

Township Officials Honor I. M. Bennett

Isaac M. Bennett, Esquire, township clerk for a quarter of a century who retired this year, was honored by present and past officials of the township at a dinner at Hawthorne Lodge, Milton Friday, May 7.

Present for the occasion were seven township reeves five of whom had been warden of the county during Mr. Bennett's term of office. Reeve Wilfred Bird was chairman and during the evening everyone present spoke briefly, noting Mr. Bennett's devotion to duty during his years as a township official and wishing him happiness in future.

A handsome silver ring was presented to the guest of honor by assessment commissioner Arthur Benton and a bouquet of flowers to Mrs. Bennett, also a guest, by the deputy-reeve Walter Linham. Councillor George Currie read an address while the presentations were being made.

Present were Thomas L. Leslie, George Cleave, George Currie, Howard May and George Leslie, five men who had served as county wardens during their reevehip; W. J. L. Hampshire, retired Halton sheriff and the only living reeve who preceded Mr. Bennett's term of office; the present councillor, Reeve Bird, Deputy Reeve Linham and Councillors Campbell Sinclair, Spencer Wilson and George Currie; K. C. Lindsay who succeeded the clerk in office; assessment commissioner Arthur Benton; road superintendent William Townsend; George C. Brown, who handles some of the township insurance and Fred Chapman, manager of the Bank of Commerce; and Mr. and Mrs. Bennett's son-in-law and daughter Mr. and Mrs. William Corley.

Plant Evergreens To Beautify Home

Foundation planting, as the name implies, refers to planting near the base of a structure, and usually includes varieties which are by nature low growing or medium in height. Judicious selection of material for this purpose will enhance good architectural features and may also assist in concealing structural defects.

Tree and shrubs used in foundation planting may be either evergreen or deciduous or a combination of both. A high narrow house will actually appear to have gained height if planted with columnar or pyramidal material. A much better effect in this case will be obtained by using shrubs of medium height which will produce masses of foliage and extending them some distance beyond the width of the building. Conversely taller narrow growing trees or shrubs may be used to excellent advantage if the house is low and wide.

Evergreens are usually more expensive than flowering shrubs but are effective over a much longer period. The improvement in appearance will more than justify the expense in planting an evergreen foundation at least in front of the home and at entrance points. This type of planting is especially satisfactory in areas of light snowfall where occasional patches of colour do so much to brighten an otherwise drab appearance.

Straight lines are to be avoided and no variety should be used which requires constant shearing to keep it within bounds. Dark green evergreens do not show up as well against deep red brick homes as those with lighter green or gold tipped foliage. Globe shaped varieties retain their individuality and should be omitted from groups where informal mass effect is the aim. Those of regular shape are more satisfactory if planted by steps or in any situation requiring formal treatment.

Profits on Dollar Sales at 5.2 Cents

Profits on each dollar of sales in Canadian manufacturing industry averaged out at only 5.2 cents for the year 1953, W. E. Weaver, chairman of the Education Committee of the Canadian Manufacturers' Association, reported Tuesday.

This figure was .02 cents better than 1952's profits but .06 cents less than the 1951 figure. Mr. Weaver's report was based on a national survey of the breakdown of the industry's sales dollar, made by the Association's Education Department. This survey which took over two months to complete, broke down the profits even further by showing that 23 cents of 1953's dollar profit of 5.2 cents was paid out in dividends while 29 cents was retained in the business. These figures compared with 22 cents in dividends and 28 cents profit on 1952's sales dollar.

WHITEFISH TRAVEL

Two million eyed Whitefish eggs were shipped from the Kingsville hatchery to the hatchery in Port Arthur for distribution in Lake Nipigon. This is the first time that Lake Erie whitefish have been transferred to Northern Ontario for restocking purposes. The Department of Lands and Forests reports. To plant the eggs holes were cut in the ice and 100,000 eggs, approximately placed in each hole at depths ranging from eight to 16 feet along six miles. The eggs were flown to the planting site in a departmental aircraft. They were carried on wire and cotton trays in wooden cases and packed in snow and moss.

