FARM NEWS

Infectious Rhinitis in Swine
Infectious Rhinitis in recent years has become one of the most serious problems facing the hog producer. The disease is apparently widespread, because Agricultural Representatives in all parts of Ontario are being asked for information about the disease and recommendations for its control.

The most serious effect of rhinitis is that it slows up growth and pigs are unthrifty. One of the first indications of the disease is the tendency on the part of the nursing pigs to frequently sneeze in quick succession. In other words it is a disease of the nasal passages.

As the disease develops the nose often becomes crooked or pushed up, causing difficulty in eating. Needless to say such pigs take weeks and months over the normal period to get them off to market.

While Rhinitis seldom causes a pig to die the disease may weaken it to an extent that another disease may develop and death be the result. In serious cases the affected pigs may even blow blood from their nostrils. Unfortunately as yet no positive method of treatment has been developed against the disease. Precaution should therefore be taken to prevent introduction of the disease into the swine herd. Consequently it is well to remember that all pigs showing signs of rhinitis are liable to transmit the disease to nursing pigs, also that pigs from litters where rhinitis is present despite a healthy appearance may give the disease to healthy litters.

Needless to add, pigs from infected premises frequently carry the infection when taken to clean premises. According to our authorities at the Ontario Veterinary College, when an outbreak of rhinitis occurs, brood sows that were mature before the outbreak, will not carry the infection.

Among the small seeds we note is one in which an ounce of an alfalfa timothy mixture, contains 18 twitch grass seeds and 20 Bladder Champion seeds—2 Dock, etc.

And so we might go on and reveal other reports equally as bad. Our readers may be interested to know that similar surveys were also made in nine other Central and Western Ontario counties. In contrast to Halton's 39 per cent Grade No. 1, we note Oxford with 61 per cent Grade No. 1, Brant with 53 per cent Grade No. 1. Only Peel and Norfolk Counties ranked below Halton from the standpoint of percentage grade No. 1 and the margin was very close.

We further note that only 20 per cent of the Halton samples were plant cleaned and of these 57 per cent graded No. 1. In Oxford on the other hand 62 per cent were plant cleaned and of these 68 per cent graded No. 1.

The only conclusion we can arrive at is that our farming mills are in bad shape. Surely this winter would be a good time to check over these screens and replace those that are in bad shape. What would be even better still if your mill is in bad shape would be to have your seed grain cleaned at one of our central cleaning plants or buy Grade No. 1 seed from someone else. After all the difference in price between feed grain and No. 1 seed grain is not a great deal.

Needless to add we do not like presenting Halton farmers in this light—as we intimated previously we are not accustomed to so doing in future may you "know what you sown".

SOAP FLAKE SNOW

Let's make Halton's trees clean and sparkling both!

Trimming the Christmas tree with flake snow is easy if you use Soap Flake Snow. It won't melt either.

Here's how it's done. Use three or four cups of soap flakes to one cup of warm water. Beat with beater until fluffy and smooth. Then spread immediately over branches of tree scattering it on with hands.

For sparkle, spread on some artificial glistening snow.

A lawyer is a man who will work as hard as he can to see that you get what's coming to him.

HOW TO WIN THE PRIZE before the race is run!

Watch Jimmy go!

That's right! Jimmy on his feet. And you can't see that he'll win first prize in this race.

Some day Jimmy will grow up and get married. Then he'll discover that one of the things he needs most for his family's future security is life insurance. But he'll be able to win this prize before the race is run—with life insurance.

For a little extra protection of life insurance begins the moment you make your first premium payment. And these premiums can help you win with the "prize" that savings provides as a college education for the young ones in a new home.

Now there are savings you can make with life insurance. You can important that cost 1/4 life of savings they help you check education. And life insurance they are long-term savings. The life insurance checking account is the best.

So keep your life insurance payments. Add to it the insurance as you can. And save money every way you can.
