do not know, but if the writer of that inquiry could have accompanied the writer of this article on a tour of the ten class rooms or halls on Tuesday evening last, we think he would have been quite impressed. A total of 300 were in attendance and at each point whether at St. Paul's Church, Sunday School Room where we found some sixty ladies working on aprons and dresses; the Farmers' Building where twenty-eight ladies were getting instruction in Tailoring; or at one of the eight class rooms at the High School, we found a veritable beehive of industry.

The Farm Business Course was the only one where we stopped for more than a minute or two. Here Dr. H. L. Patterson of the Farm Economics Branch of the Ontario Department of Agriculture, was presenting a wealth of interesting and valuable information. This was in the main based on his cost stud-

ies in connection with one of the new Dairy Herd Improvement groups.

In the particular group under consideration, the figures for twenty-two herds were presented. The average cost of producing milk for the two low herds was \$5.30 per cwt. while \$2.50 per cwt. was the average figure for the two high herds and the average of the entire group was \$3.82. Some twenty-five different factors were presented and while we do not pose as an economist it appeared to us that the three main factors responsible for the widespread in costs between the high two herds and the low two were (1) production per cow, (2) production per cow per day, and (3) mean herd per cent butterfat produced. It is too long a story to attempt to deal with in this article, so we looked Dr. Patterson as the guest speaker for the Annual Meeting of the Halton Group Improvement Association to be held in the Court House, Milton.

**Halton Juniors Met their Waterloo**

On Friday evening of last week one of the five Zone Amateur Entertainment Contests was held in the Junior Farmers' Building at Simcoe. Presentations were made by the Juniors of the counties of Oxford, Norfolk, Wentworth, Waterloo and Halton. All presentations were of a high calibre and it was with some difficulty that the adjudicators made their decision. The award went to the Maple Grove Junior Farmers of Waterloo County who presented a skit depicting social systems in a Monomaniac Home.

Palmer Juniors representing Halton County presented their musical comedy entitled "S. S. H. Juniors". This musical skit written and directed by Geo. S. Atkins of Palmeria had a real audience appeal and the members of the cast, namely "Happy" Oates, Dave Bell, Peter a Mildred Lucas, John Lilly, Gussie Smith, Gus Register, Jean Patterson, Audrey Wickson, Carol Pope, their accompanist Anita Cowan and their director, are indeed to be congratulated on their finished performance. Halton may well be proud of this versatile group even if they did "meet their Waterloo".

**Notice to Creditors AND OTHERS**

In the estate of Earle Ernest Davidson.

All persons having claims against the Estate of Earle Ernest Davidson, late of the Town of Acton, in the County of Halton, Maintenance Man, deceased, who died on or about the First day of October, 1950, are required to send particulars and proofs thereof to the undersigned before the Twenty-third day of December, 1950, when the assets will be distributed among the parties legally entitled thereto, having regard only to the claims which shall have been filed.

Dated at Acton, Ont., this Fifth day of December, 1950.

C. F. Leatherland, Acton, Ont. Solicitor for Douglas Davidson, Executor. a-22-3

**CHRISTMAS PRESENTS**

Christmas takes for the present day back to the days of the early Roman who held a feast in honour of Saturn. Bakers were invited and distributed.

This has become an important part of a tradition in their society and the plan has been developed and enlarged by the groups and other organizations in order to bring happiness to hundreds of thousands who would otherwise be overlooked at Christmas.

**FLORAL BRITANNIA**

St. Margaret's Bay near Dover, England is to contribute to the Festival of Britannia 1951 by planting a variety of Britannia 100 feet long and 20 feet broad in red, white and blue flowers on the hills which slope down to the English Channel. This floral avenue will greet over six visitors who arrive by sea or air.

**Pensions Without Means Test Favored By Majority of Halton Farm Forums**

On December 4th, the Farm Forum met in 24 towns, the subject being Pensions for Farmers. The first question was: "What kind of pension system would you favor if you were an elderly farmer with no other resources and no family to depend on?" The majority of the forums favored a pension of \$40 or \$50 a month out of which \$20 or \$25 would be paid to the farmer and the balance to his family. The second question was: "If you were an elderly farmer with no other resources and no family to depend on, would you favor a pension of \$40 or \$50 a month out of which \$20 or \$25 would be paid to the farmer and the balance to his family?" The majority of the forums favored a pension of \$40 or \$50 a month out of which \$20 or \$25 would be paid to the farmer and the balance to his family.

**Your Future Hangs On Dairy Products**

The Department of Agriculture in its desire to promote a better use of food as well as a better use of land is turning through its Consumers' Section and other departmental agencies former peace-time activities in getting Canadian people better acquainted with home produced foods.

Here are a few facts which any producer or consumer should keep in mind:

- (1) Dairy products are basic products in any health program. In any health program, in any daily diet, they command priority, whether it be for children or adults.
- (2) Dairy industry in Canada is perhaps the best guarantee of stability for the large majority of our farming population. The cow is the home market for grasses and grasses are a "must" in soil conservation.
- (3) Canadians are inclined to take for granted the abundance of our dairy products and use them loosely whereas we should take advantage of those abundant supplies to bring our diet into a better balance and improve our standard of living.
- (4) For the same amount of money the consumer cannot get the same essentials from other foods as those supplied by dairy products. Calorie in butter and protein in milk are cheaper than in most other farm products.
- (5) Butter itself takes almost half of our milk production and constitutes one of the best channels in some cases the only channel through which milk produced from small farms located far from consuming centres can be marketed.
- (6) Cheese is a high protein food the consumption of which could be increased if our population had a better knowledge of this product. Our average consumption is 4 or 5 pounds a year whereas it is between 15 and 20 pounds in such countries as Denmark and Switzerland.