Hello Homemakers! If the teenagers are singing Allez-vous En and saying Merci then perhaps you can go along with their interest in French and bribe them for better marks in this language at school. Let them guess what you serve tomorrow if you prepare Frenched Tenderloin, Potatoes au Gratin, Vegetables Jardiniere, French Ice Cream, Petit Fours and Cafe Noir.

Frenched Tenderloin
Wipe tenderloins with clean cloth and cut crosswise into 2 inch slices. Place on chopping board and flatten with potato masher. Shake pieces in a paper bag containing flour, salt, pepper and paprika. Saute in bacon dripping about 10 minutes. Remove to casserole, add 1/2 cup top milk, cover and bake in preheated oven of 350 degrees for 25 minutes.

Potatoes Au Gratin
Heat 1 cup milk on low heat. Make a paste of 2 tbsps. fat (butter or margarine), 3 tssps. flour and 1/2 cup milk. Blend into hot milk season with 1/4 tsp. salt, a dash of pepper and 1 tsp. minced parsley. Pour this sauce over a greased casserole containing 2 cups cold boiled potatoes that have been diced. Sprinkle with 6 tssps. grated old cheese, then 1 cup dry crumbs. Dot with 1 tsp. butter. Bake in the oven until mixture is hot—about 25 minutes. Makes 6 servings.

Vegetables Jardiniere
2 cups scraped, sliced carrots
2 cups peeled, sliced onions
2 cups cubed tomatoes
1 cup canned peas
1/2 cup sliced green pepper
Place vegetables in greased casserole. Add 1/4 cup mushroom soup. Cover casserole and bake at 350 degrees for 1 hour.

French Ice Cream
Into a saucepan combine 1/2 cup fine granulated sugar with 1/2 cup water and 1/4 tsp. cream of tartar. Boil until syrup spins a light thread. Beat 4 egg yolks thoroughly then pour syrup into them; continue beating until mixture is thick. Add 2 tssps. rum extract (or vanilla) and 3 cups whipping cream. Stir until blended, and pour into refrigerator trays and freeze until like mush. Pour mix into bowl and beat again, then return to refrigerator and freeze firm (about 2 hrs.).

Petit Fours
1/2 cup butter
1 cup sugar
2 cups sifted cake flour
2 tssps. baking powder

1/4 tsp. salt
1/2 cup water
3 egg whites
1 tsp. almond extract
Cream shortening and sugar well. Mix and sift flour, baking powder and salt and add alternately with water to sugar mixture. Fold in stiffly beaten egg whites. Stir in flavoring and turn into 2 greased 8 x 8 inch cake pans. Bake in preheated oven of 350 degrees for 20 to 30 minutes. Cool on cake rack for 10 minutes then turn out and cut in small squares. Place on cake rack and pour boiled pink frosting over them. Decorate with pastry tube using butter icing or sprinkle with cake decorations.

Cafe Noir
Percolate coffee and serve black.

THE QUESTION BOX
Mrs. R. W. asks: What is paprika and is there any value in it?
Answer: Paprika is the crushed dried fruit of a large-fruited species of the capsicum. It contains some Vitamin C and has a mild flavor. Some capsicum is grown in British Columbia, but it is native of Europe.

Mrs. W. S. asks: Can we freeze pumpkin pie?
Answer: Yes, we freeze pumpkin pie before it is baked or after baking. The family preference is freezing pumpkin pie ready for the oven and then baking the frozen pie at 450 degrees for 15 minutes, then reduce to 350 degrees for 50 minutes.

Mrs. N. L. asks: What are the makings of a club sandwich?
Answer: There are 2 decks of filling, 3 of bread. One filling is egg salad, the second is usually lettuce and sliced ham. Cut the sandwich in two triangles. Place a half slice of tomato on each, a stuffed olive on a toothpick into the tomato and bread, that is the famous club sandwich.

