**What boosts a man's stock with people like these?**

**HIS BOSS**

Invariably, employers like the kind of man who readily accepts responsibility. And they know that this attitude is suggested by a man's ownership of life insurance. No life insurance can be a "plus" to a man in any line of work.

**HIS BANKER**

Because bankers and others who lend money render such useful service, their opinion of a man is important. To them, ownership of adequate life insurance is often an important factor in establishing satisfactory credit.

**HIS WIFE**

Many a man is rated "the best husband in the world" by his wife. But if he owns life insurance which provides his family with financial security, he enjoys extra laurels because of his concern for their future.

**HIS FRIENDS AND NEIGHBOURS**

When they know that a man owns life insurance, they know he's trying to achieve financial independence for his family and, perhaps, for his own later years. And because he's doing his share in this way, they regard him with respect.

Today, millions of Canadians are providing security for themselves and their families—and enjoying greater prestige—through owning life insurance!

**AT YOUR SERVICE!** More than 50 Canadian, British and United States life insurance companies compete actively to offer you the best possible life insurance service. A trained life underwriter from any of these companies will gladly help you choose the kind and amount of life insurance that will best fit your needs.

**THE CRUEL SEA**  
By Nicholas Monsarrat

First of all, here is a book for men. Of course it will appeal to a wide range of readers, but the men often seem to have more difficulty in being pleased.

The Cruel Sea is a story of the war. Mr. Monsarrat knows best what it's about, and here's what he says. "This is the story—the long and true story—of one ocean, two ships, and about a hundred and fifty men. It is a long story because it deals with a long and brutal battle, the worst of any war. It has two ships because the sea was so bad and had to be replaced by a ship that is a corvette, a new type of 'escort ship, an experiment designed to meet a desperate situation still over the horizon. She is brand-new; the time is November 1939; her name is H.M.S. Compass Rose."

Yes, the time was November 1939, to begin with. Part one is 1939, and there are seven parts altogether for seven years of fighting from 1939 till 1945.

The Battle of the Atlantic is not documented; this is a human story of what the Compass Rose and the other seven years did to those hundred and fifty men, from a young, newly commissioned and just married six weeks when he was assigned to the corvette, to the most hardened old sea dog.

A novel with the surge of the sea itself, its details bring to life a reality that to many of us might seem clever fiction.

The names are of course fictitious. But Nicholas Monsarrat was in the Royal Navy during the war. He himself commanded a corvette, and later a frigate. (Another of his books is H.M. Corvette.)

He was the son of a Liverpool surgeon, and left law studies for journalism. Novels, newspaper articles, some poetry and a play show the wisdom of his choice! He has travelled widely in Europe.

Since the war he has been employed in South Africa, as director of the United Kingdom Information office at Johannesburg.

The Cruel Sea is a story of people just like ourselves who were thrust into the role of heroes. They remain just like ourselves.

**A SMILE IN SEASON**

Brown's fishing venture had been a flop, and on his way home he entered the local fish market. When the dealer asked what he wanted, Brown said, "Just stand over there and throw me five of the biggest trout you have."

"Throw 'em? What for?" asked the dealer in amazement.

"So I can tell the wife I caught them," replied Brown. "I may be a poor fisherman, but I am no liar."

**Right from the start - you'll love it!**

IT ISN'T always the big things that tell you how downright good a car really is.

You'll note, for example, that this Buick has—not one—but two sets of figures on its speedometer. There's one for total mileage, which almost all cars give you. And there's one for trip mileage, found on all Buicks, but rare on other cars carrying comparable price tags.

Then there's the way a Buick starts. No groping for a starter button on the dash. You just push down your foot on the accelerator pedal—and one motion does the whole job.

That's something else found only on a Buick—and we can give you a good guess what the reason is—it's a costlier device.

And when you step on this combined starter-accelerator—boy, do things start to happen! That great-powered Fireball 8 Engine purrs into action—and you're off with the steady swoop of a Diesel streamliner on the rails.

Now, you discover something else. Buick's Million Dollar Ride. Sure-footed on curves, level-gaited on the straightaway, steady and true on course—it's worth every dollar it cost in tools, engineering and special features—including the magic of Dynaflow Drive.\*

What we are trying to tell you is this:

No matter how you size up a 1952 Buick—by its features, its fabrics, the way it performs, the way it rides—or the cost per mile of operation—you find that nothing is spared to make it the greatest buy it has been in years.

And that's doubly significant when you remember that Buick delivered prices start down at a figure that any new-car buyer can easily reach.

How about checking this for yourself, at your nearest Buick dealer's?
