**St. Alban's Church
Wedding Setting**

St. Alban's Anglican Church, Acton, was the setting for the recent marriage of Miss Muriel Christina Johnston of Rockwood and Carl Banas of Toronto, formerly of Guelph. The bride is the daughter of Andrew Johnston of R.R. 3 Acton and the groom is the son of Mrs. Frank Banas of Toronto. Rev. Ralph E. Price officiated at the ceremony and Mrs. Frank Oakes presided at the console of the organ.

The bride wore a floor length gown of Swiss embroidered lace and her shoulder length veil of matching lace was caught to a pearl tiara. She carried a bouquet of red roses, and fern.

She was attended by her sister, Mrs. V. Hawkes, as matron of honor, who wore a ballerina length dress with lace bolero and matching mittens. She carried a bouquet of yellow roses.

William Harrison of Toronto, cousin of the groom, was best man.

Following the ceremony, a reception was held at the home of the bride's father, when guests were present from Toronto, Clinton, Walkerton, Ospringe and Saskatoon, Saskatchewan.

For travelling, the bride donned a blue suit with a dark navy blue hat and matching accessories. Mr. and Mrs. Banas reside in Toronto.

THE COMPLETE CANADIAN VACATION: Canadians are a lucky people. When summer rolls around they never have to cross borders or leave Canadian shores to find a holiday haven. From the grandeur of the Rockies, past rolling hills, forests and streams, down to the picturesque East Coast, Canada can offer everything vacation-wise. Conveniently located at the best sites are the Canadian Pacific Railway's summer resort hotels. Hiking and mountain climbing (1) are favorite pastimes at Banff Springs and Chateau Lake Louise in the Rockies. History, tradition of the Old West and a bit of the bizarre are re-enacted during mid-July Indian days (2) at Banff. Golf (3), whether down east at the Digby Pines in Nova Scotia and the Algonquin in New Brunswick or a mile high in the Rockies at Banff, is always popular. Swimming and girls (4) are attractions to be found at all resorts, both east and west. If summer heat and hay fever tend to interfere with your vacation plans, the cooling, pollen-free breezes at Lakeside Inn, near Yarmouth, N.S., (5) offer a sure-fire remedy.

BOYS OF ACTON
Camping in Muskoka

AT CAMP NAGIWA, JULY 4th to JULY 18th
JULY 18th to AUGUST 1st

Camp fees \$18.00 per week.

This camp is sponsored by the Acton Y's Men's Club in conjunction with the Guelph and Galt Y.M.C.A.'s.

We would like every boy in Acton to take advantage of this opportunity to attend camp. The Y's Men's Club will help financially in special cases, so let's have your enquiries or applications.

Literature on the camp is available at the Acton Y.M.C.A. Act now as the enrolment is limited.

