Ontario's Development Described To Juniors By John Root M.P.P.

Mr. John Root, M.P.P. for Wellington North and Dufferin, was the guest speaker at the joint meeting of the Acton Junior Institute and Acton Junior Farmers at the home of Lawrence Hensley on Wednesday, October 12. His talk, entitled, "The Development of Ontario, was one of great interest. Mr. Root pointed out at the outset that this province had a great abundance of natural resources, giving the following figures: 67 per cent of the iron ore of North America is mined in Ontario; 99 per cent of the nickel; 34 per cent of the lead; 24 per cent of the zinc.

The speaker told of the great timber industry. Three out of every 10 newspapers printed in the world are turned out here. One plant turns out 1,000 tons of paper a day, another 70 tons of Kleenex.

Ontario is the greatest industrial province in Canada and 65 per cent of the new industry that has come to Canada since the war has settled in Ontario. Hydro power has doubled in the last eight years.

The speaker pointed out that one million and a quarter new people have come to Ontario. In closing, the speaker felt that there still is a great future for Ontario farmers despite the fact valuable land is lost to industry and the farm population is decreasing.

At the Junior Farmer meeting, the boys were addressed by Dr. Ronald Hensley, who spoke on meat inspecting and TB testing. Dr. Hensley pointed out that the cattle population of Canada was 10 million head and that 87 per cent of the Canadian cattle are tested for TB. He stated that there are less reactors in the west, which is due to the dry climate plus the fact cattle are farther apart in the west.

Here in Halton in 1936, 14 out of every 100 cattle were reactors while today, there is only around two per cent reactors. He explained the meat inspecting work at a packing house. Six glands in the head are examined for TB and eight pair of body glands. The

speaker said that this is a very particular work as the health standard of Canadians has to be protected. At the Canadian Institute meeting, the girls had a talk on rug making by Mrs. Thomas Fines, Ospringe. Lunch concluded the evening.

Farmer At Limehouse Dies In 70th Year

Following a short illness, Albert Edward Chalker, 69, died at his home in Georgetown on Thursday, October 6.

He was born in Middlesex, England, son of the late John and Sophia Eyles Chalker and came to Canada in 1907, working first on a farm at Simcoe and then in a factory in Lewiston, N.Y. In 1914, he went to Limehouse, where he farmed until 1943.

In 1930 he married Minota Matthews. When the family moved to Georgetown in 1943, Mr. Chalker worked as caretaker of Chapel Street School for a year and then as an elevator operator at Alliance Paper Mills for six years. Since then he had been retired.

He is survived by his wife and one daughter, Anne; a sister, Mrs. Charles Cutts of Acton; two brothers and four sisters in England, Gertrude and Fred of London; Sophia of Richmond, Surrey; Mrs. Emma Duck and Mrs. Mercy Olphert of Worthing, Sussex; and Thomas of West Wimbeldon. French Revolution

When you get a French chef to touch mass-produced, quick-frozen foods with a ten-foot spoon—that's a kitchen revolution. Yet some fifty quick-frozen Gallic delicacies are now being marketed by a French company of cooks.

We're glad to report that aluminum gets a Cordon Bleu from the gastronomes. They use it in conveyors, containers and kitchen equipment; and they use nothing else for packaging their products. They respect the way tasteless, odorless, moisture-proof aluminum respects their creations, keeping their freshness and delicacy of flavor till the magic moment when they reach the table.
