

WEDDING TAKES PLACE IN TORONTO BAPTIST CHURCH

Runnymede Baptist Church was tastefully decorated with white...

The bride, given away by her father, wore a butterfly-length gown of white nylon sheer over...

Her sister, Mrs. J. Daley, was bridesmaid, wearing a pink nylon sheer gown and carried a bouquet of white carnations and pink rose buds.

David Sills was the best man. Before the ceremony "The Lord's Prayer" was sung and during the signing of the register the soloist sang "Because."

Rev. J. Coulter of the Baptist Mission officiated.

The reception was held at the "Arlington Club," where the guests were received by the bride's mother, wearing navy sheer with white accessories and the groom's mother in a gown of lady love mauve with grey and mauve accessories.

Following a wedding trip to the Eastern States, the young couple will be at home at the "Bellaire Apts," Roscliffe Ave.

To reach iron deposits in north-western Ontario a lake at Steep Rock had to be drained.

Books IN REVIEW

"Timeless" by Prince Nicholas Tchekotou

The reader is led directly into the spirit of the book by the name of author, Baronesses and princes contrast with peasants; the setting, however, is not dated as pre-revolutionary Russia because the story is as the title, "timeless."

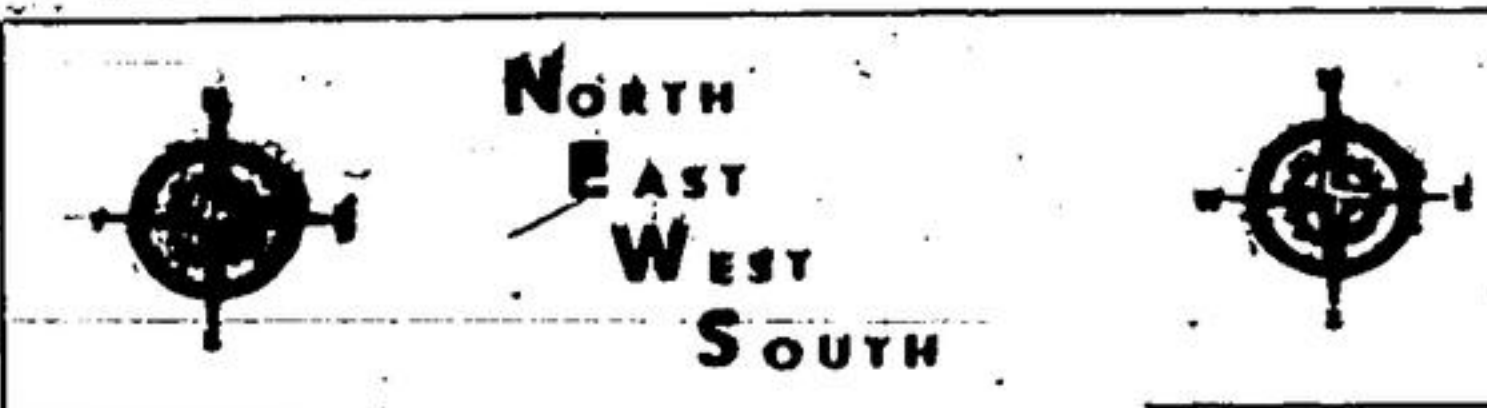

The romance is an exquisite one, with various aspects stressing the everlasting quality of true love. The theme is not overdone; the philosophy is tender.

Georgia, the setting of some of the most impressive scenes, is a little known country in south-eastern Europe. Very little has ever been written about it.

Other of the vivid scenes are laid in Paris.

An old Baroness, in her usual stately manner, walks one day a little further than usual—to a funeral in a cemetery near her Paris home. Here she is given a manuscript by a young man she had never seen before. He's the grandson of the man who is being buried. This manuscript reveals the manner in which real love has been timelessly in the lives of these two people, even though they were years separated. Taya, the Baroness, and Shola d'Herio only knew each other a few months actually.

Their idealistic philosophy is indeed an adaptable one in a rather bewildered world.

Go West, New Oil

While Haltonites are still watching with interest the laying of an oil pipe line near Milton, comes the announcement that a second pipe line may cross the county!

Reeve Wickson of Trafalgar reported to council that surveyors of the Trans-Northern Pipeline Company were at work. The second pipe line would carry oil west, after it's been to Portland, Maine and Montreal.

