

Poet's Corner
A QUALITY OF MIND

Age is a quality of mind. If you have left your dreams behind, if you no longer look ahead, if your ambitions are dead—then you are old. But if from life you take the best, if love you hold, and if in life you keep the zest, no matter how the years go by, no matter how the birthdays fly, you are not old.

NOT ENOUGH GIRLS

There is, in fact, a far better chance for girls to marry in Britain today than at any other time in the past century; there is a shortage of girls under twenty-one which is quite marked; a surplus of young men, right up to men aged thirty-five.

the trip down was fun too.

"I came down by bus again this year and had a lovely trip—a couple of stop-overs on the way to see the sights and do some shopping. The highway scenery was grand and we passed through a lot of interesting towns and cities. I'm going home by bus too."

Eight Foot Fireplace
Suppose you've heard tenor Jimmie Shields on the radio or in Toronto opera productions or concerts—don't know if he's a Hamiltonite by birth or not, but he lives just north of Burlington in an old country farm house.

Canada's Best
Lake Acton, Milton's bidding for more industries Commissioner of the Hamilton District Industrial Commission Jack Moore addressed Milton Rotary Club, town officials, Milton-North Trafalgar Planning Board members and guests Tuesday evening of last week.

Modern factory space is in short supply," he said. "There is a shortage of land but there is a shortage of serviced land."

Industry Hot
Burlington is on the look-out for industries. To quote last week's Burlington Gazette, "To secure a proper balance between residential and industrial properties the town of Burlington has for the past three weeks been securing options on properties adjacent to the C.N.R. track in Nelson township, lying between Hyatt Street and the Guelph Line."

Complete Quota
With new industries considering this district as a good location, this might easily happen here.

"A" Bomb Precaution
The chairman of Oakville's civil defense committee last week urged the town council to purchase a "water monitor" to detect the presence of radioactive elements in the Oakville water supply in the event an atomic bomb was dropped in Lake Ontario.

6,500 Tons
It has been estimated that approximately 6,500 tons of steel will be used in the assembly building of the new Ford plant in Trafalgar. Excavation for the foundations has already begun.

Old 'Home Freezer'
Modern Ice House
Though the modern refrigerator using electricity or other means of energy, is replacing the ice-box in many rural areas, ice can still be used to advantage when a source of supply is readily available.

Any unoccupied corner of a shed will serve as a site for a rough board enclosure. An enclosure two feet square and eight feet high will hold enough ice to provide fifty pounds a day for 100 days, after allowing for a reasonable amount of waste.

IT'S NEVER TOO SOON TO SAVE
You Can Open Your Youngster's Savings Account With One Dollar

Like some grain crops, the earlier you plant the savings habit, the better its yield. And it's certainly a habit worth planting for countless success stories show how saving builds happy homes and successful careers.

PLANNING PUPPET SHOW, CIRCUS, NEGRO MINSTRELEY? SEE CLERK!

If you're planning on exhibiting wax figures, wild animals or putting on a puppet show, circus riding, negro minstrelsy (or any other little act or feat, which common showmen usually exhibit) you had better see the town clerk about a permit.

We spent some time "buried" in the town vault recently and searched through the 1954 by-law passed by the town since it began its existence as a village. By-laws are passed by the council of the town to appoint town officials and pass laws that apply only within the municipality.

World's First
The first great burning gas turbine in the world is now running in the engineering shops of John Brown and Company, the famous Clydebank shipbuilders.

Skinny men, women gain 5, 10, 15 lbs.
Get New Pep, Vim, Vigor

As a town's by-laws tell a great many details of the town that have long been forgotten. With the high cost of living and wage increases in demand it is interesting to note that under by-law one and two of the village of Acton John Kamey was appointed inspector of licenses in 1974 and paid the sum of two dollars per day while actually on the duties of the said job.

According to by-law 12 you may be fined 50 cents if you allow a horse, colt, bull, steer, ox, heifer, ram, sheep, pig, goat, peccary or duck to run loose in the village.

Things were going up in 1977 because by that time the taxes required had jumped to \$675.48, and a levy of four and a half mills was necessary on the village taxpayers.

The by-laws tell a story of progress too. Mill street was widened twice. When George Hynds was reeve back in 1905 the town fathers were foresighted enough to make arrangement to purchase some land for the street widening at a cost of \$78.

Property for the Town Hall was purchased for \$500 from some members of the Adams family. "Artificial light" in the form of electricity was introduced to the town because of a by-law passed in 1898 "to provide for manufacturing and supplying electric lighting within the Corporation limits."

It was the ratepayers who decided too to let council purchase a steam fire engine and apparatus connected therewith and to construct water tanks. The debenture for the fire protection measure was for \$4,500 which was a lot of money in those days.

Acton has had a park for a great many years. For \$3,000 back in 1929 the town "acquired lands for a Public Park and Drive," from William Edgar Smith.

It was in 1920 that a by-law was passed appointing E. A. James and Co. Ltd. as engineers "to superintend the installation of a waterworks system."

More recently of course by-laws have been issued for a sewerage system which to date marks the community's largest step.

Of the 1954 by-law passed nine-way back in 1974, 24 were passed in 1951 and 40 in 1950, the community's first year as a town. In the first year as a village, 1971, the town fathers passed 23 by-laws.

Grandma was one of those unforgettable characters you read about. And every time I think of her, I remember one of her favourite sayings: "Early sown—early mown."

Many years have passed since Grandma died. But just the other day something happened to remind me of that old motto of hers.

I was working over my budget, trying not to admit what the figures told me. My savings had slipped. At this rate, it was a fact that some of the things I'd wanted to save for would have to wait.

"Old-fashioned stuff!" I told myself. Then I got to thinking. "Maybe it is tough to save today. But it's still important... still my only hope of getting some of the things I want most."

"Well, at least I'm keeping up my life insurance payments," I thought. "That's a way of saving which combines protection for my family as well. And maybe if I make an extra effort to put more money aside I'll reach my goals sooner."

"So here goes! I'll try again. I'll find some new ways to economize. Somehow I'm sure I can manage to be more thrifty."

And you know— it's a funny thing! The moment I made that decision, I realized that Grandma's idea was not old-fashioned. I've just caught up with her now!

Early sown
Early mown
"New I've caught up with Grandma!"
Grandma was one of those unforgettable characters you read about. And every time I think of her, I remember one of her favourite sayings: "Early sown—early mown."

The Big New '52 FORD
NOW ON DISPLAY AT THOMPSON MOTORS

The Customline Fordor Sedan shown is one model in two lines of completely new 1952 Ford passenger cars. The new Ford Coachcraft bodies increase the driver's field of vision both front and rear with a new one-piece curved windshield, a one-piece rear window extending over the full width of the car, and narrower, repositioned front pillars. A novel new feature is the relocation of the gasoline filler pipe behind the rear license plate and below the rear compartment floor, adding more useable luggage space and making the pipe more easily accessible from either side of the car.
