CARROLL'S CANNED GOODS SALE

NOW IS THE TIME TO BUY CANNED GOODS!
We are advising you to buy extra supplies of canned goods during Carroll's Canned Goods Sale, because we think it would be a wise thing for you to do. There was a short pack of many things in 1951 and that, combined with higher freight rates, labor and packaging costs will probably mean higher prices before the 1952 pack is on our shelves. We have a complete assortment of brands, grades and sizes to choose from now. You will be sorry if you miss this opportunity to stock up.

(NOTE: We Cannot Sell to Others in the Grocery Business)

- Beans with Pork **CLARK'S 2 TINS 25c**

GRAPES - - - 2 lb. 25c
- LOUISIANA
SWEET POTATOES - 3 lb. 29c

FRESH DAILY—Cauliflower, Lettuce, Tomato, Celery, Spinach, Bananas

Hello Homemakers! When the teenagers are "cooking" up dates, it's time for mother to cook dates literally for the snack tin. Home is the best place for fun and food, so make the young folks welcome and suggest using the card tables near the fireplace or the breakfast table in the kitchen.

DATE AND NUT BARS
3 eggs
1 cup sugar
2 cups dates, cut in pieces
2 cups dates, cut in pieces
1 cup flour
1 tsp. baking powder
Few grains salt
Beat yolks until thick, then add sugar while beating constantly. Beat whites stiff. Sift flour with baking powder and salt and add dates and nuts. Add beaten whites and flour mixture alternately to yolks. Drop from spoon or spread on buttered cookie sheet, bake 30 minutes in moderate electric oven (350 deg.). While warm, cut in finger-shaped pieces and roll in powdered sugar.

MINCEMEAT HERMITS
1 1/2 cups sugar
1/2 cup butter
2 eggs, well beaten
1 tsp. salt
1 tsp. soda in 1/2 cup sour milk
3 cups flour
1 tsp. cinnamon
1/2 tsp. cloves
1/4 tsp. nutmeg
1 cup mincemeat
Cream butter, add sugar, eggs, salt, soda in milk, flour sifted with spices, and mincemeat. Chill. Drop by spoonfuls on greased cookie sheet. Bake in an electric oven (325 deg.).

GINGER SNAPS
1/2 cup molasses
3 tbsps. shortening
1/2 cup flour
1/4 tsp. soda
1 tsp. ginger
1/2 tsp. salt
Heat molasses to boiling point and pour over shortening. Add dry ingredients, mixed and sifted. Chill roll, and bake 8 to 10 minutes in electric oven at 350 degrees.

ORANGE PARFAIT
1 can (tall) evaporated milk, chilled overnight
1/2 cup icing sugar
1 orange, rind and juice
1 lemon, rind and juice
Orange colouring
3 dates
Whip the milk, add sugar and whip. Add juice, rind, orange colouring and whip. Place in freezing trays. Make a design on top with sliced dates. Freeze 3 hours in electric refrigerator turned to coldest point.

TAKE A TIP
1. The dough for roll-out cookies should be thoroughly chilled in the electric refrigerator for an hour to prevent spreading in the pan.
2. Do not grease an aluminum cookie sheet for cookies. Grease a tin pan lightly with salt-free fat.
3. Tough cookies are due to too much flour and too much rolling.
4. To keep some cookie dough for making fresh ones several days later, roll it in cellophane or heavy wax paper, seal in the ends, and store in the electric refrigerator.
5. Cookies stick to the pan because of excessive high temperatures and pans which may not be absolutely clean. Then, too, cookies should be transferred with a spatula to a cake rack as soon as taken from oven. If the cookies tend to crack, place the sheet on a cloth wrung out of hot water for a few minutes.
6. If coconut becomes dry, sprinkle well with milk; place it in covered pan in warm oven for 10 to 15 minutes.
7. To make a glazed coating on fruit tarts and leing, melt a little currant jelly and pour over baked and cooled goods.

THE QUESTION BOX
Mrs. B. J. asks: Can we prevent holes from appearing in aluminum jelly molds?
Answer: We suggest that aluminum molds be lightly rubbed with salad oil (not a salty oil) to keep

aluminum molds from deteriorating.
Mrs. C. T. asks for a recipe for candy apples and why the glass becomes soft.

Candied Apple Sticks
2 cups sugar
1/2 cup light corn syrup
1/2 cup water
Red colouring
12 red apples
12 skewers
Flavouring
Put sugar, corn syrup and water in double boiler. Cook mixture, stirring, until a small drop of syrup dropped into cold water becomes brittle. While syrup is being cooked, swab down the sides with cheesecloth dipped in water. Turn electric element to Low toward last part of cooking. Add a few drops of extract or oil and colouring when brittle stage has been reached. Turn electric element to simmer. Place wooden skewers in clean, dry apples and plunge each one rapidly into syrup then stand the skewer in a cake rack.
Note: Moist or juicy apples will soften glaze in a day or so. Rainy weather causes softening, too.

SKIING DOOMED?
Scientists still persist that our winters are getting warmer. As proof they cite the recession of the glaciers. A warmer climate would not be an unmixed blessing, points out The Financial Post.

"In these possible changes in climate we have heard mostly about the gains — less snow and coal to shovel, growing our own oranges, winter sun baths and so on. Unfortunately there is a shady side to the picture too. Winter sports like skiing might disappear in those areas where they provide much fun and business now. There would also certainly be an increase in those weeds, bugs and other pests which an occasional dip to zero keeps under reasonable control today."

Canada's first commercial cheese factory was established by Harvey Farrington in Oxford County in 1864. Mr. Farrington had come from Herkimer County, New York, where cheese had been made in commercial factories for a number of years.

CLEARING AUCTION SALE

LIVE STOCK, IMPLEMENTS, HAY, GRAIN AND FURNITURE.
The undersigned have received instructions from:
MRS. ANNIE F. MOORE to sell by public auction at Lot 32, Con. 3, Esquating, at Churchhill, 2 1/2 miles North of Acton on **SATURDAY, NOVEMBER 17** commencing at 1:30 p.m. as follows:

Check Stave Pipes, Furnace, Chimney

Now is the time to check furnace and stove pipes. Faulty pipes are one of the chief causes of fires on Canadian farms. And while checking the pipes, what about the chimney itself? It can have deteriorated a lot in the past six months and need painting or a new chimney pot. An excellent fire protection on a farm is a roof ladder, for fires often originate around the chimney and the roof.
A few buckets and a number of water barrels at suitable points around farm buildings are often a greater protection than a fire engine many miles away over snow bound roads. But water barrels are worse than useless if the water is frozen, so choose a reasonably warm place to locate them.

The simplest fire-fighting equipment—a bucket of water or sand, a small fire extinguisher, even a horse blanket—if available immediately, can often smother an incipient fire before it becomes a disastrous blaze.

COMPLETE EYESIGHT SERVICE

the trip down was fun too.

"I came down by bus again this year and had a lovely trip—a couple of stop-overs on the way to see the sights and do some shopping. The highway scenery was grand and we passed through a lot of interesting towns and cities. I'm going home by bus too."