Halton Landmark

Of Local Interest from the Oakville Record-Star

"At the corner of the Seventh Line and the Dundas highway on the south-east side, there is a modern, low slung building with large windows, an architectural design that just spelt 20th century. This building is the Trafalgar Township Memorial Hall and Community Centre and is something that all Trafalgar residents are proud to point to as their own. However, just down the road from this modern structure, there is another building which the people are equally proud of; this time not for its newness but for its oldness and history. This is the General Store and Post Office owned and operated by Leslie Bradley and his wife.

"As far as the Bradleys can gather, it was built sometime during the 1830's, which would make it over one hundred years ago."

On a beam shortly after they bought the store the Bradleys found an old account book of 1845-1847. Items with English pounds and pence were written with a quill pen.

"The mail was brought to the Post Office by stage coach, and the men used to change horses in the barn directly back of the store. . . in the days of the stage coach it was the only post office for miles around, and people used to come all the way from Erin to get their mail."

"So it was then the nearest post office to this town—or what there was of it, too!"

"The freight was all brought in by boat . . . it was then put on carts and taken by ox teams up the corduroy Seventh line." The store is still much the same.

Ferils of Peru A Woodstock driver will never forget Peru—and he has never been to South America. W. A. McDonald was driving across a bridge spanning the Sixteen Mile creek just north of Milton at Peru when he felt the bridge quiver. He pressed on the gas and just made it when the 30-foot steel frame bridge collapsed!

His rear wheels still hung over the edge of a drop to the stream below, where, if he had not accelerated, he might have been buried beneath the 11 ton of bagged lime he was carrying.

Milton Rest Rooms Milton Council has approved plans for new rest rooms for the town. The plans show a three storey structure with basement and main floor for wash rooms and the top floor for janitor's quarters. There will be a large 20 by 12 foot waiting room.

There'll be a large, modern glass entranceway to welcome those from town or country who will use the building, provided for in the will of a late Milton resident.

Laugh Here Very few readers of newspapers pass up the jokes. For a weekly smile, we shall pass on some of the jokes we read in Halton newspapers each week as we search for news interesting to readers of this paper.

Oakville always has a laugh or two. Here was last week's choice: Manager: This manual will do half your work. New employee: Fine. I'll take two.

Saturday Comment "Early Saturday closing seems to be the biggest news of the year to date in Georgetown," says an editorial in last week's Georgetown Herald. "It has caught the public fancy like nothing else the past year. In fact on only two previous occasions can we remember as much interest from the man in the street—the time council asked the bus line to move their coach stop off Main Street, and the time the

provincial police and council were at loggerheads about a number of matters."

Georgetown stores are closed Saturday nights—traditionally the farmers night in town and open Fridays instead.

Identical Army Twins Two identical twins will be in charge of the Oakville Salvation Army citadel when it opens tomorrow! Lieutenants Dorothy and Doris Trussell were born in Brockville and joined the Salvation Army over five years ago. They're both just over five feet, both brunettes, both wear glasses, and they both seem to smile simultaneously, according to report.

Radioactive Tag Insect's Passport

Scientists have only recently developed methods that enable them to imitate the procedure of the passport office and provide any wandering insect with the equivalent of a passport. This makes it possible to keep a record of the insect's movements, study its habits and makes it easy for the entomologist to locate the insect for any future requirement. With characteristic thoroughness, the scientists have developed a tagging system that surpasses in effectiveness anything the passport office has to offer. Once the insect is provided with a radioactive passport or, more correctly stated, with a radioactive tag or tracer, it is marked for the duration of the tracer. This means of identification cannot be lost or stolen. Even should the bearer of the radioactive passport meet with foul play and get caught, eaten, digested, and assimilated in the body of another animal, the scientist can come along with a Geiger counter and point an accusing finger on the culprit-predator.

W. F. Baldwin, of the Canada Department of Agriculture's Belleville Laboratories, who is working on this problem in co-operation with atomic energy scientists at Chalk River, has just disclosed some startling results obtained by feeding or injecting the parasite of the spruce saw-fly and the rove beetle, a parasite of root maggots, with radioactive phosphorus. Such treatment as is well known makes the treated insect radioactive. But Mr. Baldwin's experiments show that radioactivity can also be transmitted to the insect's progeny. These important results will enable entomologists to study the movement and spread of several generations of economically important parasites of crop destroying insects, among which are the spruce saw-fly and the root maggot.

Other investigations envisaged by Mr. Baldwin are: (1) identification of the main predators of mosquito larvae—which can be done very simply by making the larvae radioactive and then, by means of a Geiger counter, picking out the types of insect-predators which have fed on the larvae; (2) find out how a parasite goes about finding its host; and (3) study the dispersion and range of various parasites and predators.