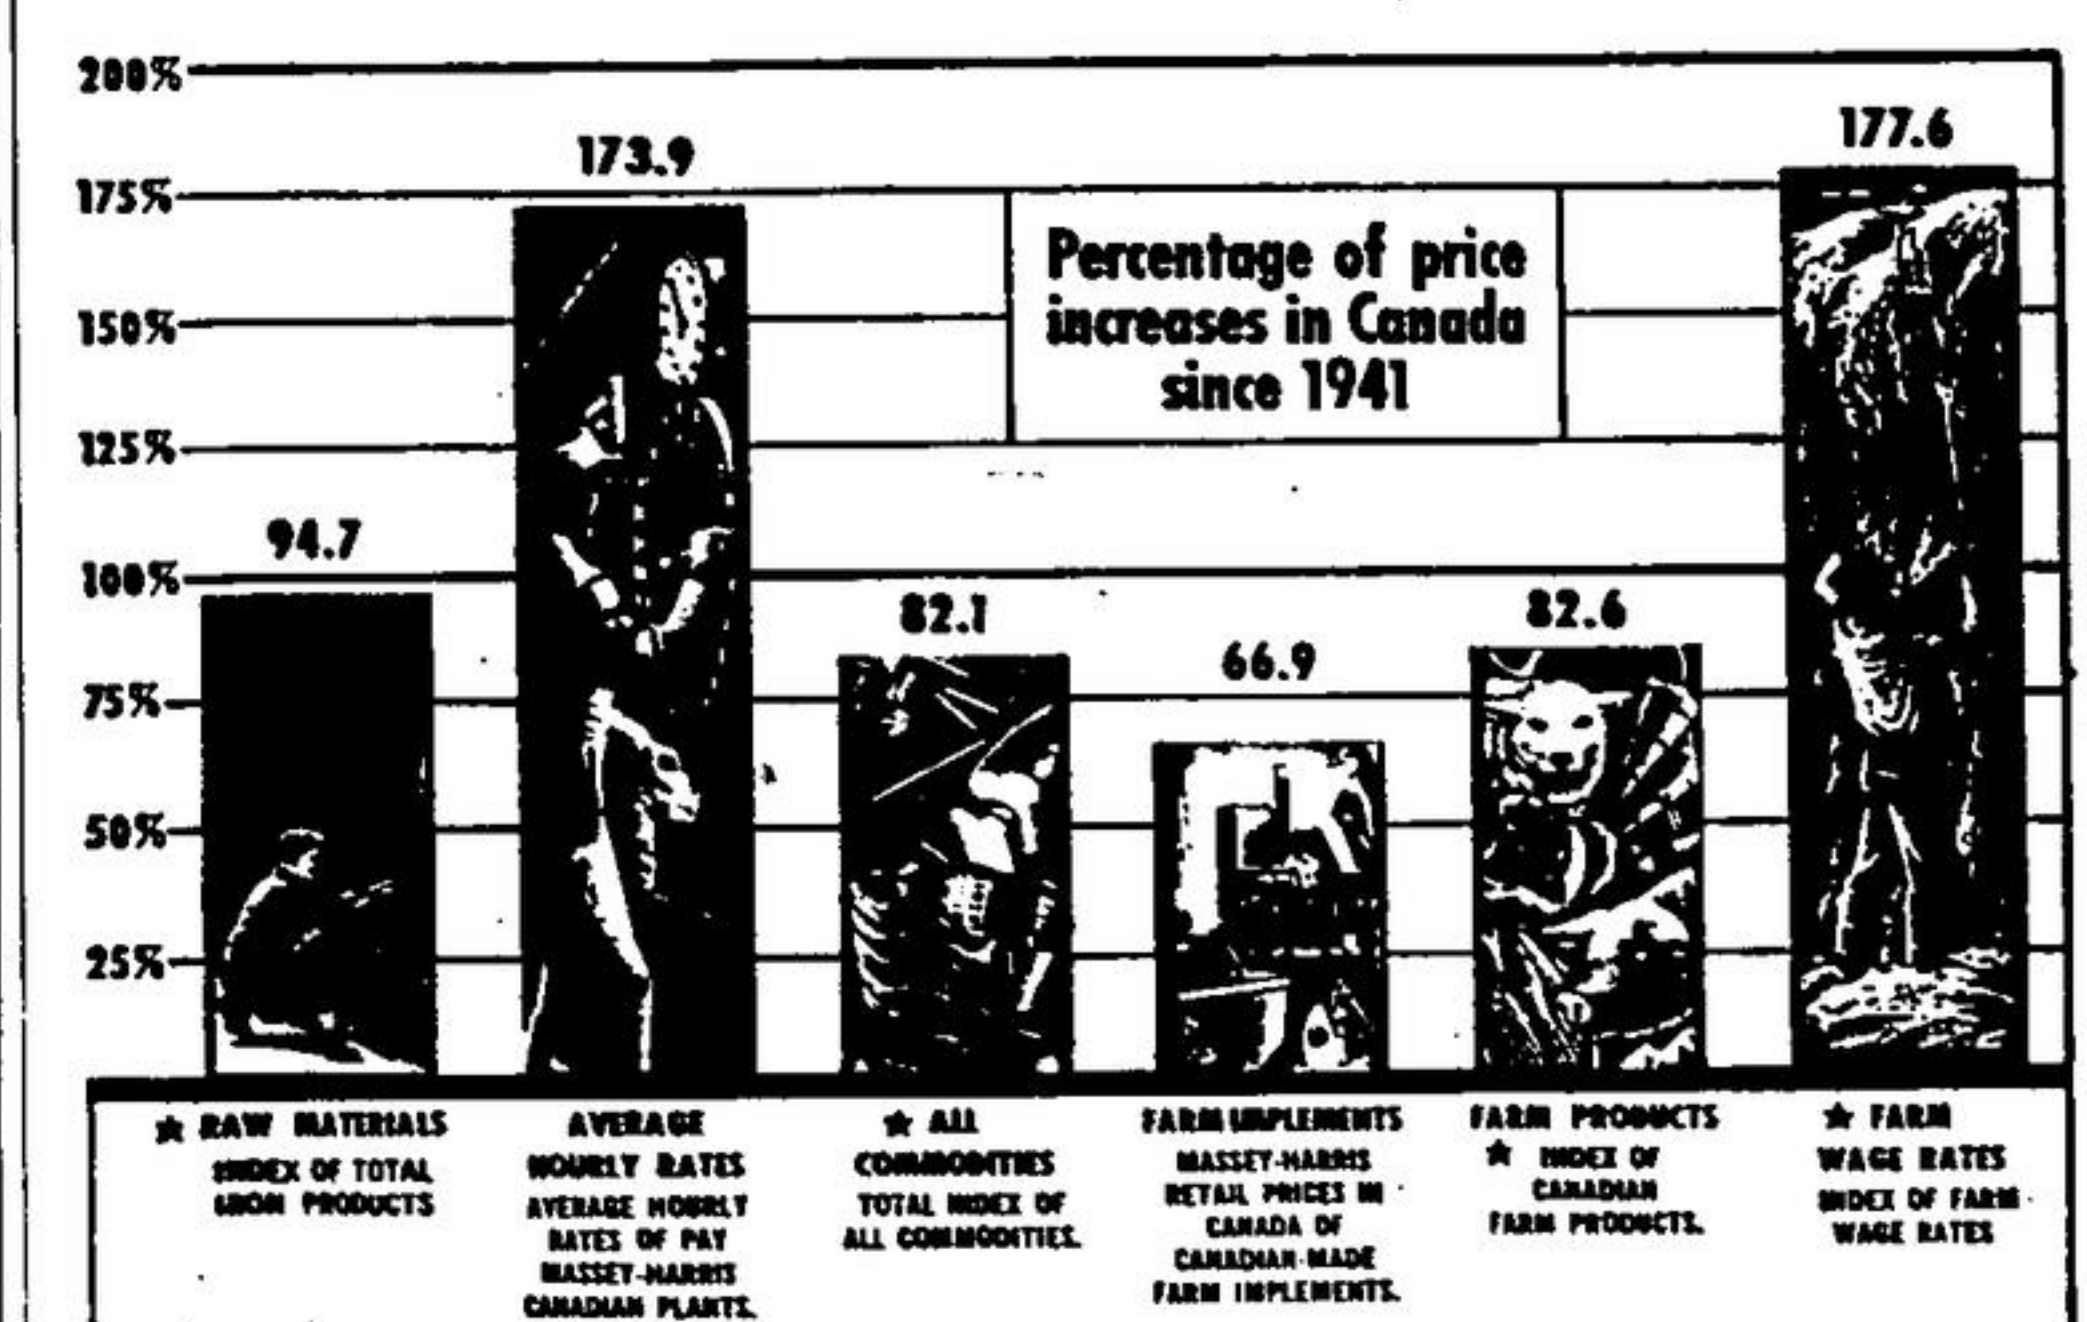

Drop in and discuss the matter with Dick Schmill at the Y

TRUE?
Little Nellie—Mamma, I've got a stomach ache.
Mother—That's because you've been without lunch. Your stomach is empty. You would feel better if you had something in it.
That afternoon the minister called, and in the course of the conversation remarked that he had been suffering all day with a severe headache.
Little Nellie—That's because it's empty. You'd feel better if you had something in it.