Pasture Managing For More Income

Realizing that good pastures can result in added income to farmers, the Maritime Fertilizer Council has come out with a number of basic rules on pasture management for the guidance of cattlemen. They are:

1. For a long term pasture one should select the very best land with a good sod, as near to the barn and water supply as possible.
2. If fencing is convenient and cheap, rotational grazing in two or three fields will assist materially in maintaining a good sward and allow wild white clover to go to seed. This is a good precaution in case of severe winter killing.
3. Complete fertilizers consisting of nitrogen, phosphorus and potash are generally necessary. If the soil is extremely acid and cannot be conveniently put into a cultivated rotation, a top dressing of lime should be applied—preferably in the fall.

4. It is much cheaper to treat a good soil with fertilizers and by harrowing, then to plow and reseed it for pasture purposes. If the sod is gone there is no option.
5. Fertilize at least half an acre for each full-grown animal.
6. Keeping the grass well grazed early in the season will encourage wild white clover to develop in place of poorer grasses, thus increasing the nutrient value of the herbage and making better late summer pastures.

7. On naturally dry soils, if fresh water is handy, it will often pay to install a spray or other irrigation system.
8. Do not overgraze late in the fall as strong plants will make better early pasture the following spring. Shade in the pasture and protection against flies should be provided.

Grazing on oats sown as a nurse crop to clover and timothy has been found to be an excellent supplement pasture for part-time grazing without injury to the new seedling. An acre of oats fertilized at seeding time with 400 to 500 pounds of high nitrogen fertilizer such as 6-12-8 or 5-10-10 should provide an hour or two daily grazing for six or seven cows when oats are 10 to 12 inches high for a period of at least two weeks.

Books To Review

MATADOR
by Barnaby Conrad

Matador is a book about a tremendously exciting afternoon. The famous bullfighter Pacote, semi-retired, comes back to the ring for one last performance.

Outside his room, the Spanish city is gaudy and gay. Inside, he is alone with his manager, his dog, his girl friend and a fool of a reporter, in turn. They each play their part in the drama of his afternoon, and then he leaves for the ring, terribly upset, wearing his brilliantly embroidered matador suit.

The first fight, with a young rival facing the charging bull, is truly a thriller. Suspense mounts as Pacote finally enters the ring to meet his bull in a dramatically extended battle of wit against weight.

Exciting reading is guaranteed, and you won't know till the very end what is going to happen. And naturally, the reviewer won't tell.

Skinny men, women gain 5, 10, 15 lbs.