BIG METAL PRODUCER

Nearly everyone knows that Canada leads the world in the production of nickel. Not so well known, says the Financial Post, is our record with other metals. In aluminum, for instance we were the free world's second largest producer last year, turning out approximately as much as all other countries, the U.S. excluded. Canada was the free world's third largest producer of silver, producing 24.2 million ounces in 1951, against Mexico's 43.8 million ounces.

Canada was exceeded by the Belgian Congo, French Morocco and Northern Rhodesia as a producer of cobalt metal in 1951, but was narrowly ahead of the U.S.

Canada appears to have been the free world's third largest producer of magnesium last year, following the U.S. and U.K.

Canadians use about 16,000,000 cotton terry cloth towels a year.

RELATIVES, FRIENDS ATTEND CHRISTENING OF HEATHER ANN DUMARCH

On Sunday, July 27, at 2:30 p.m., Heather Ann Dumarch, only daughter of Mr. and Mrs. William M. Dumarch, was christened at Knox Presbyterian Church, Acton. The pastor, Rev. Robert H. Armstrong, M.A., B.D., officiated. Godparents were Mr. and Mrs. Roy H. Hines, Long Branch and Mrs. John Mellon, Acton.

After the christening, about 40 relatives and friends were entertained at a buffet luncheon at the home of the baby's parents, Mill St. Tea was poured by the baby's great-aunts, Mrs. E. M. Hartley, Elora, formerly of London, England and Mrs. R. H. Bowman, Guelph.

Guests were present from Kitchener, Montreal, Guelph, Elora, Milton, Long Branch, Alderwood and Acton.

BITING REMARK

On the bayonet course a rookie was particularly clumsy. He charged the dummy, stumbled, missed the bayonet jab and flattened his nose against the sack.

"Nice work, soldier," said the sarcastic sergeant. "If you can't stick him—bite him."

Both are Delicious! "SALADA" TEA & COFFEE

AMONG TOKENS of appreciation presented to members of the Canadian Red Cross Society, host to the 18th International Red Cross Conference, is this "slendang" or scarf worn by Harold H. Leather, Hamilton, chairman of the Executive Committee. The scarf and a book were gifts of the Indonesian delegates. Left to right are Soediman Kartohadiprodio, Hon. Leopold Macaulay, Chairman of Central Council, Mr. Leather, Miss Paramita R. Abdoerachman, and Lt. Col. Dr. Soemarno Sosroatmodjo.

Courses Available to students of North Halton High School District The schools at Acton, Milton and Georgetown, operating under North Halton High School District offer courses in the following: SPECIAL COMMERCIAL A one year course, equivalent to that offered in any Canadian business college, available to students who have completed Grade XI. Subjects: shorthand, typing, office practice, bookkeeping, business law, penmanship, business arithmetic, business correspondence and spelling, economics, physical education. ACADEMIC LOWER SCHOOL Grades IX and X, leading to Intermediate Certificate. Obligatory subjects: English, social studies, mathematics, guidance, physical education. Plus any three of these options: General science, French, Art and Music, shop work, home economics, typewriting and business practice. ACADEMIC MIDDLE SCHOOL Grades XI and XII, leading to Secondary School Graduation diploma. Obligatory subjects: English, history, physical education. Plus any four of the following options: Mathematics, science, French, Latin, German, commercial work, agriculture, shop work, home economics. ACADEMIC UPPER SCHOOL Grade XIII, leading to Honour Matriculation and entrance to all faculties and courses except Honour Classics in any Canadian university. Subjects: English, history, algebra, geometry, trigonometry, zoology, physics, chemistry, Latin, French, German. SEND YOUR CHILDREN TO HIGH SCHOOL Give them this wonderful opportunity which is provided free of charge to everyone. Transportation is provided for rural students, as well as transportation between schools for special subjects. Parents and pupils should confer with their nearest principal prior to school opening in September. Grade XI and XII students who plan to take the Special Commercial course at Georgetown High School should send their names and addresses to the Secretary. If a student lives in Esqueping or Nassagaweya Township, supply the name of your bus driver also. O. ROBBINS Acton J. E. MARCELLUS Milton J. L. LAMBERT Georgetown Students who plan to attend secondary schools outside the North Halton District must have written permission from the North Halton Board in order to do so. Parents are requested to examine the course of study available in this District before application is made to attend an outside school, due to the heavy additional cost to this District. Application forms may be had at the offices of the Milton Champion, Acton Free Press and Georgetown Herald, or from the board secretary. The forms should be completed and mailed to the undersigned not later than August 22nd, 1951. G. O. BROWN, Secretary, North Halton District Board, Georgetown