**INDEXES SHOW
IMPLEMENT PRICES
AT LOW LEVEL OF INCREASE**

That implement prices have been kept at a low level is clearly shown by the comparison of Dominion Bureau of Statistics index figures, which give an increase in "all commodities" since 1941 of 82.1%, as against an increase in a comparable index for Massey-Harris implements of only 66.9%. This low percentage of increase, too, is shown in the face of an increase in the index figure for materials of 94.7% and of Massey-Harris hourly rates of pay of 173.9% as can be seen by referring to the chart shown above.

Also, the indexes show that while farm implements have only increased 66.9% there has been an increase in the price of farm products of 82.6% and the scarcity of farm labour has caused farm wage rates to increase by 177.6%.

Farmers depend upon mechanization to offset the scarcity and high cost of labour and the indexes show that prices of such equipment have been maintained at a comparatively low level of increase. Farm equipment with its time and labour saving advantages offers exceptional value for the money.

*Dominion Bureau of Statistics Wholesale Price and Farm Wage Rate Indexes.

MASSEY-HARRIS-FERGUSON LIMITED
Makers of high-quality farm implements since 1847

**Favorite Sport Now
Pastime All Year**

Although many sportsmen put away their guns until fall with the expiry of the resident hunting licence at the end of February, an increasing number are learning to make a year-round pastime of their favourite sport by taking advantage of good hunting during the summer. The trend is noted by H. W. Clark, Conservation Officer in the Lake Huron District for the Ontario Department of Lands and Forests.

The Department issues a summer licence which permits carrying a gun until September 1 and to kill groundhogs, crows and starling, and in some areas fox. Wing shot and riflemen find them excellent sport.

"Shooting crows, using a stuffed owl or crow call as lures, can be as thrilling and more comfortable than sitting in a damp duck blind on a chilly morning in early winter," says Conservation Officer Clark, "and it takes just as much skill to pick off a flying crow as a duck."

He warned those who hike the fields in summer with a light rifle that the 22 calibre rim fire is a dangerous weapon and that the glancing bullet "will carry for an enormous distance without breaking up."

It is quite legal to carry a high velocity rifle during the summer months, he adds. "The high velocity bullets not only result in more kills and less wounding but also blow up where they strike and are far safer in a settled district than rim fire."

**Picnic For Blind
Planned by Board**

A meeting of the Halton Advisory Board of the Canadian National Institute for the Blind was held in the office of the chairman, G. Frank Thompson on May 10. Those present were Mrs. Ryrie, Mrs. Davis, Mrs. Bell, Mrs. Gowland, Messrs. Fearman, Tier, G. E. Elliott, J. E. Whitlock, Hill, Riddolls, Thompson and the district secretary, W. Stanley.

Arrangements were made for a joint picnic with Peel county, to be held on Wednesday, June 23 at Appleby College. This is an annual picnic and provides much pleasure for the sightless in Peel and Halton counties.

The chairman also reported that of Milton's quota of \$2,500, approximately \$1,000 has been subscribed for the Building Fund for the C.N.I.B. The campaign is still in progress.

**Technicians Tell
Care of Television**

There are two things to remember in taking care of a television set—first, treat it like any other prized piece of furniture, and second, if anything goes wrong, call your serviceman.

According to technicians, it's likely that more TV sets have been damaged by the home handyman's tinkering than for any other reason. Extremely high voltages inside the set are a constant hazard to the inexperienced tinkerer. That's why the manufacturer puts a safety interlock on the back cover of the set, to cut off the electricity when the back is removed.

The repairmen, who have spent years learning how to play doctor to a television set, explain further that although the construction of a set is pretty rugged, there are some extremely delicate parts and adjustments. It could be compared with a military aircraft, which is built to stand rough treatment, but is so complicated that surely no amateur would attempt to make repairs on it.

Any one of many adjustments, say the experts, can throw the whole picture out of kilter and affect all the others. Because of this, it takes a thorough understanding of what goes on in a set to go at it properly.

The serviceman says you'll save money ahead by calling a qualified technician, or, best of all, get a service contract that covers installation, parts replacement and repairs along with the set when you buy it.