Get New Pop, Too. Be Thrilled With Results - or Pay Nothing

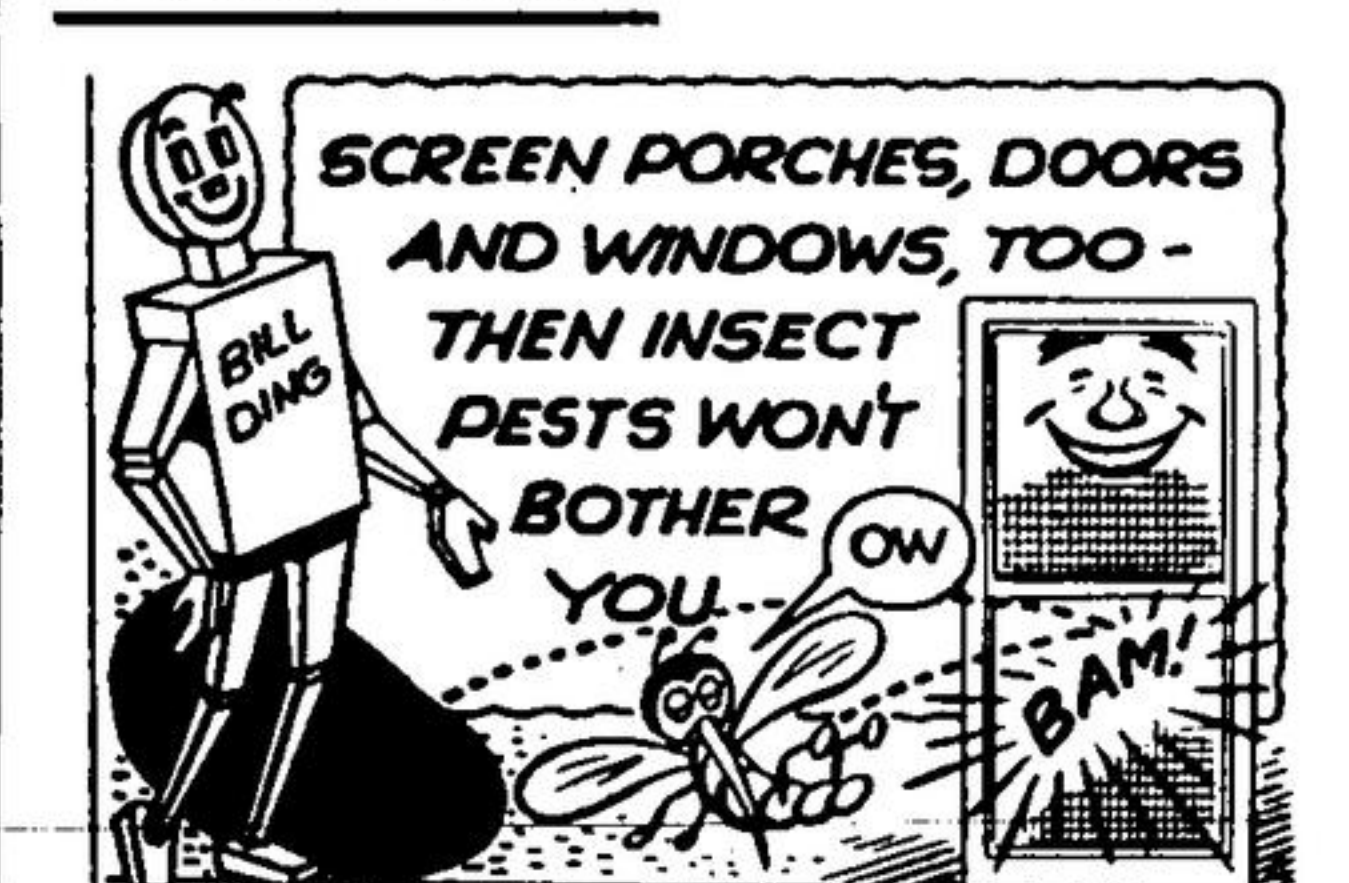

What a thrill! Bony arms, legs all out, ugly hollows fill up; neck no longer scrawny; body lines half-staved, sickly look. Thousands, who never could gain before, are now proud of shapely, healthy-looking bodies. They thank the special vice-building and back-building tonic, Oves. Its tonic, stimulants, invigorators, iron, vitamins B, calcium, curch blood, improve appetite and digestion so food gives you more strength and nourishment; put flesh on bony bones. Mrs. J. Savard, Hattingsville, Ont., writes, "I gained 16 lbs. Tired feeling, nervousness gone, too." Another user, Mrs. Haro Gagnon, Cap Chat, P.Q., writes, "I gained 13 lbs. Health fine. My run-down husband gained 15 lbs. New pep." Don't fear getting really fat. Stop when you've gained the 5, 10, 15 or 20 lbs. you wish. Money back if you're not delighted. Oves Pills, New "get-acquainted" size only 60¢. Refuse substitutes. Oves has given results when other tonics failed. Try famous Oves; Tonic Tablets for new vigor and added pounds, this very day. At all druggists.

