**QUICK KNOCKDOWN**  
 The new boxing ring recently installed in Madison Square Garden can be knocked down almost as fast as some fighters we could name. This is important to the Garden, with its quick-change schedule of sports events, from boxing to basketball to hockey and back to boxing again. Made of lightweight aluminum, this ring promises to be more than a match for the toughest heavyweight.  
 Aluminum is constantly making news in our own sports world. Anglers, yachtsmen and other strenuous types go for the light, strong, non-rusting equipment made by Canadian manufacturers from Canadian aluminum. Aluminum Company of Canada, Ltd. (Alcan).

**Top Cattle Too**  
 As in the case of Elmroft, a visit to Jack Fraser's Spring Farm would not be complete without an inspection of this outstanding herd of Holsteins. Another feature of interest was the proving grounds where combines were being operated and tested for their ability to stand up while being pulled over a course unbelievably rough terrain.

**Final Step at Spring Farm**  
 The 4th year unit being operated by J. M. Fraser near Huttonville, was the last part of call. Here again they found another operator who really knows his business. Mr. Fraser in discussing his farm program, stressed the importance of legumes as a medium of producing high quality dairy feed and also as a method of maintaining and building up soil fertility.

**Field Day Well Attended**  
 Despite very unfavorable weather conditions, 750 dairy cattle enthusiasts from the counties of Halton and Peel attended the Halton and Peel Holstein Jersey and Guernsey Field Day, at the Ontario Agricultural College, on Saturday, June 13th. Thanks to the excellent co-operation received from the Animal Husbandry Department at the College, and other members of