This policy is not meant to exclude the set from normal household cleaning, however. The cabinet and the safety glass in front of the picture tube can be dusted and cleaned and polished just as any other item of furniture in your living room.

**Gouzenko's Home
Known Only to Few**

Ever since Igor Gouzenko walked out of the Russian Embassy in Ottawa in September, 1945, with sensational evidence of the Soviet Union's betrayal of its allies, he and his wife, Svetlana, have been fugitives from the Soviet Secret Police.

After smuggling top-secret papers out of the Russian Embassy, Gouzenko turned them over to the Royal Canadian Mounted Police who examined them and heard Gouzenko's story. The papers showed that samples of uranium had been sent to Moscow from American atomic laboratories.

Convinced that Gouzenko was telling the truth, the Canadian Government provided a hideout in the country for him, his wife and small son. The family has moved its residence several times and changed its assumed name twice. The name cannot be changed again, however. There are two children now—the boy, ten, and a girl who is eight—and the explanation of a change in name would be difficult.

The children do not know their real name, and have no idea their father is wanted by the Soviet police. They have been taught that their parents were not born in Russia but in another country of Europe. Though Mrs. Gouzenko has never been there, she has studied it so closely—with the help of Canadian Intelligence experts—that she "knows it by heart."

No one knows where the Gouzenkos live except a few Canadian government officials and a body-guard—and R.C.M.P. constable who poses as Gouzenko's handy man and chauffeur. Only Gouzenko's lawyer, the editors for whom he writes and some journalists who have interviewed him, know the couple by their real name.

**Uranium Prospects
Boom in Athabaska**

Since the day in 1952 when young Albert Zeemel made a record uranium strike at Lake Athabaska in northern Saskatchewan, what had been a mere trickle of prospectors has swelled to an avalanche. Zeemel was prospecting for Gunnar Gold Mines Ltd. News of his strike boosted Gunnar stock from 40 cents to \$12 a share and started a headlong rush for the North.

To keep these people alive, the Saskatchewan government established Uranium City, a raw, drab looking pioneer settlement that stands like an open gash in the bush. There is no plumbing; drinking water, hauled up from the lake, sells at \$1 a barrel. The social and business center is the town's one best party. Here more local syndicates and companies are formed, more claims bought and sold, than on Wall Street.

For uranium hunting all you need is a \$50 Geiger counter, a miner's license costing \$5 and a map showing unclaimed territory. But the only way to reach the unclaimed area is to charter a float plane. Though most of the prospectors have found nothing and gone broke, a few lucky ones have made strikes without even a Geiger. They simply "tied on" their claims alongside others that were properly prospected. An airplane pilot and three brick-layers made fortunes in the on-claims.

Mine employees make big pay—\$2.50 an hour for laborers, several times that for skilled workers. Athabaska's prosperity seems assured until 1963, for the U.S. Atomic Energy Commission has a contract with the Dominion Government to purchase all the uranium oxide produced in Canada until that date.

RACING PIGEONS

Racing pigeons bred by a Leicester business man are now earning dollars for Britain. Four cock and hens were recently flown to Riverside, Ontario, and another pair to Melvindale, Mich., by Louis Massarella, who started breeding the birds as a hobby only three years ago. Each pair of birds was sold for \$60.

FILM OF THE YEAR

Best British film of the year, according to the British Film Academy was "Genevieve." Audrey Hepburn was singled out as best British actress for 1953 for her performance in "Roman Holiday" and Sir John Gielgud as best British actor for his part in "Julius Caesar." Norman Wisdom is cited as the most promising newcomer to the screen for his role in "Trouble in Store."

BRITISH INVENTION

A British invention to help the Navy operate faster and bigger planes from aircraft carriers is a signalling system which, subject to success in further trials, will ultimately supersede the present system of landing by hand signals. It can be used on carriers or airfields by means of lights and a large curved mirror. With this device, irrespective of the motion of the ship pilots will be beamed down to the flight deck at a constant angle by day or night.

Taxes will take one dollar in three of the net national income of Canadians in the current year.