ANNUAL GOOD NEWS

Every year, Canada's statistics show that this country is gradually wiping out tuberculosis. Each year, the figures for TB deaths are lower; each year, there are fewer cases. There are several reasons why this great improvement is taking place, one of them being the public co-operation with the great chest x-ray campaigns that help to discover cases of the disease, permitting them to have immediate treatment. With the new methods developed by modern medical science, most cases of TB, if diagnosed in their earliest stages are curable.

ONLY A V-8 IS UP TO DATE...

TRY FORD V-8

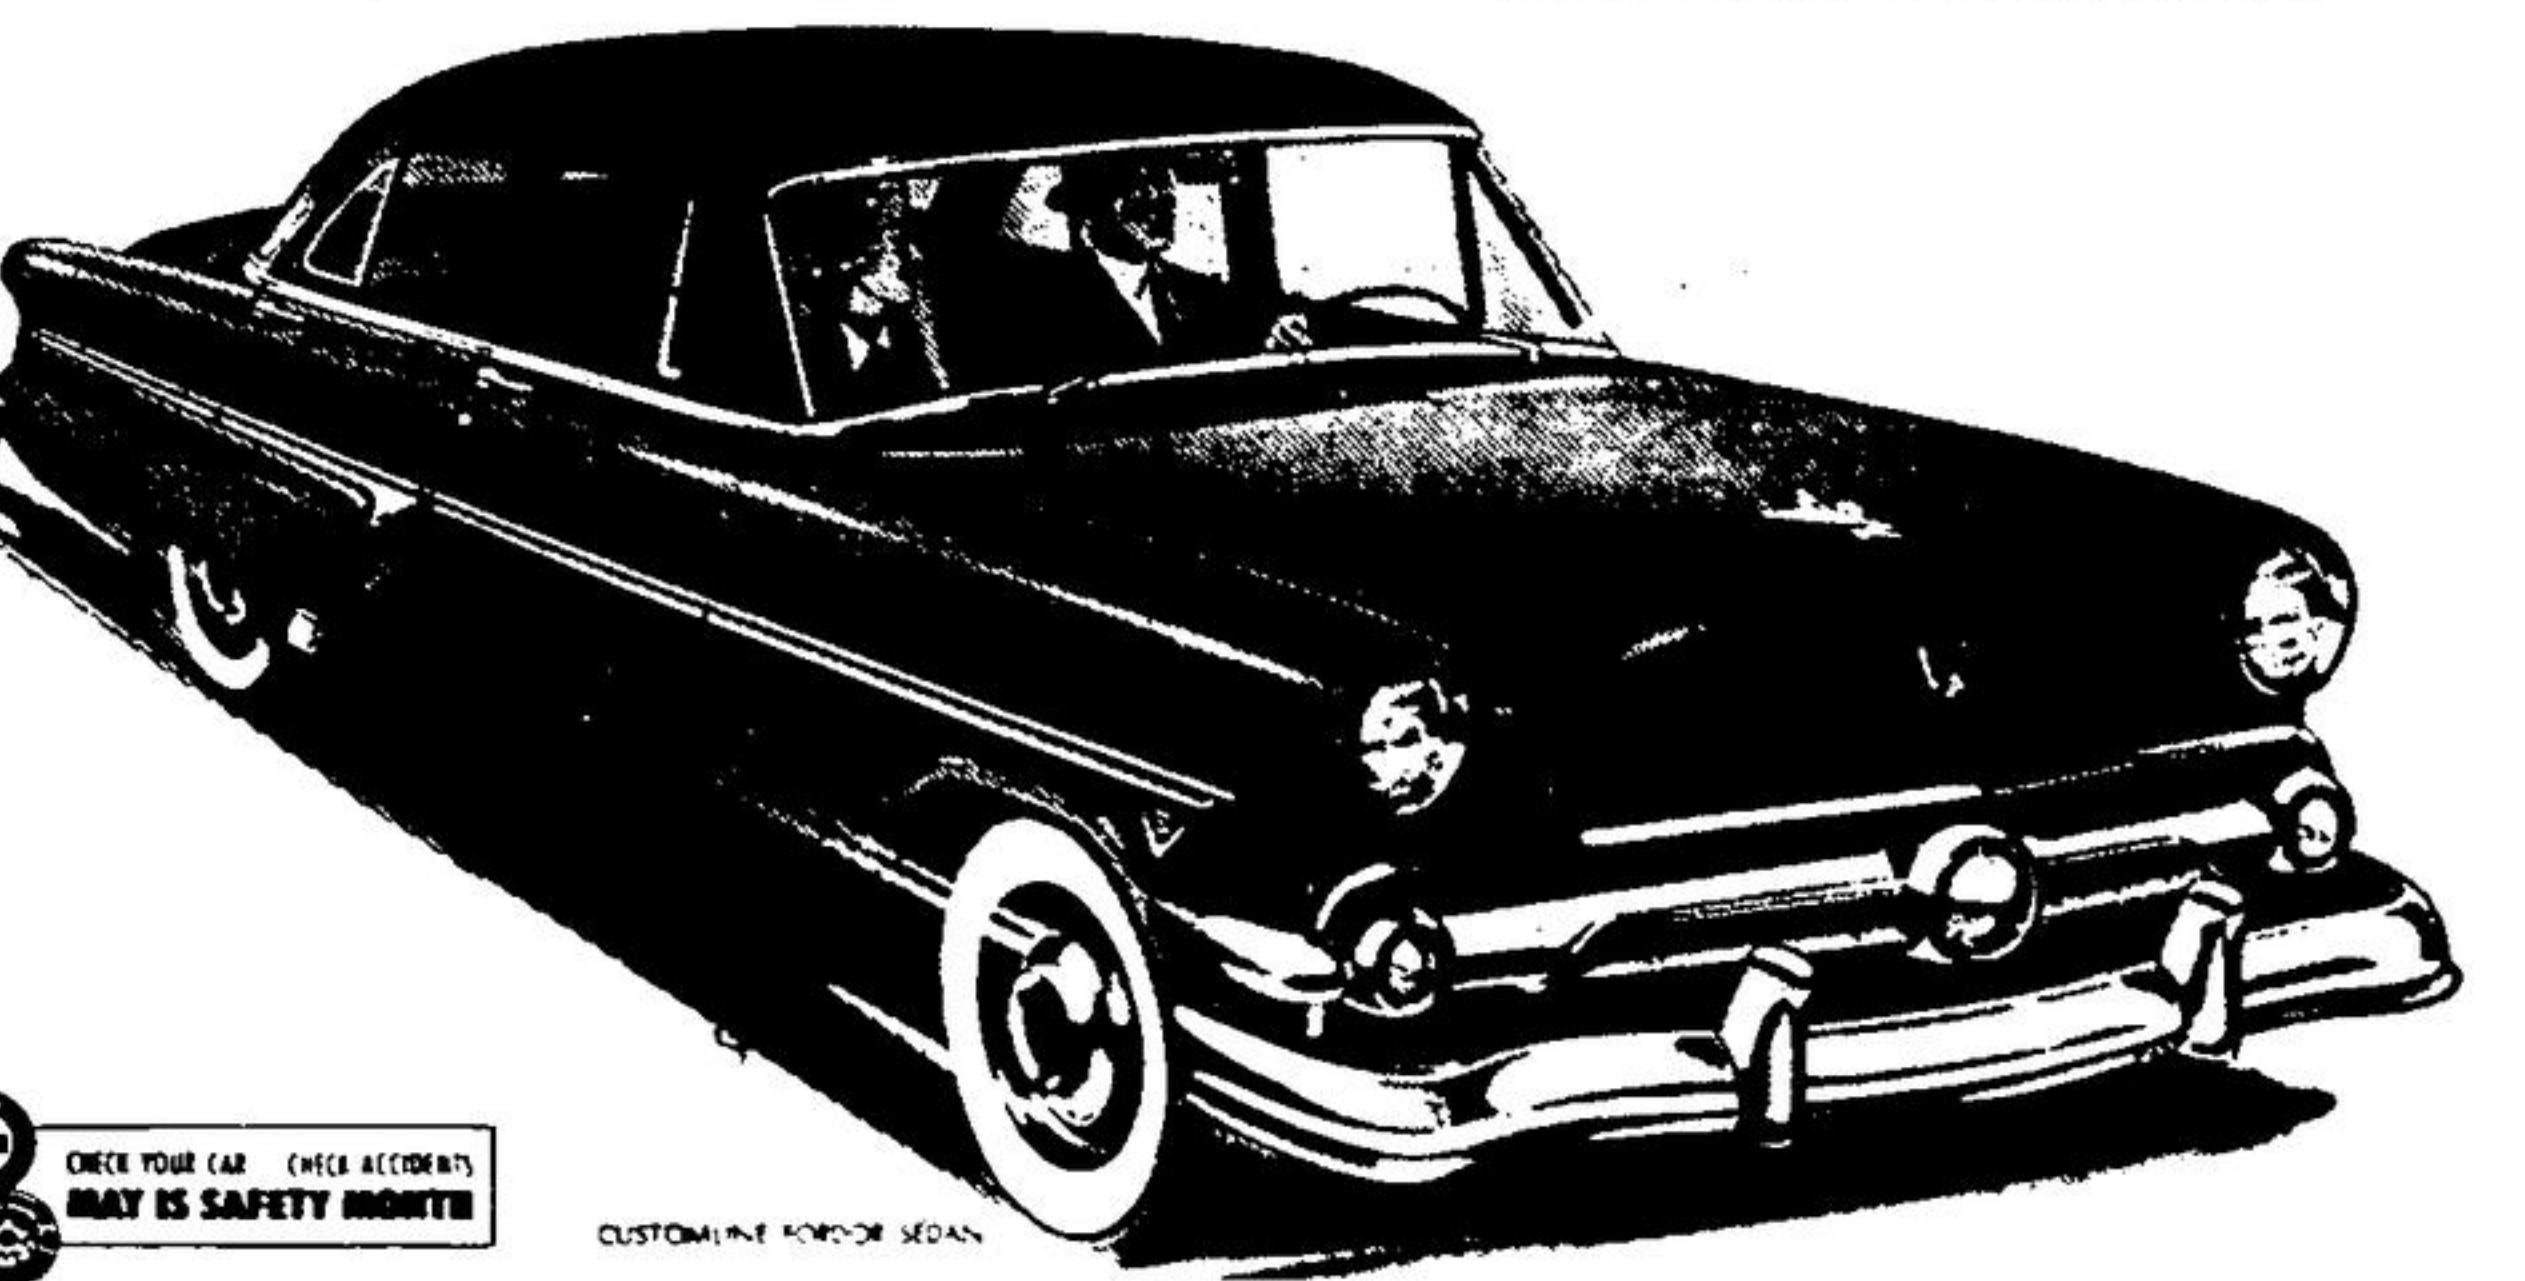

DRIVE—and find out why Ford is worth more.
Take it out on the road and you'll be convinced that Ford out-performs all other cars in its field.

DRIVE—and discover Ford's V-8 smoothness.
Let the responsive performance of Ford's great V-8 engine—product of the experience gained in building more V-8 engines than all other manufacturers combined—prove to you that only a V-8 is up to date.

DRIVE—and feel Ford's soft, steady ride.
Enjoy the road-hugging "big-car" feel of Ford, relax in the comfort of Ford's firmly sprung foam-rubber seats, experience the completely effortless ease of driving that's yours when you drive Ford.

DRIVE—we think you'll like it.
If you buy a car with an eye to lasting value, then you'll be wise to go Ford—because Ford is worth more when you buy it, worth more when you sell it.
