Oakville and Trafalgar Sign Twenty Year Water Agreement

After months of negotiating, the public utilities commission of Oakville and Trafalgar have arrived at an agreement by which the township will purchase water from the town for a period of 20 years. The agreement, previously signed by the Oakville commission, was signed by the Trafalgar commission recently.

"We will buy the water on a sliding scale according to volume," stated Gordon Leaver, chairman of the Trafalgar public utilities commission. "The basic rate will be the same as at present, 27 cents per thousand gallons. As the volume increases the rate will be reduced. We are buying about 800,000 gallons of water a day now. We have agreed to buy up to six million gallons a day over the next 20 years. We are not obligated to take more than that. If we need more we may establish our own water system."

Oakville's P.U.C. chairman, Hillmer Loquist, predicted that a new filtration plant would be ready for operation by the summer of 1957, assuring crystal-clear, filtered water for Oakville and Trafalgar homes.

Addition or New High School Must for Burlington

The Burlington district high school board is faced with a \$200,000 addition to the present building "as a stop gap" or the spending of \$700,000 for a new high school. Cr. Frank Darton, education chairman, informed Burlington council. The board already is looking over possible sites "and will get an option of land and prepare plans for submission to the Department of Education for approval," he reported.

Cr. Darton's report was based on a special meeting of the high school board.

"Space in the high school is very limited," reported Cr. Darton. "Despite recent additions, the limit in accommodation will be reached by 1957 if not before."

Trustee M. M. Robinson, who had made an extensive study of the matter, outlined school enrolments in Burlington and Nelson. He produced a chart showing that present Grade 1 registrations were greater than Grade 8, "indicating an increased registration in the high school for each succeeding year."

"Enrolment in high school this year is 863 and it will be growing year by year. The anticipated enrolment for January, 1956 will be 900 despite the usual drop-offs. This figure is based on newcomers entering the area."

Zoning By-Law Nearly Finished

The Nelson Planning Board requested a special meeting with the township council to study Nelson's new zoning by-law and map. The request was made at council meeting by Cr. Harold Stewart, who said the proposed map and by-law were about 75 per cent. complete.

The map is complete from the lake to the Upper Middle Road. Cr. Stewart revealed. It replaces the map and by-law which were drafted by the Burlington and Suburban Planning Board several years ago and which were repudiated early this year with the setting up of the township's own planning board.

Davidson Is Ejected From Council Again

Councillor John Davidson again took his place with some 50 ratepayers at Bronte council meeting after Reeve Thomas Millward asked him to vacate his council seat, which he took during the reading of the minutes, since he offered no apology.

Council a third time voted two to one for the ejection of Councillor Davidson. Councillor Charles Livingstone voting in favor of letting Councillor Davidson take his place at the council table. Councillors Edwin Lee and Gordon Lefebvre were opposed.

Reeve Millward asked village clerk Richard Hunt to hold over reading of the minutes as councillor Davidson took his place to his right.

When the reeve asked Davidson for a simple and normal apology, Davidson replied that he had earlier submitted a written apology. The reeve then called for a vote and the decision was the same, two to one for Davidson's ejection. He took his place among the ratepayers.

PROCESSED CHEESE
The most commonly known type of cheese is that made from cheddar or other hard cheese. It may not contain more than 43 per cent. moisture while is about 10 per cent. more than in cheddar itself. To make this processed cheese, cheddar or other hard cheese is ground, blended and pasteurized, then poured into the package to harden.

Dial Telephones For Bronte In 1957-Bell

Dial telephone service will be introduced in Bronte early in 1957, G. W. Harris, Bell Telephone manager for this area, announced. The telephone facilities that will go into use in Bronte at that time will be as modern as any in the world, the manager said.

The exchange is already in the planning stage but the construction of it will be a long and complicated undertaking.

The decision to convert the Bronte exchange to dial operation as soon as practicable was made because the Bell Co. foresees a heavy residential and industrial expansion in this area in the very near future, Mr. Harris said.

He pointed out that the demand for telephone service in Bronte has increased steadily over the years. There are 780 telephones served through the Bronte exchange now, compared with 280 in 1945.

In addition to the design and construction of a new exchange building, many other engineering, construction and installation projects must be carried out as part of the dial conversion program.

The number of cheese factories in Canada has declined from 1288 in 1935 to 431 at present.

Corunna Ties Up Series With Win On Home Grounds Sunday, 12-7

Corunna bounced back to tie up their best of three series with Campbellville by virtue of a 12-7 victory in Corunna on Sunday, September 25.

Jack Roberts was away off form and Corunna touched him for 10 hits and one walk. He hit two batters and struck out six. Harry Hamilton, relieving him the second day in a row, mopped up in the eighth inning in masterful style.

Entering the game with the bases loaded and none out, he forced the first man to roll to the mound for a force at the plate and struck out the second man. The third batter he faced popped up in front of the plate but Jack Laking dropped the ball, which was carried forward by the strong wind and a run scored. Hamilton struck out the next man to end the inning.

Two Corunna pitchers held Campbellville to six hits as they walked three, hit two batters, and struck out seven.

Campbellville took a 3-0 lead in the first inning but Corunna came right back with five in their half and from there on were never headed. A Corunna run in the third on Kilbreath's tremendous home run over the left centre field wall and another in the fourth, built the score up to 7-3 but Campbellville closed the gap a bit in the sixth when they picked up two runs on Earl Cairns' line drive home run

over the right field fence with a runner on base.

Corunna made the score 8-5 in the bottom of the sixth when they scored a run off three hits and an error but Campbellville got that one back in the seventh when Early tripled home Wingrove, who had singled. Three hits in the bottom of the seventh produced two more Corunna runs and four hits and an error in the eighth made it 12-5. Campbellville's final run was scored in the ninth when Early's single drove in Laking, who was on second on a throwing error by the third baseman.

M. Lockery with a triple, a double and a single led the Corunna attack while Anderson contributed three singles. Kilbreath hit a home run and a single, Brown a double and a single and B. Lockery two singles. Garvin, Hystead and Curran all singled.

Early tripled and singled for Campbellville and Henderson had two singles. Earl Cairns homered and Wingrove singled.

A General Motors Value

After all, it really isn't considered good form to toot one's horn too loudly...HOWEVER...since the early months of this year, an unparalleled situation has existed and we can't contain ourselves any longer.

Pontiac—we've got to say it—is now up in the TOP 2 in automotive sales in Canada...second only to another General Motors product!

This isn't just a claim...it's a fact. Against the toughest competition, Pontiac has plain outsold every other manufacturer's cars.

It's a hats-off tribute to Canadian motorists, too, for their instant recognition of Pontiac's sterling worth. No doubt about it, they buy shrewdly and well where value counts.

Well, there it is! Pity, we had to be the ones to tell the story but that's the automotive industry for you.

Anyway...now everybody knows what more Canadians than ever before have found out this year...dollar for dollar you just can't beat Pontiac!

It's more than a trend... it's a torrent to
